

Fort Story Detour Ready September 1

The three-mile by-pass connecting the Shore Drive with Virginia Beach will be open to the motoring public by September 1, it was estimated today by J. M. Hagan, Suffolk district engineer. Mr. Hagan said that the road, which makes a semi-circle south of Fort Story, begins on the Shore Drive at Granite and comes out at 120th street, Virginia Beach.

At present there is a detour starting just beyond the Lerner bridge at Lynnhaven Inlet connecting with the Larkin road and coming out at the Virginia Beach casino.

"The by-pass has been graded," Mr. Hagan said. "The wet weather has slowed up the work as some of the material was on dry of the road received." He added that the top surface has been placed on about one mile of the road, leaving two miles yet to be treated.

Lioness Auxiliary Collect Aluminum

The Virginia Beach Lioness Auxiliary met Tuesday at the Princess Anne Country Club for a luncheon followed by a business meeting.

Three new officers were elected as follows: Mrs. James Barton, second vice-president; Mrs. Webb Brown, third vice-president; Mrs. Reginald Whitehurst, chairman of Year Book.

The next meeting will be held at the Club on Tuesday, August 26.

The Club sponsored a drive on Wednesday for the collection of aluminum for the Virginia Beach area. The Boy Scouts of Troop 60, under the direction of Hugh Lynn Cayce, started on 17th Street at 9:30 and articles collected were deposited at the Daniel Boone marker at the foot of 17th Street.

High School Appears To Be Certain For Virginia Beach

Physical Fitness Classes Popular

Hugh Lynn Cayce, recreation director of the physical fitness program now being conducted at Virginia Beach, says that daily classes are proving to be most popular not only with the residents but with the visiting tourist. These classes have been largely attended from the beginning and the attendance is growing daily. The classes are being conducted by the Virginia Beach Life Guard Patrol who were given special training before the inauguration of the classes.

At the present time these classes are being attended by about 50 persons every day. Mr. Cayce said. Classes are held at the following places each morning. In front of the Beach Plaza Hotel, between 22nd and 23rd streets, at 11 a. m.; in front of the Kenilworth, between 20th and 21st streets, at 10:30 a. m., and in front of the Pinewood Hotel at the south end of the beach, usually at 10:30 a. m.

Free Talk Always Proves Expensive

Officers and enlisted men of all branches of service are under strict orders not to discuss military affairs, movements or workings that are taking place in their respective branch of the service or their post.

However, it happens that sometimes some individual speaks out of turn or talks too much and it was the other day with a private stationed at Fort Story.

It appears, according to the story, that the private, hitch-hiking to his home in Lynchburg some weekends ago, was picked up and was given a ride through to his destination.

The motorist was a friendly fellow, and wanted to know all about camp life, and he was told "spen-y," perhaps too much in these days when officer and enlisted men are being cautioned not to discuss affairs military with strangers.

You can imagine the private's surprise a few days ago when he saw the friendly motorist at the fort. . . and in an officer's uniform. What's more, he was wearing the insignia of a major.

The private is now devoting more time dodging the Major than he is devoting to his military training.

Options Obtain An Approximate Ten Acres For Site Of Construction

Athletic Field To Be Built
In Conjunction With School.

Funds Applied for under
Lanham Bill.

Necessity Occasioned by
Growth of Town and Influx
Of Army Children

Appreciation has been made to the Federal government for a grant of approximately \$150,000 for the construction of a High School Building at Virginia Beach under provisions of the Lanham Bill by the Town School Board. The necessity for this action was brought about by recent growth of the Town and the sudden influx of Army families with children. Heretofore the children of the High School grades have been attending school at Oceana but that has become crowded beyond capacity. The Town graded school likewise has become over crowded.

In the event the grant is made all of the high school classes will be held there and possibly one or two of the upper grades of graded school to relieve the present congestion.

The prospects appear most favorable that the grant will be made for the construction of the planned building. Options have been obtained on approximately ten and one-half acres of land for the site. This is located between Twenty-fourth and Twenty-fifth Streets and extending back two blocks to the west of Mediterranean Avenue or paralleling the old dog track.

The size of the property is also expected to permit a combination of football and baseball field in the future. The property includes all of block 128 on the official Virginia Beach map, which is the block immediately west of Mediterranean Avenue, and most of block 135, the next block west.

Rudolph, Cooke & Van Leuven, architects, are preparing the plans. Members of the Virginia Beach School Board are Wallace Clark, chairman; Gladstone Bryant and Dr. Waller L. Taylor. F. W. Cox, superintendent of Princess Anne County Schools, also is superintendent of the Virginia Beach system.

Quail Census To Determine Season Closing Date

Virginia's 1941 quail hunting season will be set after the completion of a large scale quail census recently begun by game wardens and field biologists of the Commission of Game and Inland Fisheries. The census will be carried out on approximately a quarter of a million acres of representative Virginia quail lands, and the number of quail found will be carefully compared to the number of birds present on the same area last year. Although preliminary work on the census is already under way, it will not be completed until October, when most of the young quail will be nearly mature. The closing date of the 1941 season will be announced after the Commission members have studied the results of the census.

If the results of the 1941 season indicate that the census is helpful in regulating the quail bag to the total quail supply, a similar check will be made on the same areas each year prior to the final announcement of the hunting regulations.

Wildlife Men Inspect

Eastern Virginia marshes are generally in excellent shape for waterfowl, according to F. M. Uhler and G. H. Jensen, duck food experts of the U. S. Fish and Wildlife Service. The federal wildlife men recently completed an inspection trip arranged by the Virginia Commission of Game and Inland Fisheries, on which they were accompanied by field biologists and other Commission personnel. They reported an abundance of pond weeds, wild celery, wild rice, water hemp, duck potatoes, and other waterfowl foods in the marshes.

In arranging the survey at the request of a number of marsh owners who had asked advice on how to improve marshes for waterfowl shooting, the Commission men said that plants brought in from other states frequently do not thrive when planted in Virginia marshes. Practically all important duck foods which will thrive in Virginia can be found growing naturally. Wildlife men cannot make definite recommendations as to species of plants that should be planted on a marsh until a study of the soil, water, and vegetation is made.

County Supervisors Urged To Adopt Milk Ordinance

Infant Sanitarium Dance Monday Week

With the Cavalier Beach Club offering its full facilities a dance will be held on Monday, August 11 for the benefit of the Infant Sanitarium. The affair gives promise to be the leading social event of the mid-season.

Dance music will be provided by Paul Pandaris and his swing orchestra and many floor show attractions by local talent will be added throughout the evening. These are under the supervision of Mrs. Seldon Grandy entertainment chairman, who will announce in complete program at a later date.

Mrs. Burks Withers is general chairman of the dance committee and is being assisted by Mrs. Louis Windholz and Mrs. Walter Mitchell, vice-chairmen and Mrs. F. S. Royster, Jr., Mrs. J. Billorey Hudgins, Mrs. Barton Myers, Jr., and Mrs. Abner Pope.

Finance Committee: Mrs. Walter Whitchard for Norfolk, Mrs. Roland Thorp for Virginia Beach, Mrs. J. Sydney Smith, Jr., Publicity; Mrs. Robert Hunter and Mrs. L. Jerome Taylor. Mrs. Joseph D. Deal, president of the Board, is general chairman on arrangements.

A list of Patrons which will include many residents of Virginia Beach, members of the summer colony and Norfolk will soon be announced.

Wasteful Motors Costing Autoists \$22 Each Year

Virginia motorists spend \$22.23 each year or \$11,319,316 as a result of their failure to keep their automobiles properly adjusted, according to John B. Dey, Vice-President of Tidewater Automobile Association.

These figures are based on road tests made recently by the American Automobile Association's Contest Board with the assistance of the United States Bureau of Standards. The tests revealed, Mr. Dey said, that of all motor fuels used 14.7 per cent represents sheer waste from this single cause—lack of proper adjustment. The money loss for the nation as a whole amounts to well over \$600,000,000 a year.

"The tests, which are conducted under the strictest possible scientific and technical conditions, take into consideration only the wastage due to maladjustment of the average vehicle from the standpoint of stretching gasoline mileage and the economies affected by making proper adjustments to the vehicles were secured without adversely affecting performance. In fact, in several cases, performance was improved."

"While the officials making the tests agree that the average car is about four years old, the vehicles put through the test represented an average age of considerably below this figure. A greater possible saving might have been shown had the cars been more nearly average."

"Actual road tests were run by officials from the Bureau of Standards, who put the cars through their paces first just as they came off the streets, where they had been in everyday use. After carefully recording fuel consumption on this first test, the experts took the cars into a shop, made the necessary adjustments, and then put them over the same precise measured course on the Mount Vernon Boulevard."

Revival Service At Kempsville Baptist

Revival service will start Sunday, August 17 at the Kempsville Baptist Church. Rev. G. R. Tureman, a former pastor of the church, will be the evangelist. Philip Rogers, a member of the Kempsville church, and a ministerial student at Georgetown College, Georgetown, Ky., will be the song leader.

Democracy suffers more from its loud-mouthed friends than from its enemies.

Report Made On Sheriff Office by State Auditor and Recommendations Made.

Loan Made to Mosquito Control Board until Taxes Become Due

North Virginia Beach Residents Seek Additional Fire Protection by Installation of Fire Plugs.

At the regular monthly meeting of the County Board of Supervisors held last Monday at the Court House, Dr. W. B. Martin, chairman of the State Committee on Public Health and Medical Defense made a plea to that body that an ordinance be adopted in accordance with the recommendations and approval of the United States Public Health Service and the Virginia Department of Health. This would permit only pasteurized grade A milk and certified raw milk to be distributed but exclude grades B and C. The matter was referred to Dr. J. Leake, health officer of the County, for study and recommendations.

Further health recommendations were made for the control of trailers and sanitation around them; food inspection and rodent control.

The Mosquito Control Board, through R. H. Ballio, director, sought a loan to continue operations until the special levy becomes due and paid in December. The Board granted an advance of \$2,500 for this purpose.

After hearing requests from R. T. Thorp and Dr. Arthur Kelsey that fireplugs be placed at North Virginia Beach, a committee was appointed to confer with a committee from the Virginia Beach Town Council to work out a plan. Sidney S. Kellam, F. W. Ackles and G. W. Lawrence, a member of the board, were appointed.

A report was received from L. McCarthy Downs, State auditor of public accounts, on the office of Sheriff Guy Salmons for the year 1940. It recommended that the sheriff's office keep a more detailed account of expenses, particularly automobile and postage expenses. The auditor's report gave automobile expenses as \$527.55 and the postage outlay for the year as \$35.

Total receipts were \$7,526.08. The cost of caring for prisoners was given at \$1,297.12 and office expenses at \$2,068.35, including salaries of deputies, jailor and help. The net income was given as \$4,241.13.

Twenty-five dollars was appropriated to defray the cost of gas and oil used in the aluminum collection campaign.

Tides and Sun

(Reported by U. S. Weather Bureau, Cape Henry)

Friday, Aug. 1—High water, 1:55 a. m.; 2:44 p. m.; low water, 8:17 a. m.; 9:15 p. m.; sun rises, 5:09 a. m.; sun sets 7:11 p. m.

Saturday, Aug. 2—High water, 3:06 a. m.; 3:50 p. m.; low water, 8:20 a. m.; 9:20 p. m.; sun rises, 5:10 a. m.; sun sets 7:10 p. m.

Sunday, Aug. 3—High water, 4:13 a. m.; 4:53 p. m.; low water, 10:23 a. m.; 11:20 p. m.; sun rises, 5:10 a. m.; sun sets 7:10 p. m.

Monday, Aug. 4—High water, 5:17 a. m.; 5:51 p. m.; sun rises, 5:11 a. m.; sun sets 7:08 p. m.

Tuesday, Aug. 5—High water, 6:14 a. m.; 6:43 p. m.; low water, 12:16 a. m.; 12:22 p. m.; sun rises, 5:12 a. m.; sun sets 7:07 p. m.

Wednesday, Aug. 6—High water, 7:05 a. m.; 7:31 p. m.; low water, 1:06 a. m.; 1:16 p. m.; sun rises, 5:13 a. m.; sun sets 7:06 p. m.

Thursday, Aug. 7—High water, 7:53 a. m.; 8:18 p. m.; low water, 1:53 a. m.; 2:04 p. m.; sun rises, 5:14 a. m.; sun sets 7:05 p. m.

Note: Above tides are calculated for Virginia Beach. To correct for other points make the following additions to the hour given: Naval Operating Base, 6 minutes; Lynnhaven Inlet, 3 minutes; Cape Henry, 5 minutes.

Comments And Resumes on War

According to most commentators, it is the belief of the President that this country can take many a belligerent step without formally becoming a participant in the war. Judging by recent German statements, that belief seems to be well-grounded. Hitler's spokesmen denounce the United States and its foreign policy, but they still say that Germany will not be forced into declaring war on us, by "overt acts." In short, Hitler's legions are busy enough now without taking on a new foe.

If Hitler had wished, he could, obviously have construed the U. S. military occupation of Iceland as an act of war. Iceland is less than a thousand miles from Germany, and could be developed into a major air base for use against the Reich. Whether or not Iceland is actually a part of the Western Hemisphere is a highly debatable question. The little island lies across the 20th meridian, which is generally considered the dividing line of the two hemispheres. Two-thirds of the country is east of that line. However, the one-third which is west of the line includes Reykjavik, the only large Icelandic city and port.

The reasons for occupying Iceland are clear enough. First, the American occupation has released numbers of Empire troops for service elsewhere—the bulk of them will probably be sent to Africa, where Britain has just

won a decisive victory over France, and where there are rumors of German action to pull Vienna's well-burnt chestnuts out of the fire.

Second, the American occupation of Iceland makes it possible for us to patrol and dominate the greater part of the Atlantic ocean. Thus, British men-of-war need only to protect the convoys from Iceland to English ports, which involves a distance of about 700 miles.

Third, the American occupation of Iceland has made it clear to the world that, as the President said, we will recognize no fixed geographical boundaries in carrying out our policy of protecting this hemisphere from aggression. It is the government's position that the airplane has made all previous ideas of hemisphere defense more or less obsolete, and that our military outposts must be far-flung indeed.

Fourth, the American occupation of Iceland may have been designed as a move to pave the way for future occupation of other foreign possessions in our part of the world, notably Dakar, in French Africa, and the strategic Cape Verde Islands.

Theoretically, our Navy is not conveying British shipping. It is simply patrolling the Atlantic. In actuality, many authorities believe, there is little difference between a convoy and a patrol. It has been announced that an American (Continued on Page Five)

Everyone agrees that we should arm. But for what? For defense or offense? To fight or at home?

In 1917 Woodrow Wilson said, "We are to be an instrument in the hands of God to see that liberty is made secure for mankind!" Echoes of this doctrine have reverberated in the White House

MICKIE SAYS—

"THIS MAY BE A NEW IDEA TO SOME, BUT A GOOD CITIZEN IS LOYAL TO HIS HOME NEWSPAPER, BECAUSE IT IS A LOCAL INSTITUTION WORKING FOR THE GOOD OF OUR TOWN"

Snow White Laundry Given Fire Damages

A jury of a Norfolk Court awarded Clotilde Van Vlaenderen trading as the Snow White Laundry at Virginia Beach, damages to the extent of \$4,354.76 against E. L. Hurst, trading as Hurst Oil Company occasioned by a fire in the plant as a result of an explosion of fuel oil being delivered to the plant last March.

According to the allegation and testimony, a delivery agent for the Hurst Oil Company was filling the laundry's storage tanks "by pumping the oil at an excessive pressure," with the result that "it created a pressure in the tanks and forced the oil back out into the laundry burners at a high pressure and in dangerous volume."

The fire spread rapidly when the oil spilled back from the tanks and spread about the immediate vicinity. The laundry estimated its damages, including repairs to the building and machinery and a loss of clothing there to be cleaned at \$6,500.

The jury deliberated for about three hours over the case and returned a verdict of \$4,354.

County Youth Honored by 4 H

Stanley Oliver, Princess Anne County boy, was elected Big Chief of the All Stars 4 H Group at the annual meeting held last week in Blacksburg. Other select as officers were Paul Cassell, Wythe County, Lesser Chief; Pauling Hudson, Amherst, Scribe; Alice Tucker Alleghany, Scott; and Gordon Elean, Medicine Man.

"THE VOICE of a majority, swaying the course of government does not insure good government except it be the voice of a well-informed and well-intentioned people."

SENATOR WHEELER AND FRANK

For a long period of time the members of the Congress of the United States and departmental branches have been accorded the privilege of sending mail under the so-called "frank." This is as well known means has been a restriction placed upon the use of the frank privileges. That is, it is to be used only for official business and its use otherwise is subject to penalty. Undoubtedly, this privilege has been abused from time to time but the most flagrant abuse admitted publicly is that of Senator Wheeler when he mailed out one million post cards under his franking privileges for the benefit of some pacifist organization and the presentation of his personal views as to the present war crisis. In our opinion this can hardly be classed as official business. The Senator has undoubtedly the right to express his views on this subject in the body of the Senate which will be made a matter of record in the Congressional Record and could be unquestionably mailed under his frank.

Such action on the part of the Senator deprived the Post Office Department of \$10,000.00 of revenue and cost the department considerable more to handle and distribute the aforesaid cards. This, however, is a minor consideration upon further analysis. These cards went to thousands of men inducted in the Army; to thousands of parents of men now serving and to thousands of more who are engaged in defense work. The purport of the card was to advocate that the individual take every step to induce our Government to refrain from entering into a war. Naturally such a thought is accepted by all as no man other than one who is power crazed desires to participate in warfare. However, regardless of circumstances each individual desires to protect his liberties and property rights to protect his liberties and property rights when it is his desire to protect them to the limit.

The world today is undoubtedly faced with a crisis brought upon it by a power seeking man. It is therefore incumbent of every liberty loving nation to step forward in an effort to stave off the tremendous strides that are being made towards tramping these liberties under the foot of intolerable tyranny. Peoples of liberty loving and peace loving nations have felt the yolk of this unmerciful force. Much of it has been brought about by internal disruption or propaganda.

The marked example is the great tragedy of France which crumbled within thirty-nine days in the face of a well organized force. The defense made by France was pitifully weak and it has subsequently developed that it was occasioned by internal disruption and dissatisfaction within the Government and the people. Such steps as are now being taken by the Honorable Senator in mailing out his one million post cards has a tendency to disintegrate and create a dissatisfaction within our Government such as was found within France. Such an undercurrent as this will break the morale of our people. The Senator stated that inadvertently and unintentionally some of these cards fell into the hands of the service men but whether this be true or not the vast majority fell into the hands of some parent or kinsman of one who is giving his time preparing himself to serve his Country if and when the time comes. The morale of these men should be strengthened rather than broken down directly or indirectly. It would seem that if the Senator is to abuse his franking privileges that he should devote his abuse in an effort to build up the morale and create a union among the populace rather than to divide it. United we stand, divided we fall.

MR. DARDEN ON THE A. B. C.

The News has for some time advanced the theory that the policies being pursued by the Alcoholic Beverage Control Board of Virginia has had a tendency to decrease its efficiency in the control of alcoholic beverages the purpose for which this board was created. It is recognized that the old bar room was non-contendable. It is further admitted that conditions as they existed under the so called prohibition were intolerable. Recognizing these facts the 19th Amendment was removed from the Constitution and the matter returned to the various States to control or regulate the distribution

of alcoholic beverages as they saw fit.

The Commonwealth of Virginia by popular vote elected to permit the sale of alcoholic beverages but under a controlled and regulated system of distribution. There was no intent that the system should be made one of a mercenary type for the purpose of enriching the coffers of the State Treasury. The people desired to eliminate the bootlegger and the lawlessness that was created by his existence and through his teachings and at the same time to control insofar as possible the distribution.

Upon the inauguration of the system and the sale of bonified liquors within the State the bootlegger as a whole became extinct. However, as time had gone on our State officials and the A. B. C. Board have begun to look upon the State distribution of alcoholic beverages as a matter of a revenue producing source and not one strictly for control in an effort to influence temperance and a method of eliminating illegal and lawless distribution. In so doing the tax has been materially increased, prices raised to the extent that it is again becoming profitable for the bootlegger to engage in the illegal manufacture of and the illicit distribution of intoxicants. All reports released by the Control Board speak in terms of the amounts sold and the profits reaped by the State therefrom and nothing is done towards exerting their efforts to discourage or limit the use.

It is a known fact the bootlegger is daily increasing. He is now procuring a double price for his product than he did during the days of prohibition and at the same time finds a ready market for his entire output and does not have to deliver the product to the customer as he formerly had to do. Even though he is getting double the price that he previously got he is selling his product at about one-third of the cost of the same at the A. B. C. Store. Those who are acquainted with this product know that it is usually as palatable as the cheaper grades of whiskies sold at the A. B. C. Store after it has been treated. Experiences taught us that in most instances it is equally as pure and far more powerful.

We know by experience that the bootleg system is most undesirable and uncontrollable creating a lawlessness among the producers and likewise the consumers. For this reason we have theorized that the State should attempt to reduce prices of the beverages sold in their stores in order to stave off the return of the bootlegger rather than to look to the net profits received.

We were therefore very much gratified in the statement of the Honorable Colgate W. Darden, Jr., Candidate for the nomination of Governor of Virginia, when he expressed the same views on this subject and asked the Government to check the rise of the bootlegger and not consider the profits gained from the distribution through the State stores. We trust that whoever may be the successful candidate that he will take the same views.

OIL APLENTY

This country is building a great mechanized army. The very soul of that army will be oil—gasoline to propel it, and lubricants to grease the intricate mechanisms. So one of the extremely important questions of the time is this: Have we the motor fuel we need—and will there be enough left over for our civilian demands after military requirements are met?

That vital question was recently answered by the Texas Company. It is estimated that gasoline for the Army's 250,000 motor vehicles—tanks, blitz buggies, trucks, etc.—may total 1,000,000,000 gallons a year. That's a lot of gas—yet, says the Company, America's refineries can turn out that billion gallons in less than two weeks, leaving 50 per cent to produce for the air force, the Navy and the civilian population.

That shows how well the oil industry is prepared for this emergency. Under the American private enterprise system, it has developed, on its own initiative and with its own money, the greatest plant of its kind in the world. Thus, oil belongs with such other great industries—electric power, railroads, mining, etc.—which are ready to meet any demands circumstances may impose. That is what the private enterprise system—the democratic system—has done for this country. It is the system which has made America great, and which we are building our defense to protect.

BOOKS TO OWN

THE PASSIONATE WITCH is a novel which Thorne Smith started but which was unfinished at the time of his death seven years ago. Norman Matson has done an able job of completing the book, and so we have another nonsensical Smith comedy to enjoy. Nobody has quite matched the particular quality of inspired hilarity which makes his books uniquely enjoyable. THE PASSIONATE WITCH, while not in a class with some of Smith's other books, is nevertheless four hours of good, crazy entertainment.

The wealthy but meek T. Wallace Wooly, Jr., gets entangled in a questionable fire in a questionable hotel with a questionable wench named Jennifer Broome, whom he saves—but who sets him on fire, so to speak. Before he can count ten he's married her—to the consternation of all his friends and family.

In almost no time at all Wooly begins to suspect that his wife is a witch. Peculiar things happen from the start. For instance, the doctor finds no burns on Jennifer, though flames had enveloped her before her escape from the burning building. Another thing—Wooly is baffled by his wife's strange nocturnal disappearances. The suspicion of witchery becomes a reality when he catches her in the act of making a witch's brew from the blood of his murdered prize rooster! At this point Jennifer strikes her heels in the witch-room, but the aroused Wooly hews down the door with an ax. What he finds in an empty room and an open window! The domestic squabbles which follow this scene reveal a witch of the first magnitude.

Wooly's troubles are many and bitter; and they do not end with the fortunate circumstance of Jennifer's death in another house fire. Everyone feels that although she is dead, Jennifer will be back. The evilwindy wind of temperance executive now suddenly commences a madhouse career of eccentric wanderings, drunken orgies and barroom brawls. What a changed man is the Wooly who emerges triumphant from a nose-crushing contest with a tough bartender! But his greatest exploit is surely his venture into a ladies' Turkish bath establishment—a trip which he makes disguised as an old woman. An infuriated female bather charges, and off comes Wooly's wig! The public trial which follows is a treat.

Yet all of that is as nothing compared to the climax in which—in the wildest scene of a wild book—the witch-wife Jennifer returns in the form of a painted, haunted, comprehending horse, goes utterly mad, and precipitates a wild chase through the city streets which ends in the awfullest mess and confusion imaginable.

This book is first-rate nonsense. Those readers who could accept the Topper volumes will be able to take and enjoy all of this!

Behind The Scenes In American Business

STANDARDIZATION—Want to buy a wheelbarrow? Not many folks do, of course, but just to illustrate the standardization and simplification trend—which is due to be speeded up now under pressure of the defense program—It's pointed out that wheelbarrows now come in only 11 different sizes. They used to be 125! Donald M. Nelson, purchasing director of OFM, has announced a government program designed to save scarce defense materials by simplifying hundreds of non-defense consumer goods. This has been going on, in a mild way, for some 15 years, but from now on there will be much greater restriction on stocking of odd sizes and styles. It should be one of the least of the hardships of civilian co-operation in defense. Other examples of standardization: During the last 15 years, that the average customer hasn't even noticed: Shotgun shells have been reduced from an array of 4,600 different types to less than 350; more than 8,000 sizes and varieties of abrasive paper and cloth have been reduced to less than 2,000; and where there used to be 5,000 kinds of spades and shovels, there are only about 1,000.

THE WOMAN BUYS—the female of the species is wealthier than the male. Women in the United States control 70 per cent of all private wealth, and they spend more than a thousand dollars every second. They buy 90 per cent of all food, 95 per cent of all furniture, 75 per cent of all clothing. They even purchase

63 per cent of all men's ties! But, as a leading woman's educator points out, "they own the money, they spend the money, and yet they never learn much about money." Since money is so clearly woman's responsibility, declares James Madison Wood, president of Stephens College, "she must be educated for the job." The head of the Columbia, Mo. Women's Junior College has long been recognized for the "practical-minded" preparation his school gives its girls, teaching them sound budgeting principles, home management, personal finance. But there are 37,000,000 adult able-bodied women in America, and their estimated collective holding exceed \$210,000,000,000. The training of this giant army of women, Dr. Wood contends, can strengthen our financial structure and do its share in bolstering democracy here at home.

BITS O' BUSINESS—Electric output for the nation last week ran 18.5 per cent ahead of a year ago. . . . The nation's machine tool manufacturers are almost doubling their 1940 production rate—shipments for the first six months being \$348,000,000 worth, or 93.3 per cent more than in first half of 1939, almost all workers in that trade are in companies on a two- or three-shift basis. Sales of General Electric in three months ending June 30 were 62 per cent higher than for the same period last year, but net income after all charges and taxes only about 7 per cent. . . . Nation's department stores still doing fine, with sales for week ending June 12 up 19 per cent over corresponding week of year before—the gain for four-week period was 31 per cent. . . . Apparently British households are as brand-conscious as Americans—and for American brands; they object to getting specially-packed shipments that don't show the brand names.

SHORTEN WEEK—The first five-day week in the history of the grocery business, given last May to 7,000 retail employees of the A & P's eastern division, has worked out well enough that the five-day, 48-hour week is now being extended throughout the company's whole chain "as far and as fast as possible." John A. Harwood, president of the company, noted that in some localities adoption may be delayed or even prevented by state and local labor regulations and local agreements. Company officials pointed out, in connection with the move, that "low prices and good working conditions can and do go hand in hand," and cited A & P's annual report to stockholders. They said it "shows that our customers are currently enjoying the lowest retail prices in relation to our costs in the history of the grocery industry; that during 1940 our growers and shippers received 13 per cent more of the consumer's food dollar than in 1937; and that we were still able last year to give our employees actual wage increases and added compensation totaling more than \$4,000,000." Stores will continue to be open six days a week, and sales will remain the same as before the six-day week.

THINGS TO WATCH FOR—Cooling idea for ladies' watches is to surround them in a small cube of transparent plastic, so that they look as though they were frozen in the middle of an ice cube. . . . If you're joining the Navy, watch for tapabums made of woven glass—said to be lighter in weight than canvas, and unaffected by sea water or salt air. . . . Carolina Aniline and Paints company has a new synthetic chrome paint to be mixed with any paint to prevent mildew on painted surfaces. . . . Jitterbugs needn't worry about any war shortage of imported bamboo reeds for saxophones and clarinets, for there's a new line of plastic reeds out, in five degrees of stiffness. . . . Possible bargain in regulation "girls' bicycles"—for the present styles call so insistently for wearing slacks or pants that bike dealers are worried that the models built to accommodate skirts may become a drag on the market. . . . Jitterbugs on auto dashboards to flash when the generator is not charging, or when oil pressure sinks to the danger point. . . . Sugar is the latest food to be impregnated with vitamins. . . . An orange-nut bread is latest to join the canned bread ranks.

Income of farmers, in 1914, will have more buying power than in 1929, say economic experts, but the question is, "Do the farmers know it?"

What has become of the man who expected his vegetable garden to produce the results pictured in a catalog that he studied a few months ago?

KEEP HIM THAT WAY!

As Others See It

Faderewski Fitting Burial

(Fortnam Star)

—It was gracious and fitting action taken by President Roosevelt in the order he issued for the temporary burial of the late Ignace Jan Faderewski in Arlington National Cemetery at Washington. Thus, just as at the peace table at Versailles, Faderewski, the former Polish Premier, found a champion for the recreation of partitioned Poland in former President Woodrow Wilson, in death he found one for himself and his country in President Roosevelt. Faderewski, the internationally known pianist, loved music but he loved Poland more. Many will remember that impressive overseas radio appeal "for my poor country and her people" made by Faderewski as Hitler bombed Warsaw and crushed the defenses of Poland with its population enslaved.

The old and young alike who knew of Faderewski and his life's attainments admired him as few internationalists are admired. As others have said, the warmth and generosity of his nature flowed not only into music but into every act of his life. It was his personality even more than his command of his instrument that drew to his vast popular following. It was a personality that gave itself lavishly to others; in music, in his sacrifices for Poland, in his hospitality, in gifts of money which more than once nearly impoverished him.

The last years of his life were spent in work for his own people and for others suffering because of the present war. During this period he took an interest in distributing funds to groups and to individuals who were in dire need. The tribute that came to him in many American testimonial concerts pleased him, but even more he was glad to know that his fame and the affection in which he was held made him helpful to others.

Syphilis and Defense

(New York Times)

In 1917 young men drafted for military service were examined only superficially for clinical evidence of venereal diseases. Today chemical blood and bacteriological tests are made, with the result that the afflicted are far more surely detected. Because of this thoroughness it might be expected that more cases of syphilis and gonorrhea would be brought to light in 1941 than were revealed in 1917. Yet Surgeon General Parran assures us that among 63,000 drafted men only one-seventh as many cases of syphilis and only one-third as many of gonorrhea were found as in 1917. Some progress has evidently been made in curbing one of the major menaces to the nation's health.

Where these 63,000 men came from we do not know. If they represent a fair sample of the nation's manhood, Surgeon Parran's comparison is encouraging. Until very recently it was assumed on the basis of investigations conducted in specific areas that there are about 6,000,000 syphilitics in the country. The American Social Hygiene Association reduces this figure to 4,500,000 on the basis of national sampling. All of which proves the importance of the correct statistical method.

How the venereal diseases are to be controlled in the general population is a problem that the

Psychology In War

(New York Times)

We have been kept well posted on Germany's use of psychology to undermine the morale of the victimized. The method includes false alarms of attack followed by false overtures of peace; pan-

Dr. Knapp's "Ten Commandments of Agriculture"

Dr. Seaman A. Knapp, father of home demonstration work, was a great Bible student—had, in fact, been alternately agricultural teacher, county preacher, and farmer in early life—and early in his farm demonstration work he put into practice a lesson learned from the Old Testament. It was a lesson in definiteness. In substance he said: "A multitude of counselors may make for confusion. Out of all the talk about what we need to do, why can't we reduce to its lowest terms just what are the essentials for successful farming in the South? Just as the Lord found it well to summarize all of Leviticus and Deuteronomy in ten short sentences, why can't we develop for the struggling small farmer ten

commandments for agriculture? Following are Dr. Knapp's famous "Ten Commandments of Agriculture," very slightly condensed and rearranged with appropriate headings:

1. Live at Home.—Produce all the food and feed required for the men and animals on the farm.
2. More livestock.—Increase the livestock... utilizing all the waste products and idle lands on the farm.
3. More power.—Accomplish more work in a day by using more horsepower and better implements.
4. Practice rotation.—Carry out a systematic crop rotation with a winter cover crop.
5. Richer lands.—By securing high content of humus in the use of legumes, barnyard manure, farm refuse, and commercial fertilizers.
6. Purebred seed.—Use seed of the best variety, intelligently selected and carefully stored.
7. Deep breaking.—Prepare a deep and thoroughly pulverized seedbed, well drained; break in fall to a depth of 8, 10, or 12 inches, reached gradually.
8. Proper spacing.—Give rows and plants spacing suited to plant, soil, and climate.
9. Good cultivation.—Use intensive tillage during the growing period of the crops.
10. Keep records.—Keep an account of each farm product, in order to know from which gain or loss arises.—The Progressive Farmer.

It is refreshing to meet an "old maid" who possesses good humor and enjoys the follies of the human race.

The trouble with many American homes is that they have no head of the house and no wife of the house.

Pettengill

(Continued From Page One)

map of the world. On a world map compare the English Channel, which has not yet been crossed, with the Atlantic and Pacific. Compare Germany with Texas. And measure distances. From Berlin to Dakar is 2700 miles; then hop to Pernambuco, 300 miles south of the equator, another 1800 miles; then as the crow flies, to New York, 400 miles. Drop your bombs and hurry back to Pernambuco 4000 miles, all told 12,500 miles.

Even a saber-rattling Fuehrer can't fly 12,500 miles, heavily loaded with death, without gasoline. Where are his gasoline stations? There is no petroleum in Dakar, on the edge of the Sahara Desert. Scarcely a quart within 2000 miles.

There is none in Pernambuco, and practically none in all Brazil. But Hitler would have to build immense storage tanks, refineries, machine shops, air fields, barracks, hospitals, wherever his bombers stop. After he gets to Pernambuco he must then go another 2000 miles to Venezuela and Trinidad for petroleum, and haul it back, a round trip of 4000 miles, just to have a base to refuel after flying the South Atlantic.

There is no pipe line from Venezuela to Pernambuco. So our war lord would need to move his petrol in ships. His ships would have to come within a few miles of our air and naval bases in the Caribbean. But, of course, that will be easy for Hitler because we will all be shivering under the bed-clothes, not daring to find out what he is up to!

But perhaps Hitler will equip his bombers with coal burning engines, with tenders flying behind, like ornaments on a boy's kite. Where will he get his coal? Again, no coal in the Sahara Desert, and none in Pernambuco. Brazil imports enormous quantities of coal from Great Britain, a round trip of 8000 miles! Her total production of a very inferior coal is only 883,000 tons annually. In 1935 she produced 345,000,000 tons of soft coal and 46,000,000 tons of anthracite. Total, 391,000,000 tons, or 443 times as much as Brazil!

But going back to petroleum,

the United States alone produces 1,213,000,000 barrels a year. This is more than twice as much as the rest of the entire world! 61 per cent of world total right here at home, with Venezuela, Trinidad, Mexico, etc., the Western Hemisphere produces 76 per cent of world total of the fuel and lubricants of war, or three times as much as all of Europe, Africa, Asia, Australia, and all points east.

Meantime, a Adolf gets farther from his base, he gets closer to ours. Anyone who played football knows that the going gets tough the nearer you get to the other fellow's goal line. And now that we have gone into the renting business, why not ourselves rent Pernambuco or some other powerful sea and air base near by? Uncle Sam, tenant, to have and to hold! That might save us billions in armaments. And fix it so we wouldn't have the jittery every time war breaks out in Europe.

Americans, we have our choice. We can allow ourselves to be scared into another quixotic crusade to "destroy every arbitrary power anywhere". We can push up more poppies in France. Or we can keep our powder dry and defend the homeland of ours against the world.

Who is this guy Hitler anyway? In his own ring he is a tough little welter weight. But we are the heavy weight champion of the world. And don't let anyone tell you different. Yes, we're fat, and our timing has been bad. But we are the Champ. And the old one-two is getting ready to click. Any time der Furious gets into our back yard we'll lick him with one hand. And that goes for Benito Carnera and all them foreign champs!

The child who attempts to reform father and mother ought to be between the shafts pulling the family cart.

It is rather marvelous, the way the average man can scent a call for money for a worthy cause and be absent.

Brazil, whose orange crop starts when America's ends, is trying to make a deal with America whereby she can trade oranges for apples.

Fishery Commission Weekly News Letter

Optimistic Outlook For

Seafish Industry

Seafish marketers, fishermen, and fisheries experts, are reported to be expecting much heavier demands to be made upon the seafish industry during 1941 and 1942 as a source of food supplies.

One reason for the expected greater demand lies in the fact that the British Government is contracting for huge quantities of various kinds of fish and is reported to be encouraging the purchasing of available stocks of river herring in the Chesapeake Bay area.

By late May, one authority pointed out, about \$100,000,000 worth of food had gone to Britain, paid for out of lease-lend funds. This would seem to indicate, it was said, that the rapidly growing army of the United States might have to fall back on fresh fishery products, "principally produced".

Noting at the same time that a similar trend is apparent in agricultural commodities, it is expected that there "will be no surplus of canned goods", and fresh fishery products, including oysters, will be in great demand. Meanwhile, from Chicago, the Nation's largest inland seafood wholesale center, come reports that seafood—traditionally America's Friday menu—is gradually becoming part of the daily fare.

According to government market experts, the growing taste for fish is due to a nation-wide promotion program by the seafood industry, improved cold storage transportation facilities and increased prices of some competing meats.

The report went on to show that during 1940 the Chicago market received 59,433,000 pounds of fresh-water, salt-water and shell fish. This was said to be an increase of 23 percent over receipts in 1939. By the middle of the year receipts had totalled 3,000,000 to 4,000,000 pounds more than last, indicating that a record high would be reached.

Despite the growing demand, prices of most types of fish have remained the same for the last three years. One exception was noted in halibut, which is about two to three cents higher than a year ago.

A study of receipts showed a demand for 101 classifications, including 38 fresh-water, 44 salt-water, and 19 shell fish and miscellaneous items, coming from 34 states, Alaska and Canadian Provinces.

Dr. R. V. Truitt, Director of Chesapeake Biological Laboratory, reports that research work is being continued in the lower Bay areas by the personnel of that laboratory under the leadership of Dr. P. Churchill, Prof. of Zoology, University of So. Dakota, formerly of U. S. Bureau of Fisheries. Dr. Churchill is well-known in Virginia for his crab research work of some years ago. Associated with Dr. Churchill at Lynnhaven, Va., where a temporary laboratory has again been set up, are Dr. E. K. Goelner, University of Michigan, and Capt. Holbrook of Chesapeake Bio. Lab.

The work in progress consists of practical, as well as pure science studies. Among the items of practical nature are:

1. The determination of the number of times the crab spawns.
2. A survey of the fishing intensity of the crab.
3. The distribution and bedding-down of crabs, and relationship of same to capture and brook-stock escape.

In the pure science, the detail studies of the earliest, or larvae, stages are being furthered with the hope of filling out knowledge of the entire life-history of the crustacean animal. These early stages have very little known about them.

In the upper Bay area, the Chesapeake Biological Laboratory is further checking the death rate on floats in the soft crab industry. Additional tagging work has been done to gain further knowledge on the subject of distribution.

The three workers in the lower Bay are to spend three months surveying the situation; after which the winter habits of the crab will be followed by one member of the personnel.

Deviled Crabs

- 1 qt. crab meat
- 1 stalk celery (cut fine)
- 2 eggs, unbeaten
- 1/2 cup fresh parsley (cut fine)
- 2 tablespoons Worcestershire sauce
- 2 " mixed mustard
- 1/2 teaspoon salt
- Cayenne pepper to taste
- 2 cups cracker dust
- Mix well the first four ingredients.

Mix in a separate bowl all other (Continued on Page Five)

MAYBE he is your son—who smiled so cheerfully when he boarded the troop train. Or maybe he is that serious young fellow who worked next to you. Or that happy-go-lucky boy of your neighbor's.

Whoever he is, he's an American and he is proud to do his bit for Uncle Sam. He won't let us down!

And we won't let him down either!

We're going to do our part to provide him with the food and clothing and things he needs to keep healthy and strong and comfortable. We're going to do our part to provide him with the planes, ships, guns, tanks, and all the other implements of modern warfare he needs to protect himself and to defend America.

Remember this—only the railroads can transport the huge quantities of food and

materials and supplies and equipment he will need. Only the railroads handle that job and, at the same time, take care of the other mass transportation needs of the nation.

The speed and vastness of the defense program and the need for adequate, efficient railroad transportation constitutes a challenge to every railroader. But so far we have met that challenge. And we will continue to meet it in the future!

We have the manpower. We have the skill and the ingenuity to do the transportation job that only the railroads can do. Above all, we have a tradition of service to the nation that is the proud heritage of every railroader.

Neither the railroads nor the nation's loyal army of railroaders will let America down!

Mrs. James M. Jordan, Jr., Local Reporter
PARTIES : ANNOUNCEMENTS : PERSONALS
Phone or Bring Them to the News Office

Miss Mattie Sprinkel of Roanoke, is spending some time with her sister, Mrs. John Potter in Oceana.

Miss Frances Rudolph and Miss Betty Pace Hatch have gone to Camp Robert Hunt for three weeks.

Mr. and Mrs. D. H. Shadrach have returned to their home in Columbus, Ohio, after spending three weeks with Mrs. Shadrach's mother, Mrs. G. J. Potter in Oceana. During their visit Mrs. Potter entertained with a family dinner at the Normandie Restaurant at Virginia Beach. Mr. and Mrs. John Potter and Mr. and Mrs. Dean Potter entertained at a steak roast in Seashore State Park.

Mr. and Mrs. J. Raymond Pritchard have returned to their home on Cavalier Drive after spending two weeks in the mountains of Virginia.

Mrs. Paul Gillon of Aberdeen, Md., is spending some time at the Paria House on 16th Street. Her son, Paul Gillon, Jr., is visiting his aunt, Miss Henrietta Garrett at her home on 17th Street.

T. Ferebee of Norfolk will be the weekend guest of Dawson Taylor at his home in Linkhorn Park.

Miss Frances Booker will leave today for Wilmington, N. C., where she will spend the weekend with L. and Mrs. Dudley Thompson.

Miss Mary B. Lankford left Monday for Alexandria where she has accepted a position.

Dr. and Mrs. Rollo Pusey and family of Richmond have arrived to occupy the Douthat cottage on 108th Street.

Howard Smedley of Philadelphia will spend the weekend with James M. Jordan, 3rd, at his home on 51st Street.

Mr. and Mrs. I. G. West are spending the summer at the Spotswood Arms.

Miss Ann Dickson has returned to her home in Sea Pines after visiting Miss Dana Davis at Kitty Hawk, N. C.

Mrs. James E. Allen, Jr., and her daughter, Miss Ann Allen, who have been visiting Mrs. James E. Allen, Sr., in Linkhorn Park, will leave today for their home in Rockville Center, L. I.

Mrs. Frank Wilhelm and her two daughters who have been visiting Mrs. Wilhelm's mother, Mrs. Norman Bell on 35th Street, have returned to their home in Teaneck, N. J.

Mr. and Mrs. C. B. Robertson and their two daughters, Misses Jane and Dorothy Robertson of Richmond, have taken the Parks cottage on 116th Street for the month of August.

Mr. and Mrs. Granger Marburg and family who have been spending a month in the Sydnor cottage on 54th Street, will return today to their home in Baltimore.

Mrs. Walter H. Bosserman, Jr., and two children, of Winchester, are visiting Mrs. Bosserman's father, G. William Truitt and Mrs. Truitt at their home here.

John Tyler Murray, who has been visiting Mr. and Mrs. Frank V. Atkinson at their home on Avenue E, has returned to his home in Louisville, Ky.

Mrs. W. N. Pretlow and her daughters, Miss Evelyn and Miss Betty Pretlow, of Forest Hills, Long Island, N. Y., are the guests of Mr. and Mrs. W. H. Sterling, Jr., at their home at the Princess Anne Hotel.

Mrs. Mary Waddill Furnival has returned to her cottage on 40th

Street after a visit with Mrs. Arthur Cannon and Mr. Cannon at their home in Richmond.

Mr. and Mrs. Emory Wales, of Richmond, have arrived with their daughter, Miss Betty Wales, to spend some time at the Vaughan cottage, in Cavalier Shores. Miss Wales will make her debut this season in Richmond.

Harley Ferguson Shuford left Sunday for his home in Hickory, N. C., after spending a week with Mrs. Shuford and family, who are visiting Mrs. Shuford's parents, Mr. and Mrs. Abner S. Pope, at their cottage on 112th Street. Mrs. Shuford and children will spend the remainder of the summer with Mr. and Mrs. Pope.

Mrs. Louis Fisher of Washington, D. C., formerly of Virginia Beach, is the guest of Mr. and Mrs. Cecil Mears at their home in Birdneck Point.

Dr. William V. Barber and their son, William V. Barber, Jr., have returned to their home in Birdneck Point after an extended motor trip through New Mexico, California and Canada.

Brothers-Martell
Mr. and Mrs. Stephen C. Brothers announce the engagement of their daughter, Miss Marian Stephanie Brothers, to Sgt. William C. L. Martell of Fort Story, son of Mrs. Isabella Martell, and the late John C. Martell, of San Pedro, California.

The wedding will take place at 6 o'clock, Friday, August 22 at the First Presbyterian Church, Virginia Beach.

Foskett-McCloud
Mrs. George Foskett, of London Bridge, announces the engagement of her daughter, Miss Catherine Lauder Foskett, to Carlyle Turner McCloud, son of the late Mr. and Mrs. John A. McCloud. The wedding will take place the early part of this month.

Ashburn-Tolley
Mr. and Mrs. William Howard Ashburn announce the engagement of their daughter, Miss Milnor Keeling Ashburn, to Lieut. Robert Fairley Tolley, U. S. Army, of Fort Monroe, son of O. F. Tolley, of Colorado Springs, and the late Mrs. Tolley. The wedding will take place in September. Miss Ashburn is a graduate of Turnbull School and Randolph-Macon Woman's College, where she was a member of the Delta Delta Delta fraternity. Lieutenant Tolley is a graduate of Colorado Springs College, and is a member of Phi Delta Theta fraternity.

Receiving Congratulations
Mr. and Mrs. John Paul Jackson are receiving congratulations on the birth of a daughter, Thursday, July 24 in Dallas, Texas. Mrs. Jackson is the former Miss Helena Everett.

Fishery Commission Weekly News Letter

(Continued from page 4)
Ingredients, except cracker dust. Combine these two mixtures. Add cracker dust, saving some to dust on top of shells when filled. Dot with butter and bake in hot oven. Or fry in deep fat without adding cracker dust and butter. Serves 8.
Cocktail Sauce
1/2 cup catsup
3 tablespoon lemon juice
10 or 12 drops Tabasco
1/4 teaspoon salt or 1/2 teaspoon celery salt
2 teaspoon Worcestershire Sauce
Horse radish to taste
Mix and keep in a closed container.
Tartare Sauce
1/2 cup mayonnaise
1 tablespoon minced pickles
1 tablespoon minced olives
1 tablespoon minced parsley
1 teaspoon minced onion
Mix and keep in a closed container.

SKIN AND HAIR

That school girl complexion, those golden glints in your hair—did you know that the food you ate today, yesterday, the day before and so on, may have been the thing that gave you these points of beauty? The right kind and amount of food not only make a person feel better but they make one look better, too.

Good food is one insurance of good health, and hand in hand with good health goes a smooth, soft, clear complexion and shining hair that is springy to the touch and full of life. And what is more important to your attractiveness, your enjoyment of life, and your ability to do the jobs that need to be done?

Some people have skin and hair that is so oily it is even disagreeable to look at. Often these are the people who a long time have been eating too much of those rich and concentrated foods that contain great amounts of fat and sweets; and they are the same ones who have been prone to turn aside from fresh fruits and green leafy vegetables. This oiliness may be responsible for the blackheads, pimples and dandruff that are such a burden to your vanity. You see, that bar of candy you ate today, the fried food you have been eating all week, and the lettuce and carrots you didn't eat, may all be contributory causes to many evils.

On the other hand some people complain of skin that is so dry it is scaly, and of hair so dry that it is brittle and splits at the ends. These folks too need more of certain vitamins, especially those found in fats, such as butter and cod liver oil. They also need green, leafy and yellow vegetables.

Plenty of Water at the FAUCETS...

with a MYERS WATER SYSTEM

WHEN selecting a water system, remember that CAPACITY is just as important as RELIABILITY. The famous old MYERS trademark on a water system assures you of both. You may open one faucet at a time; or different members of the family may draw water simultaneously at several locations—in kitchen, bathroom and laundry—at outside hose taps—in barnyard and outbuildings. There will always be plenty of water at ALL faucets when you have a precision-built MYERS Water System of the size and type suited to your requirements. Quality is never sacrificed to price in the manufacture of MYERS products. The absolute dependability of MYERS Water Systems is proved daily in thousands of farm and suburban homes. Ask for interesting free booklet and demonstration.

Comments And Resumes On War

(Continued From Page One)

erican destroyer dropped depth charges over a German submarine. And American fighting ships are at sea now, warning the British whenever they come on a Nazi raider. The American Navy, in other words is pretty much in the war.

Furthermore, American aid, though many still feel that it is not great enough, is becoming a real factor in the conflict. Some of the great bombers which have been blasting at German-occupied areas on the Continent, are of American make. British dreams of air equality and eventual air superiority have not yet been realized, but they are coming closer to actuality. And at this time, with a large part of the German strength mobilized in the Eastern front, British power, relatively speaking, is undoubtedly greater by far than in the past.

The recent statement by a British general to the effect that American manpower will be eventually necessary to lick Hitler, caused much speculation in this country. The British position, as stated by Mr. Churchill, has always been that the Empire needed only materials of war, not men. Whether that position will be changed, remains to be seen. Right now, there would be small chance of Congress authorizing another A. E. F.

In U. S. military circles, it is felt that the Russians proved tougher than the Germans expected. In these same circles, it is also felt that Germany will probably defeat Russia's European armies in the long run.

Let the Children Teach You
MUCH of a child's success depends upon whether his teachers and parents show that they are pleased with his efforts. Says Miss Mary Simmons, a school teacher from Prince George County, Va. Scolding about mistakes will never develop a desire to do better, but encouragement about even the smallest progress will inspire a child to go forward.

An excellent way to develop a sense of pride in children is to let them teach you a few things occasionally. It may be that you didn't have an opportunity to go as far in school as your children, or you may just have become rusty on certain subjects. Try making a game of correct speech, for instance, with the children as leaders to catch mistakes and make corrections. They will love it, and the whole family will reap the benefit.

though at a fearful cost in Nazi troop and material.

However, European Russia is only one part of that vast country Asiatic Russia also has great armies and important industrial centers. The authorities are convinced that Hitler cannot stop until he has destroyed Russian military power in toto, and caused an overthrow of the Communist regime. Not until that is done can Hitler feel that he is safe from attack from the East.

That explains the belief in some quarters that Hitler may come to disaster in Russia. The size of Russia alone presents the invader with tremendously difficult problems, and Russian soldiers have always been fine defensive fighters. Stalin's "scorched earth" policy is said to be producing results.

We would not try to tell everybody where to worship God but we would tell them to worship Him somewhere.

Civilization, it appears, hasn't crashed yet; the usual crop of summer bathing beauties appear in news pictures.

When a man seeks public office, upon racial or religious prejudice, it is a sure sign that he isn't fit to hold any office.

Frank Hughes, Jr., of Lynnhaven, will continue as Supply preacher at the local Baptist Church, with regular preaching services Sunday morning and evening. Visitors of the Beach are cordially invited to attend the services.

Services will be held at 7 P. M. for the Young People's Club and regular evening services at 8 o'clock.

HEALTH NOTES

Hot Weather Care Of Babies

The lives of thousands of babies have been saved by intelligent parental care in hot weather. However, many more infant deaths could be avoided if parents would have a keen realization of the value of simple, common-sense precaution," states Dr. I. C. Ruggin, State Health Commissioner.

Records of the State Health Department's Bureau of Vital Statistics show that 281 babies died of diarrhea and dysentery during 1940; most of them succumbing during hot weather. In 1913, 1581 died of those diseases. Had the same rate prevailed in 1940 a in 1913 nearly five and a half times as many infants would have died from these causes. This record is a most gratifying one. Nevertheless the infant death rate from diarrhea is a most dysentery still is too high. Public health officials cannot solve the problem alone. Parental cooperation is the real key to its solution.

The following suggestions, if followed by parents of infants, would go far in further reducing deaths from diarrhea and dysentery:

1. Whenever possible, infants should be breast-fed for the first 6 or 8 months. When bottle milk is used it should be boiled or pasteurized.
2. Drinking water for the baby always should be boiled.
3. Personal cleanliness should be the rule for every member of the household. Those handling milk or food should be particularly careful.
4. Any member of the family or visitors showing symptoms of disease, no matter how slight, should be kept away from the baby. They should not be allowed to handle any of the food intended for him.
5. The house should be screened to protect not only the baby, but all household food, from flies.
6. Every home should be provided with a sanitary or fly-proof toilet or sewage disposal facilities.
7. Every home should have a safe water supply.

Civil Service Examinations

The Civil Service Commission announced today examinations for filling six grades of positions for Housing Management Supervisor. The salaries range from \$2,600 to \$6,500 a year and employment is in the Office of the Administrator, Defense Housing Division of the U. S. Housing Authority. A part of the required experience must have been in connection with housing projects or agencies, in real property management in a program of public welfare requiring a knowledge of housing conditions, or as a city or county manager. The other prescribed experience may have been in these fields of housing, or in law, engineering, architecture, public administration, accounting, or community work. Education may be substituted for some of this experience. Applications must be filed not later than August 14, 1941.

Another highly specialized examination announced by the Commission is for Project Auditor in the Quartermaster Corps, War Department. Salaries of the positions range from \$2,600 to \$5,600 a year. Applicants must have as a part of the prescribed experience responsible administrative experience.

proof toilet or sewage disposal facilities.

7. Every home should have a safe water supply.

"While most of the above suggestions are applicable at all seasons of the year, the following precautions are important in hot weather:

1. The baby should be kept as cool as possible; 2. He should be kept clean; 3. Clothing should be reduced to the simplest essentials; 4. He should be protected against insects; 5. He should not be overhandled; 6. He should be kept in the open as much as possible; 7. Water should be increased internally and externally; 8. He should not be overfed; and finally, if there are signs of illness, the family physician should be "consulted promptly."

trative work in the direction and supervision of technical employees engaged in accounting and auditing on a large construction project. For some of the positions the experience need not have been in construction work. Study in accounting may be substituted for part of the experience. Applications will be rated as received until further notice.

The Commission also announced examination for Assistant Inspector of Hulls and Assistant Inspector of Boilers, for employment in the Bureau of Marine Inspection and Navigation, Department of Commerce. The positions pay \$3,200 a year. Applicants must have had experience on vessels of United States registry in any one of the following classes of service: Seaboard Ports, Great Lakes Ports, or Central Western River Ports, or on vessels of the U. S. Navy or Coast Guard. For these examinations applications must be filed not later than September 4, 1941.

For appointment in Washington, D. C. only the Commission has announced examinations for senior and junior blueprint operator and senior and junior photostat operator. The senior positions pay \$1,440 and junior positions \$1,260 a year. Appropriate experience is necessary for these positions. Applications will be rated as received until June 30, 1942.

All applications must be sent to the Washington office of the Civil Service Commission not later than the closing dates specified. Full information as to the requirements for these examinations, and application forms, may be obtained from E. L. Shean, Secretary of the Board of U. S. Civil Service Examiners, at the post office in Va. Beach, or from the Secretary of the Board of U. S. Civil Service Examiners, at any first- or second-class post office.

The USO wants to raise \$10,000,000 for service work in connection with the boys in service at \$21 a month. Those of us who are getting more might contribute willingly.

As Others See It

(Continued from Page Two)
monogery by rumor and panic-creation of terroristic bombing. But we have had little information about the other and equally efficient phase of the Nazi application of psychology—the bolstering of morale on their own side. Arms alone, superior though they may be, do not explain the lightning success of the Nazi soldier. He has the will to win. By what conditioning was it instilled in him?

Considerable light on this question is now provided in a survey of German military psychological documents issued by the Committee for National Morale. Attached to the German High Command, we learn, is a psychological General Staff. Its experts prescribe uniforms that make privates feel like powerful warriors; they counsel officers on how to keep both the friendship and blind obedience of their men; they devise tests for promotion and specialization. Above all, the psychologist-counselors imbue the Nazi fighter with the idea of attack; the word "retreat" is deliberately left out of his manuals. Here, one infers, will be a vulnerable point in German morale when the war machine meets its first setback.

As in the case of the tank and the airplane, which German strategists borrowed from English and American inventors to turn into their chief striking weapons, the war psychology so effectively applied by the Nazis is not all of their own making. The findings of American, French and Russian laboratories offered the starting point to a distorted end. Some of the American psychologists to whom the German technical literature confesses indebtedness are now enlisted in the Committee for National Morale. Their purpose is to aid the Government, not in duplicating the leader-disciplined psychology of the Nazis, but in building a morale that will be better because of its sound American basis in individual liberty. That kind of morale was a telling factor in the Allied victory of 1918. In the long run it should be the telling factor once again.

About Iceland

Peninsula Enterprise
Few Americans had any interest in the island of Iceland until recently, when it became virtually an outpost of the United States. Its importance as a base for naval and airplane operations is very great in the present war, in spite of its high latitude. Iceland lies between Greenland and Scotland, just south of the Arctic Circle, and is 500 miles from northern Scotland. It has an area of nearly 40,000 square miles, but only about 7,000 square miles are habitable, and in 1939 the population was 118,808. Reykjavik, the capital, has a population of 37,368.

The climate is quite variable, but not as cold as its latitude would indicate, the mean temperature of Reykjavik being 53

in summer and 29 in winter, with an annual mean of 39 degrees. This may be compared with an annual mean of about 49 degrees in Chicago.

In 1939 the Germans sought permission to establish bases for an air service between Germany and Iceland, but at that time Prime Minister Jonasson said no foreign company would be granted any air concession. He at first protested against the establishment of a military base in Iceland by Britain, but later agreed, and it is estimated that about 60,000 British troops, with accompanying naval and air units, are on the island.

At the suggestion of Britain, Premier Jonasson recently invited the United States to replace a portion of the British, and upon this invitation President Roosevelt ordered American military forces to Iceland. It is agreed that there will be no interference with the island's government, and that the Americans will be withdrawn at the end of the war.

South American Blacklisting

(Richmond Times-Dispatch)

Our economic strategy will be all-important in the winning of the war, and an important new phase of this was instituted when the President issued a proclamation blacklisting 1,800 Latin-American firms and persons with Axis connections. The committee for the co-ordination of commercial and cultural relations between the Americas, which is headed by Nelson A. Rockefeller, has been patiently compiling a list of firms in South America with German and Italian affiliations.

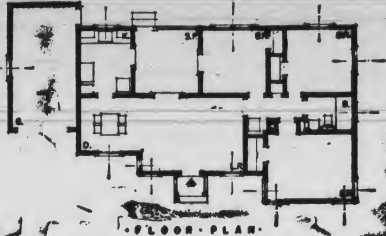

It seems that we have exercised care in the completion of the list. We had the benefit of British information, it may be presumed, in addition to that compiled by our own agencies, and our policy of boycott can be carefully directed by our Commercial Intelligence Service, the Export Control Division of the State Department, and the Foreign Funds Division of the State Department, which has under its supervision Axis funds frozen in the United States as a result of the President's recent order.

Much money has transferred to South America in anticipation of the President's freezing order, and is being used now to carry on Axis business. As a result of our new policy, soon to be inaugurated, we shall be able to discover some German and Italian money flourishing in its new habitat. When we deny raw materials to Axis firms, and put them on our blacklist, we deprive them of invaluable prestige. Both German and Italian entrepreneurs in Latin America have been trying to maintain the fiction of business-as-usual, and our blacklist may deprive them of front and face. Nevertheless, it is a policy which must be directed and

This Attractive House Containing 3 Bedrooms Financed With FHA-Insured Mortgage of \$2,700

A small house containing three bedrooms and a sleeping porch, which is valued with lot at only \$3,000, is rare, but when it also has an exterior as attractive as this Florida home it is likely to create considerable interest. The living room and dining room are combined, thus increasing the apparent spaciousness of both. A simple hallway gives access to all bedrooms and the bath. This property was financed with a mortgage of \$2,700 insured by the Federal Housing Administration. Monthly payments to repay a 25-year mortgage of this amount total approximately \$16, exclusive of local taxes and hazard insurance. The cost of a similar property will vary in other localities, especially where the climate requires a basement and more heating equipment.

watched with care. Some of the Axis firms have important Latin-American connections, as well as German and Italian strings. Some German firms have been doing business in the ABC countries of South America for long time, and their capital is interwoven, not only with the affairs of the financial and business personalities of these nations, but perhaps with those of some of the political personages, as well. This aspect of the blacklisting technique calls for a steady and careful hand.

Theatre Previews

At the Bayne
Both Joan Bennett and Franchot Tone, who come to this theatre in "She Knew All the Answers," today, August 1, for a showing of two days, make refreshingly different appearances, according to advance reports of the hectic new comedy. Miss Bennett, a night club star who goes to work

both literally and figuratively, on Wall Street. Tone is said to be equally enjoyable as a s'ff-necked, ultra-conservative Wall street broker.

Bob Hope, the man who always says a mirthful, is a buck private in the all-out comedy blitz on Uncle Sam's draftees. "Caught in the Draft," which comes to the Bayne Theatre on Sunday, August 3, for three days. Dorothy Lamour, co-starring with the popular screen and radio singer, emerges as a new figure in the fashion world.

Wednesday and Thursday, August 6 and 7, this theatre will present "Out of the Fog" co-starring Ida Lupino and John Garfield, the pair who made so great an impression earlier in the season as the star-crossed lovers of "The Sea Wolf."

At the Roland
The tense atmosphere of the

Orient with all its exotic adventure is thrillingly created in the film, "Passage From Hongkong," which makes its local debut at this theatre today, August 1, Keith Douglas, in the role of an author of mystery stories, and Lucille Fairbanks, as one of the thousand who seek passage from Hongkong because of impending trouble, are the leading characters in this unique mystery film.

Sunday and Monday, August 3 and 4, the Roland Theatre will present "He Slaved for Breakfast," an hilarious cinematic laugh at-pluck on communism. The picture stars Loretta Young, Melvyn Douglas, Alan Marshall and Eugene Pallette.

A double feature has been scheduled for showing here on Tuesday, Wednesday and Thursday, August 5, 6 and 7. "Rookies on Parade," is a timely comedy of

Proper Foods Protect Teeth

"There is probably no disease so general in occurrence today as dental decay," is a statement frequently made by Dr. J. B. Stone, of Richmond. Dental decay is found in about 90 percent of the school age children today. To help prevent it, the importance of milk, eggs, vegetables, fruit, and some extra source of vitamin D, such as cod liver oil or irradiated yeast, is being emphasized.

It has been very definitely proved that the number of cavities is smaller when there is plenty of sunshine and when plenty of milk, eggs, vegetables, and fruits are included in the diet. All of these foods and sunshine are our cheapest sources of vitamin D. The foods also contain other factors which are necessary for good teeth.

In an article by Bion R. East and Hilda Kaiser the statement is made that climate has an effect on dental caries. In general, people in the South have better teeth than people of the North, for we have more sunshine. But tooth decay is still all too common and the reason is found in an in-

LEGALS

VIRGINIA:

In the Clerk's Office of the Circuit Court of Princess Anne County on the 29th day of July, 1941.

MAYNARD ALFRED MOBLEY, Complainant,

VS.

GLADYS WALRATH MOBLEY, Defendant.

IN CHANCERY.

The object of the above styled suit is for the complainant to obtain from the defendant, a divorce A MENSA ET THORO, later, to be merged into a divorce A VINCULO MATRIMONII upon the grounds of desertion.

And affidavit having been made that the defendant Gladys Walrath Mobley is not a resident of the State of Virginia, it is ordered that she appear at the Clerk's Office of our said Court within ten days after due publication hereof and do all things necessary to protect her interest.

It is further ordered that this order of publication be published in the Virginia Beach News, a newspaper published in the County of Princess Anne, once a week for four successive weeks; that a copy of this order be posted at the front door of the Court House of our said Court on or before the next succeeding Rule Day, and a copy be mailed to the defendant at the Post Office address given in said affidavit.

adequate diet—too many sweets and carbohydrate foods and too few of the protective foods.

The child who eats a good diet including three to four cups of milk each day, one ounce of butter, two or more vegetables, meat or eggs, fruit, and one tablespoon of cod liver oil (at least up to the age 2) should have much better teeth than the child who lunches at school on a white bread sandwich, a candy bar and a soft drink.

The old slogan "a clean tooth never decays" seems to be incomplete in that unless we eat the proper food as well as keep the teeth clean and well exercised, cavities seem to "creep up" on us. Dr. Boyd S. Gardner of the Mayo foundation says "But what you want after you have eaten what you should."

FATING TOO MUCH TO EAT

A leading farm journal recently printed some very interesting and very significant figures. It made the statement—and backed it by evidence—that out of every dollar farmers spend for consumer goods, 41 cents is spent for food.

Consumer goods of course means things that are used up—food, clothing, drugs, toilet preparations, household supplies and the like.

We all look upon the farm as the place where food is raised. Of course we do not expect any single farm to produce every kind of food its people might like to eat, but it does seem that a well-run family farm should be able to feed its operator and his family on a well-rounded diet, without the need of buying 41 per cent of its food in the market.

Perhaps this figure points to a bad habit that too many American farmers have acquired—the habit of growing only a single crop, or a few crops, and depending upon others for the diversification that means healthy living and profits.

These one-crop farmers are always at the mercy of the market for their specialty. They are very likely to be in the position of selling their own crop at a low price, and being compelled to buy what they need at a high price. At the very time they are asking for economic changes that will bring them more cash, they are actually wasting some of the cash they have, by spending it for food they could raise.

Yet there is hardly a farm on which a good-sized kitchen garden could not be planted, and hardly a farm on which there is not enough time wasted to take care of that garden. And with modern farm machinery to do most of the work, spare time for gardening is still more available.

A thrifty farmer can raise on his own place just about everything needed to provide a healthful and adequate year-round diet except sugar, salt, coffee, tea and perhaps fresh fruits during the winter.

And a thrifty farmer's wife can preserve enough fruits and vegetables to last a family through a long winter.

In the old days, before so many new-fangled ideas became popular, we who lived in towns used to look upon a farm dinner as just about tops in plenty of good things to eat. They didn't buy many of the good things they gave us. They raised their own fruits and vegetables, and they killed and cured their own meats. They were actually prodigal with fried chicken and luscious country ham and sausage. They baked their own bread and pies, and what pies they were!

We've lost a good deal since the arrival of the can opener and the cellophane-wrapped package. The stores sell us fine foods, clean, well-selected and well-preserved. But they cost money, because to buy them we have to pay a good many profits and expense items that are not in the picture when equally good things to eat can be produced right where they are eaten—on the family farm.

If you are one of the farmers who think a garden is too much work, why not get together with a few neighbors, and each raise enough of a few fruits and vegetables for the group.

Then let other members of the group raise a different selection, and share with you and with each other these money-saving garden crops.

Sounds like a very simple idea, but it's a very practical one that too many farmers have been overlooking as a means of conserving the cash that is sometimes so hard to accumulate.

Comments And Resumes on War

The government's present tax policy has two distinct phases. First and most obvious phase is the necessity of raising more revenue. Second phase is to reduce consumer purchasing power, as one means of fighting inflation. War priorities will result in a considerable reduction in the amount of goods available for consumers. War spending, on the other hand, will result in a great increase in payrolls and income. That situation, unless corrected, must almost inevitably result in price inflation. And one means of correcting it is heavy taxation, purposes. But a good many few authorities oppose these authorities are extremely dubious of the wisdom and justice of the new tax bill as tentatively approved by the House of Representatives committee. Their opposition is based on varied grounds.

The new tax bill places its heaviest burdens on the middle-income groups—present rates of taxation on big-income groups make it impossible to substantially increase revenue from them. Persons and families earning from \$4,000 to \$12,000 per year will be forced to pay the bulk of the increases in taxes. Writing in the New Times, Godfrey N. Nelson says that, if the proposed bill passes in its current form, less than 4 per cent of the population will have to make returns, and nearly one-half of these will not be required to pay a tax because of their exemption credits. In other words, the tax does not reach down into the smaller bracket incomes. Mr. Nelson, like other economists, suggests that it is advisable to reach these lower incomes either by reducing amounts of exemptions, or by levying a flat tax, payable at the source, on all incomes. "It seems reasonable to assume," he says, "that if the national debt is ever to be paid, all earnings should be made to contribute to the liquidation."

Furthermore, it is clear that the middle-income groups—which are composed largely of salaried people—will share the least in war spending. Wages for workers are going up far faster than salaries for white-collar help. On these grounds alone, the new bill seems definitely inequitable.

Some are convinced that the burden the new bill will place on industry is dangerously high. No one wants "war profiteering." But it is clearly necessary for industry to earn sufficient profits for expansion and to attract new capital. If it is to continue as a healthy, progressive factor in our national life. For this reason the soundness of the excess profits tax provisions of the bill is gravely doubted in many quarters.

Still another provision of the bill is now coming in for severe criticism. That is the provision which would force husbands and wives to lump their income in one return, even though each earned separate incomes which were in no way connected. Government experts estimate that provision would provide some \$340,000,000 of additional revenue. Commenting on this, P. L. Lipman, outstanding Western banker, said: "Such an important amount as \$340,000,000 must not be superficially dealt with, but one would scarcely argue that the size of the amount determines the justice or propriety of the tax."

Bishop William T. Manning assailed the provision on other grounds when he said: "If Congress retains this provision those who have been divorced—or who live in immoral sexual relationship—will be called on to pay far less to the government than the married couples." And David Lawrence points out that "the Supreme Court has even gone so far as to hold that, even where a husband and wife receive a joint income from a single source, they have the legal right to file separate returns for tax purposes."

Still another general criticism of government fiscal policy is that almost nothing has as yet been done to reduce non-defense Federal spending. Various authorities, including Treasury experts, have estimated that \$1,000,000,000 to \$2,000,000,000 could be saved by pruning unnecessary and avoidable items from the budget.

Summing up, the feeling is almost universal that all of us, without exception, must pay greatly increased taxes, and make all necessary sacrifices for defense. But many economists regard the new tax bill as a helter-skelter affair, unsound, and in some

Cavalier Beach Club To Give Benefit Dance For Beach Infant Sanitarium

Council Arranges Purchase of Site For Recreation Hall

Two Blocks At 31st Street To Be Bought From Norfolk Southern.

P. W. A. Engineers Approve Plan For Expenditure of \$77,000 For Building and Improvements.

FWA engineers have approved a \$77,000 allocation for a service men's recreation hall at Virginia Beach and negotiations are going forward for the purchase of a site, two blocks between Thirty-first street (Laskin road) and Thirty-third street, immediately west of Pacific avenue.

The negotiations were brought before the Virginia Beach Town Council last night by Hugh Lynn Cayce, secretary of the Virginia Beach defense service committee. The Norfolk Southern Railroad Corporation, owner of the site, has agreed to sell the property, 660 feet along Pacific avenue and 364 feet wide.

The Norfolk Southern based its offer on an estimate of the property made by a committee of the Norfolk Real Estate Board. The council voted to obtain an estimate of the property's value from Virginia Beach real estate men and to accept the offer if the two estimates agree and to make a counter-proposal if the Virginia Beach estimate were lower.

The council approved arrangement whereby the town would pay for the property by foregoing the annual tax payments by the railroad for about seven years, that being considered to equal the purchase price plus 3 per cent interest. Mayor W. W. Elliott said that recent improvements at the beach would entail an increase in tax revenues sufficient to offset the loss of the annual railroad tax payment for the seven-year period.

The recommendation of the WPA engineers does not mean final approval of the recreation building. However, the need for such facilities for the men from Pendleton and Fort Story is thought to be so great as to make final approval almost certain. The funds are to come from the Lanham Community Facilities Bill for towns in defense areas.

The \$77,000 would provide a permanent equipped building. The site is more than five acres large and will include a public playground and park. Council members expressed a unanimous opinion that the purchase would be a wise investment even should the final approval of the recreation building fail to come through. Mrs. H. O. Brown called attention to the appalling condition of streets of Virginia Beach and garbage collection condition.

"Frankly, Virginia Beach is the dirtiest, filthiest place I ever saw and I am ashamed of it," Mrs. (Continued on Page Eight)

Annual Event Expected To Be Gala Affair

Many Floor Show Attractions To Be Offered.

Dance One Of Two Appeals Made To Public For Support.

The management of the Cavalier Hotel has donated the facilities of the Cavalier Beach Club for a dance, to be given for the benefit of the Infant Sanitarium, on Monday night, August 11.

Mrs. Seiden Grandy, chairman of entertainment, has arranged an attractive floor show featuring Carlos and Frances Gomez, nationally famous dance team; the Feller Singers, the Cavalier Singers, consisting of a popular quartet; and Private Mack Riddle, of Fort Story, who will present an arrangement of hill-billy and cowboy songs. Music will be furnished by Paul Pandaris and his orchestra, currently featured at the Cavalier Club.

Tickets for the dance may be obtained from Mrs. Roland Thorp, or may be purchased at the ticket office on the night of the dance. In the event of rain on Monday night, the dance will be held on the following evening, Tuesday, August 12.

Mrs. Burks Withers is chairman of arrangements for the dance, and among those who have been invited to serve as patronesses are:

Mrs. W. R. Ashburn, Mrs. Herman Allin, Mrs. Paul Ackiss, Mrs. C. M. Adamson, Mrs. Hock Adams, Mrs. John Ackiss, Mrs. J. E. Addenbrook, Mrs. Brose Armistead, Mrs. T. Lea Brooks, Mrs. R. G. Barr, Mrs. Charles Barco, Mrs. George Barner, Mrs. Robert Baillo, Mrs. W. W. Elliott, Mrs. Wade Kneary, Mrs. Russell Hatchett, Mrs. Frank Booker, Mrs. Wm H. Davis, Mrs. Arthur Campbell, Miss Josephine Clark, Mrs. Clyde Davis, Mrs. W. P. Crockett, Mrs. F. W. Cox, Mrs. Burton Craig, Mrs. Randolph Cabell, Mrs. Hardy Cole, Mrs. W. P. Dickson, Mrs. W. A. Cox, Jr., Mrs. Joseph Clover, Mrs. George Darden, Mrs. John Cole, Mrs. P. Dodson, Mrs. Floyd Dornife, Mrs. J. Wilcox Dunn, Mrs. Richard Everett, Mrs. Carl Forsberg, Misses De Witt, Mrs. Charley Field, Mrs. Mary Funt, Mrs. J. P. Grimes, Mrs. A. F. Small Arms Practice At Camp Pendleton

Most officers and non-commissioned officers of the 57th and 74th Coast Artillery regiments at Camp Pendleton held preliminary practice at the pistol range this week in preparation for qualifying rounds to be held later.

For many of the would-be marksmen, it was the first time they have had an opportunity to try out their skill with side arms. The larger weapons have priority on the training program.

Harry B. Davis Regains Nomination Unopposed

Rotarians Hear Goodwill Envoy

Lew Brownie, who is combining a visit with relatives here with his duties as an official goodwill ambassador for Mexico addressed the Rotary Club of Virginia Beach last night at 7 o'clock in the blue room of the Pinewood Hotel. His subject was "How the Mexicans See Us Today."

County Goes For Organization Ticket 10 to 1.

Darden To Be First Governor From Norfolk in Over Century.

Nomination Tantalizing To Election In Virginia.

The Hon. Colgate W. Darden, Jr., former Congressman from the Second Congressional District, made an impressive victory for the Democratic nominee for the Governor of the Commonwealth of Virginia. His running mate, William M. Tuck likewise polled a large vote for the nomination of Lieutenant Governor. Mr. Darden ran almost five to one over his nearest contenders, Vivian L. Page also of Norfolk and four to one over the combined opponents which included Senator Page and Senator Hunsdon Cary, of Henrico County.

The Democratic nomination is virtually equivalent to election in Virginia so with this victory goes the distinction to Mr. Darden as being the first Governor from Norfolk or Tidewater in past century.

Mr. Darden was supposedly supported by the so-called Byrd organization but was given a large majority in the Second District which he has represented in the U. S. Congress for four terms. Princess Anne gave him a ten to one vote.

He was native of Southampton where he obtained his primary education. He attended the University of Va., where he pursued his academic course, which was followed by a successful course in law at Columbia University. To top this off he took post-graduate work at Oxford, England. Mr. Darden likewise has a military career having served with French Army prior to the entry of the United States into first World War. Subsequently he entered the Marine Corps as an aviation pilot with commission of a lieutenant. In this service he received severe injuries in line of duty.

If elected Governor, Mr. Darden, will be the youngest chief (Continued on Page Eight)

Tides and Sun

(Reported by U. S. Weather Bureau, Cape Henry)

Friday, Aug. 8—High water, 8:39 a. m.; 9:02 p. m.; low water, 2:35 a. m.; 2:50 p. m.; sun rises, 5:15 a. m.; sun sets 7:04 p. m.
Saturday, Aug. 9—High water, 9:24 a. m.; 9:44 p. m.; low water, 3:14 a. m.; 3:34 p. m.; sun rises, 5:16 a. m.; sun sets 7:05 p. m.
Sunday, Aug. 10—High water, 10:07 a. m.; 10:25 p. m.; low water, 3:53 a. m.; 4:17 p. m.; sun rises 5:16 a. m.; sun sets 7:02 p. m.
Monday, Aug. 11—High water, 10:48 a. m.; 11:06 p. m.; low water, 4:33 a. m.; 4:53 p. m.; sun rises 5:17 a. m.; sun sets 7:01 p. m.
Tuesday, Aug. 12—High water, 11:29 a. m.; 11:46 p. m.; low water, 5:14 a. m.; 5:49 p. m.; sun rises 5:18 a. m.; sun sets 7:00 p. m.
Wednesday, Aug. 13—High water, 12:12 p. m.; low water 5:58 a. m.; 6:40 p. m.; sun rises 5:19 a. m.; sun sets 6:59 p. m.
Thursday, Aug. 14—High water, 12:29 p. m.; 12:58 p. m.; low water, 6:46 a. m.; 7:35 p. m.; sun rises 5:20 a. m.; sun sets 6:57 p. m.

Note: Above tides are calculated for Virginia Beach. To correct for other points make the following additions to the hour given: Naval Operating Base, 3 minutes; Lynnhaven Inlet, 3 minutes; Cape Henry, 3 minutes.

There are many things for which men are willing to die, if they have to.

Gossip would hurt fewer people if there were more good people to disbelieve it.

Labor leaders, who call strikes for higher wages, seem to believe that "what helps business helps you."

From a local lady's scrapbook: "If you're stumbling over a hypocrite, you're going the same way he is."

SOUTHERN SWILDLINE

Squirrel Fishing
We made a trip over to Black Lake, Louisiana, recently and fished some of the most beautiful bass water we've ever seen. It rained too much for good fishing while we were there but Bob Simms, genial new owner of Smith's Camp near Campl, invited us back in the fall when he says fishing there is tops.

Bob told us about an experience he had one day "fishing for squirrel." The lake got up and flooded the lowlands in a section of the lake country known as "Hog Heaven." Bob and his negro guide were rowing through a sunken forest when he spotted a squirrel diving for a hollow. He had the negro climb this tree but the boy couldn't reach old bush-tail. Finally, Bob cast a fishing plug up to the boy and told him to hook it in the squirrel's tail and pull him out. This the negro did but the story didn't end there. That squirrel became very much alive, jumped out of the tree and into the water. Since Bob's line was still tied to the plug he had a live and highly insulted squirrel to reel in. "For awhile," Bob declared, "I didn't know who'd be the winner—me or the squirrel!"

Windy Fish
To escape from pursuing enemies, the swellfish or balloonfish pumps itself full of air and swells up into a little balloon. He wind blows them along on top of the water like balloons, safe from the mouths of underwater feeders.

Getting Thin
The young eel is ribbon-like and so transparent that print may be read through its body. Probably Takes Cod Liver Oil. The cod is one of the most prolific of fishes, a female 39 or 40 inches long producing about 3,000,000 eggs and one of 41 inches at least 4,000,000.

The Record Bass
The largest smallmouth black bass ever taken by hook and line was caught by Walter Harden of Connellville, Pennsylvania, at Oakland, Florida, February 9, 1932. Its weight was 14 lbs. This species of black bass, originally was not found east of the Allegheny Mountains, being native only to the Ohio and Lake Erie watersheds. On completion of the Baltimore and Ohio Railroad in 1853 some 30 of these fish were transported across the mountains from Wheeling Creek to the Potomac River. Some years later the Susquehanna and Delaware Rivers received stockings. Today, the smallmouth is found in many sections of the world, introduced through the efforts of the various conservation agencies.

White Bass Lure
The fishermen at Herrington Lake, Kentucky, were worried. There were thousands of white bass in the lake but they would not bite. Anglers tried every lure and trick known to the fishing fraternity but those bass just continued feeding on the schools of shad minnows. Finally some enterprising fisherman took a surface plug, removed the hooks, fastened a 12-inch gut leader to it and put an artificial fly on the leader. This lure was then connected to the fishing line and it immediately got results. It has been the one bait that has taken white bass in that lake. Better give it a try.

Better Homes
Better Living
by the Housing Editor

Building experts estimate that two-thirds of a house is wall space. Treatment of so great an area may make or mar the entire interior decorative scheme. Colorful home furnishings are more than equalled by today's varied wallpaper patterns, which cover a wide range of shades and designs.

The three elements to be considered in the selection of wallpaper are texture, color, and tone. All three have a direct bearing on the type of room to be produced and help determine whether it is to be formal or informal, light or dark, simple or pretentious.

Wallpaper offers an unlimited range of decorative possibilities. A vast selection of colors and patterns are available ranging from the formal hand-printed scenic

types to the small-figure papers surance premium vary. Remarkably improved wallpapers, washable wallpapers, and other developments now available are among the industry's contributions to modern livability and should not be overlooked in deciding on the wall finish.

There are no hard and fast rules for choosing paper, and interesting effects may be obtained through original uses. Color and tone in wallpaper may be used to excellent advantage to set the color scheme of the room, since several colors are obtainable in one paper. The draperies can match one shade, the upholstery another, small art objects another.

Keep Well in Hot Weather

Keeping well in summer depends more upon the habits and surroundings of the individual than upon the weather. Essentials are proper food, exercise, and rest, along with home sanitation. Less food is needed; meats, starchy foods, and sweets produce body heat and should be eaten in moderation. The diet should consist largely of vegetables and fruits, and plenty of water. All foods should be protected from flies and eaten while fresh.

Outdoor exercise is needed, especially by women and girls and indoor workers; walking is excellent. And there should be a daily bath to remove body wastes brought out in perspiration, and to keep the skin pores open and active. The bowels, too, should be kept open, but if a vegetable diet is eaten and enough exercise taken, no trouble should be experienced with the bowels.—Dr. B. E. Washburn, in The Progress

GUN NEWS

Reports are still circulating to the effect that you won't be able to buy a gun of any description if the war continues another year. With the thought that this probably was a "scare" we talked to a representative of a big arms company and he told us that this was very probable. Better hold on to those old pieces you have now, boys, and get any others you want as soon as possible or you might not get them at all. Even now some of the big companies are offering for sale only certain models of which they had a good stock when the war started. Savage still have their best shotgun and rifle models for sale as well as a new "modernized" hammerless single barrel shotgun. You can get a catalogue of the Savage line by writing Savage Arms Corporation, Dept. 5006, Utica, N. Y.

Don't let "dog days" make you BARK!

How to keep a Husband... Happy!

TEMPER going up with the temperature? Trifles seem tremendous? You don't like anybody... and have no qualms about acting that way?

And what's more, you've no idea of cooking dinner in that hot old kitchen?

Lady, if we were writing a book on how not to keep a husband happy... you could give us some pointers.

There are no hard and fast rules for choosing paper, and interesting effects may be obtained through original uses. Color and tone in wallpaper may be used to excellent advantage to set the color scheme of the room, since several colors are obtainable in one paper. The draperies can match one shade, the upholstery another, small art objects another.

In general, where the paper is figured, the draperies should be plain. Horizontal lines in the paper may be continued across a window by the use of striped material. Incidentally, this use of horizontal lines on the wall is a modern idea, conforming to the straight lines of modern furniture.

Intermediate size, it will help adjust small furniture to a large room. A scenic panorama on only one wall will give a room depth. A gay informal pattern with a rough texture will conceal an uneven wall. Drop ceilings, where the ceiling paper is brought down on the sidewall to molding or border, improve the

apparent proportions of a room which is too small. Taxes are unpleasant but they are not as burdensome as many assert and they are not as high as they will be. Taxes are what other people should pay to support our government.

LEGALS

VIRGINIA:
In the Clerk's Office of the Circuit Court of Princess Anne County on the 26th day of July, 1941.
MAYNARD ALFRED MOSLEY,
Complainant,
VS.
GLADYS WALRATH MOSLEY,
Defendant.

IN CHANCERY.
The object of the above styled suit is for the complainant to obtain from the defendant, a divorce *A MENSA ET THORO*, later to be merged into a divorce *A VINCULO MATRIMONII* upon the grounds of desertion.

And affidavit having been made that the defendant Gladys Walrath Mosley is not a resident of the State of Virginia, it is ordered that she appear at the Clerk's Office of our said Court within ten days after due publication hereof and do all things necessary to protect her interest.

It is further ordered that this order of publication be published in the Virginia Beach News, a newspaper published in the County of Princess Anne, once a week for four successive weeks; that a copy of this order be posted at the front door of the Court House of our said Court on or before the next succeeding Rule Day, and a copy be mailed to the defendant at the Post Office address given in said affidavit.

Two Cotton and Corn Change

The outstanding developments in plant production the last 10 years have been (1) the increased acre yield of corn due to hybrids and (2) the larger acre yield and improved quality of cotton resulting from the use of better varieties, better land, and all-round better farming practices.

Within the next 10 years probably 80 to 85 per cent of the corn acres in the Corn Belt will be planted to hybrid varieties. Already one-fourth of the nation's corn acreage is in hybrids, which have increased corn yields 15 to 20 per cent. In the South, hybrids are not expected to come into so extensive use due to the greater cost, lower yields, and the fact that corn is seldom a cash crop. However, by 1945 it is expected that hybrid corn will be adapted at least to the northern part of the Cotton Belt will be ready for extensive distribution.

One-variety cotton production is making great strides. In 1939 cotton produced by these areas accounted for 13 per cent crop; by 1940, at least half the cotton produced in the South should be from one-variety communities. Untenable cotton due to short staple should be a rarity except in the more arid sections, and the average yield of the Belt should be close to a half bale per acre—Eugene Butler in The Progressive Farmer.

NEWS OF INTEREST

KEEP BOTTLE OPEN

"Today the most common expression we hear is 'bottleneck,'" said M. J. Gormley of the Association of American Railroads, recently, "but the railroad 'bottle' has no 'neck.' It is open at both ends, providing for the free flow of transportation. A 'bottleneck' can only be created if we violate the main principle of transportation—that cars must not be loaded until it is known that they can be unloaded promptly at destination."

The so-called "railroad failure" in the last war was due almost 100 per cent to the widespread use of cars as warehouses. Storage and unloading facilities were completely inadequate. The result was that cars often stood for weeks and months, waiting for their cargoes to be discharged. Had those cars been unloaded promptly, there would have been no serious transportation problem in 1917 and 1918.

Today the railroads' plant is infinitely better than it was during the last war. For almost twenty years, the lines have been preparing and planning for precisely the sort of emergency that exists now. Their success is proved by the record. They have handled a steadily growing volume of defense orders. They have handled record-breaking crop movements. They have transported legions of soldiers and sailors, along with thousands of carloads of supplies for navy yards and army cantonnements. They have brought significant quantities of freight to Eastern ports to be loaded on ships for England. And they have done all that without the slightest delay, car shortage or congestion.

The railroads, in other words, are prepared. They will continue to handle the nation's traffic with unexampled efficiency, so long as cars are unloaded immediately on arrival and freed for service elsewhere. Every hour saved in discharging railroad cars gives impetus to the defense drive. The railroads will do their part, and they ask only that shippers cooperate with them. Railroad cars are not and cannot be warehouses. The railroad "bottle" must be kept open.

ENCOURAGE THE GOOSE

Along with the Federal government's drive to sell United States Savings Bonds, it would be in order for the government to encourage the public to invest part of its savings in private enterprise. The prosperity of this country is based on the private enterprise system. Our government should be interested in promoting a system that is the lifeblood of the nation and the source of all tax revenue that maintains government itself. It should take good care of the geese that lays the golden eggs.

While the government is demanding and receiving so much from industry during this national emergency, it should try to strengthen it in every possible manner.

But strange as it may seem, there are many industries in this nation that are today being handicapped by lack of government cooperation, or by planned government policies which restrict or compete with them. Electricity, oil, and coal are good examples; they are faced with the threat of socialization backed by the government itself.

Instead of such a destructive policy, government should help safeguard private enterprise which big and little investors own. Such investments make it possible for this nation to prosper and carry out its national defense program.

TYRANNY THREATENED AT HOME

Right now, wrote Frank R. Kent recently, there is a drive on "to utilize the national crisis to push the union frontiers forward to the point where a tight labor monopoly will be so firmly established that neither man nor woman can get on hold a job unless he/she is a member of the union . . . It, through closed shop, checkoff and complete unionization of all labor, the monopoly now sought to be acquired, the power of the labor leaders would be irresistible. They would become the real rulers of the nation, superior to the government itself . . . The people of this country would live under a tyranny as intolerable in many ways as any of those we denounce abroad."

Those are strong words, but late events have fully justified them. The lust of some labor leaders for more power is insatiable. It is these leaders who have made extortionate demands upon such industries as coal, the railroads, aircraft plants, etc. It is these leaders who have set their own ambitions ahead of the very safety of the nation. It is these leaders who have actually defied government. It is these leaders who are out to destroy the right of a man to earn his living whether he be a member of a union or not.

There are definite signs which indicate that the public has at last become aroused and alarmed. When any group attempts to "cash in" on the gravest crisis in our history, the American people will eventually rebel.

Honest and patriotic working men have a chance to clear the labor movement of the onus that has been cast on it by the actions of irresponsible, ruthless leaders. It is up to the rank and file within the union ranks to clean house. If labor fails to do that, it will simply court disaster. It will risk the loss of the many deserved gains it has made over the years. It will invite harsh legislation. A strike in a defense industry now is nothing more or less than deliberately planned sabotage.

FIGHT FIRE ON ALL FRONTS

On July 9, a nation-wide program seeking to strengthen national defense through wide adoption of a comprehensive municipal fire prevention ordinance, was launched. The suggested ordinance provides for the creation of a bureau of fire prevention in the local fire departments, and gives the bureau authority covering fire prevention in general; the storage and use of explosives and flammables; the installation and maintenance of private alarm systems and fire extinguishing equipment; the maintenance and regulation of buildings in which persons live, work or congregate, and the investigation of the cause, origin and circumstances of fires.

In announcing this new plan, W. E. Mallouet, general manager of the National Board of Fire Underwriters, said, "Many plants are running three shifts. Many of them are taking on work foreign to their former operations; new materials and processes are being introduced, and general business is being speeded up. Excess production, especially in agriculture, must be stored; cotton, which has a high hazard, is an outstanding example of the necessity of supervision of storage, which it is not now receiving. It is therefore of vital importance at this time to give adequate authority to fire departments."

And even in very small towns, which do not have fire departments, it should be possible to carry on similar inspection work. Every fire prevented today is of direct service to the defense effort; every destructive fire which occurs is the enemy of the defense effort. And this is a work in which all citizens can participate. Fight fire on all fronts.

MAINSPRING

"For the first time in years," writes William R. Kuhns, in Banking, "the butcher, baker, and candlestick maker, their sisters, cousins and aunts are beginning to discover what a fine assortment of useful and unsuspected items their bank has for sale."

Many of us used to think of banks as institutions which were only interested in "big money" operations, and which had little to offer the ordinary man. Today, the typical bank is actively seeking accounts of all sizes—and it offers as cordial a welcome to the legitimate borrower who needs a few hundreds as it does to the borrower who needs tens of thousands. It finances the purchase of automobiles and homes.

Fishery Commission Weekly News Letter

Rapid depletion in the crab supply in the Chesapeake Bay area, producing a situation which those familiar with the industry describe as "acute" is said to be causing headaches among bay crab catchers.

Both Maryland and Virginia crabbers say crabs are bringing the highest prices in years, but the catch to the proportion lies in the fact that there aren't many crabs.

Thus, the industry is faced with high prices and good demand at a time when the supply has ebbed to the point where crabbers, packers, the Maryland conservation Commission and the Virginia Commission of Fisheries have undertaken joint action to keep the situation from getting worse.

Jumbo soft crabs, according to reports, are bringing, on the Virginia side of the Bay, as high as \$2.75 a dozen. From Maryland comes the statement that soft crabs sold in the Crisfield market in June brought as high as \$1.80 per dozen.

Hard crabs, which are said to usually bring about one or one and one-half cents each are now selling as high as eight cents apiece.

The crabs are said to be all on the seaside—the eastern part of Accomac and Northampton County—and not on the Bay side. Several boys in the vicinity are said to be earning about \$15 weekly from selling the catch they make.

Maryland crabbers are looking for some alleviation on their part to the situation because of the migration of crabs from the waters of the Old Dominion to Maryland in July, August and September.

Members of the Virginia Commission of Fisheries, crabbers, packers and Members of the Maryland Conservation Commission, gathered recently at the Warwick Hotel for a joint effort to aid the crab industry, had the seriousness of the crab shortage pointed out to them when one of the speakers declared he "wouldn't be able to buy six dozen crabs in the Crisfield market at that time."

Six Arrested in Crab Sanctuary
Six persons, arrested and charged with taking sponge crabs in the restricted area off Ocean View, will be brought into court for trial at Princess Anne courthouse on the night of August 13, according to a statement made at the office of the Virginia Commission of Fisheries today.

The arrests were said to have been made by W. C. Allen, captain of the Commission's patrol boat "Will F. Kellam" which maintains a 24-hour watch over the region. The persons arrested are said to have been making their catch with a hand trot line fishing from small boats.

Present regulations governing the area which sets off a crab sanctuary from Nansemond Hotel to Thimble Shoals Lighthouse, Cape Charles Lighthouse, Cape Henry Lighthouse and thence back to the Nansemond Hotel, are the effect that the area remain closed for sponge crab fishing through August 31.

Agreement to set aside the area in the interest of crab conservation was reached by the Commission of Fisheries after its June meeting when representatives of the crab packing industry appeared before the Commission and appealed for some measure to be taken to save the crab supply which is reported to have ebbed to the lowest point in years.

It was suggested by George Bentley, representing the Hampton crab packers' Association, that a refund of this kind be set aside and the request was granted by the Fisheries body a short time later.

Canning Caution

When glass jars are used new rubbers of good quality should be provided. Place rubbers in position on jars which have been filled with the product and seal according to the following directions: On the screw top jar, screw the cap down evenly until it catches hold of the rubber ring. For the two-piece caps which consist of screw band and lid with sealing composition attached, place the lid on jar and turn screw band down firmly for any method of processing. With wire-clamp glass-top jars, raise the upper clamp in position to hold the lid in place, leaving the lower clamp loose. After processing, fasten tight all clamps and screw top or screw with rubbers. If the two-piece self-sealing type lid is used no rubber is needed.—The Progressive Farmer.

Cook's Council

macaroni in cream sauce with cheese.

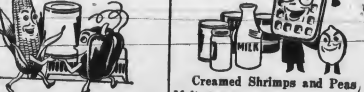

Prepare—
1 cup ground cooked ham.
Place a thin layer of the macaroni in a buttered casserole, and top with a layer of ham. Repeat the layers, using all the macaroni and ham.

Combine—
1/4 cup rice flakes
1 tablespoon butter, melted.
Sprinkle buttered rice flakes over macaroni. Bake in a moderate oven (375° F.) about 20 minutes, or until well heated through. An excellent way to use leftover ham. Serves 4.

Macaroni Corned Beef Casserole : Shred—
1 medium (12-oz.) can corned beef.
Add, mixing well—
2 tablespoons prepared brown mustard.

Open—
2 medium (17-oz.) cans cooked macaroni in cream sauce with cheese.
Line 1 large or 6 individual casseroles with the macaroni, leaving a depression in the center of each. Fill with the meat mixture and bake in a moderate oven (375° F.) 25 minutes. Serves 6.

Waffle Wisdom
Waffles are a favorite any time of the year, but it's clever to change the toppings you use on them to suit the season. For spring, creamed shrimps and peas are delicious. They are prepared with a smooth cream sauce base, with mayonnaise added for fluffiness and refreshing flavor.

Melt—
4 tablespoons butter.
Add—
4 tablespoons flour.
Blend well and cook until bubbling.

Add—
2 cups milk.
Cook, stirring constantly until thickened.
Add, blending thoroughly—
1/2 teaspoon salt
Pepper
Dash cayenne
2 tablespoons lemon juice
1/4 cup mayonnaise.

Add—
2 cups canned or fresh cooked shrimps
1 cup cooked peas, drained.
Heat well and serve over crisp waffles. Serves 6.

Macaroni and Corn Casserole
Open—
1 medium (17-oz.) can cooked macaroni in cream sauce with cheese.

Arrange half of it in a shallow baking dish, then sprinkle with—
1/2 cup whole kernel corn
1/2 red pimiento, chopped.

Season with—
Salt and pepper.
Repeat layers.
Combine—
2 tablespoons butter, melted
1/2 cup soft bread crumbs.
Sprinkle over top of macaroni mixture. Bake in a moderate oven (375° F.) 25 minutes. Serves 4.

Macaroni and Ham Casserole
Open—
1 medium (17-oz.) can cooked macaroni in cream sauce with cheese.

Arrange half of it in a shallow baking dish, then sprinkle with—
1/2 cup whole kernel corn
1/2 red pimiento, chopped.

Season with—
Salt and pepper.
Repeat layers.
Combine—
2 tablespoons butter, melted
1/2 cup soft bread crumbs.
Sprinkle over top of macaroni mixture. Bake in a moderate oven (375° F.) 25 minutes. Serves 4.

Pettengill

(Continued From Page One)
vult we wouldn't know anything. We would be where Moses was when the light went out—without even a firefly.

There is not a fact about foreign affairs that Mr. Roosevelt knows or does not know that would not be available instantly to anyone who might be President—Wendell Willkie, Norman Thomas, or Gentile Reader. A copy exists of every telegram or letter he or any other President ever sent to any foreign minister; a copy of every trade agreement, treaty, or convention, every report by every ambassador, consul, commercial attaché, or foreign secret service agent since this government was founded in 1789. All in black and white. Anyone who can read can know. There is no magic about it whatever.

The fact is, too, that Mr. Roosevelt only knows a small fraction as much about foreign affairs as his Secretary of State, Cordell Hull. Mr. Hull has given his undivided attention to foreign affairs, whereas Mr. Roosevelt has been occupied with nine other departments, and with Congress, politics, thousands of bills to sign, the Labor Board, R.F.C., S.E.C., I.C.C., T.V.A., F.T.C., A.A.F., John Lewis, Harry Bridges, the Library at Hyde Park, packing the Supreme Court and the Purge.

And Secretary Hull doesn't know a tenth part as much about branches of his department, as his various lieutenants. For he has given only eight years to being Secretary of State, and many of his assistants have given a lifetime.

George Messersmith, Assistant Secretary of State, has been in the department 26 years; Green Hackworth, legal adviser, 24 years; Cecil Gray, assistant to the Secretary, 17 years; James Dunn, adviser on political relations, 21 years; Stanley Hornbeck, another political adviser, 23 years; Frederick Liversay, adviser on International Economic Affairs, 22 years; Maxwell Hamilton, Division of Far Eastern Affairs, 11 years; Jay Moffett, Division of European Affairs, 23 years; Wallace Murray, Division of Near Eastern Affairs, 20 years and so on down the list.

These men know. If anyone does. They stay on as they should, year after year, as advisers to whoever is President of the United States—Wilson, Harding, Coolidge, Hoover, Roosevelt. Their knowledge is neither Democratic, New Deal nor Republican. It is at the instant disposal of any President.

Then there are the War and Navy Departments filled with

West Pointers or Annapolis and technical men from way back, loyal to any Chief of State. And our Secret Service, and the Bureau of Foreign and Democratic Commerce of the Department of Commerce, and our representatives in the American Union. And the Library of Congress with scores of trained men. All available to any President. Thousands of men with detailed knowledge in their special fields.

What does Mr. Roosevelt know about foreign affairs that these men don't know, and better? Not a thing. Unless it is something King George told Mr. Roosevelt orally at Hyde Park. And if that were important it would be Mr. Roosevelt's patriotic duty to give it to his successors.

Carry on with the newspapers.

Two-Piece Look
Autumn fashions already cast their shadows before them. Most important of the incoming silhouettes is the "two-piece" look with tiers and peplums to accent a small waist and rounded hips.

600 Union St., Norfolk, Va. Phone 21242

Miss Susan Harrington and Miss Edna Whitlow of Lexington, Ky., are guests of Miss Julio Andersen, who with her mother and brother, Mrs. Leif Andersen and Leif Andersen, 2nd, are spending the summer in the Holland apartment.

Mr. and Mrs. J. F. Newsom, Jr. and children, Jack and Mary Newsom, have returned to their home in Roanoke after visiting Mr. Newsom's mother, Mrs. J. F. Newsom at her home on 22nd Street.

Miss Eileen Gregory and Mr. and Mrs. Harry T. Brown are spending this week in the Pocomoke mountains in Pennsylvania. Before returning to her home in Oceana, Miss Gregory will spend a week with Capt. and Mrs. Russell T. George in Elkton, Md.

Mr. and Mrs. J. T. Crosswhite have as their guests at their home on Park Avenue, Mr. and Mrs. Morris Eckard and daughter, Miss Barbara Eckard of Elizabethton, Tenn., and Felix Altirup of Washington, D. C.

Mr. and Mrs. Roger P. Walker of New York and Richmond are spending two weeks at the Courtney Terrace.

Mr. and Mrs. E. C. Doyle of Norfolk are occupying the Cole cottage on 58th Street.

Mr. and Mrs. W. C. Franklin of Baltimore are occupying the Terrell cottage on 54th Street.

Miss Evelyn Smith has as her guests at her home in Oceana, Mr. and Mrs. J. B. Forbes, Miss Sarah Wood, Miss Dorothy Anderson and Miss Martha Spencer of Andersonville, Virginia.

Mr. and Mrs. Wistar M. Head of Lynchburg are spending the month of August in the Timberlake cottage on 113th Street.

1st Lt. F. E. Olesby, M. C. of Oceana, is stationed at Carlisle Barracks, Carlisle, Pa.

Mr. and Mrs. Townes and their daughter, Miss Ruth Townes of Danville, are occupying the Towers apartment on 231-2 Street.

Mr. and Mrs. Junius Fishburn and family of Roanoke are occupying the Tyler cottage on 102nd Street.

Mr. and Mrs. George Barner and their two children, Miss Frances Barner and George Barner, Jr., who have been spending some time with Mr. Barner's parents, Mr. and Mrs. G. Barner at Cherry Hill, McKinney, Virginia, returned Tuesday to their home on 116th Street.

Miss Florence Twoby of Norfolk is spending a week at the Beach Plaza.

Charles La Motte of Towson, Md., is visiting Chick Jordan at his home on 51st Street and Holy Road.

Mr. and Mrs. C. G. Browne of Lynchburg will be the weekend guests of Mr. and Mrs. Wista Head on 113th Street.

Bryson Wood, who has been visiting James M. Jordan, 3rd, on 51st Street, has returned to his home in Baltimore.

Mr. and Mrs. Carl Forsberg, Jr. and their two daughters, Misses Aimee and Temple Forsberg, are guests of Mr. Forsberg's brother-in-law and sister, Mr. and Mrs. George Barner at their home on 116th Street.

Miss Nancy Lee Doggett of Jacksonville, Fla., and Miss Jeanne Colley of Orlando, Florida, arrived today to visit Miss Frances Booker at her home on 52nd Street.

Miss Betty Bok of Huntington, W. Va., arrived Thursday to spend some time with Miss Mildred Taylor at her home, Long Haul,

on Linkhorn Bay.

Mrs. R. S. Dawson, Mrs. Robert Taylor and Miss Mildred Taylor will leave Tuesday for Washington, D. C., where they will spend a few days with Mrs. Dawson's son and daughter-in-law, Mr. and Mrs. Ralph Dawson.

1st Richard Dickson, U. S. M. C. has returned to his duties after spending leave with his parents, Mr. and Mrs. W. P. Dickson at their home in Sea Pines.

Mrs. Carr Spencer of Winston-Salem, N. C. is visiting her brother-in-law and sister, Mr. and Mrs. Robert Turnbull on 100th Street.

William Gordon of Richmond is visiting his aunt, Mrs. William P. Dickson, Jr. at her home in Sea Pines.

Mr. and Mrs. E. C. Pelouse and their two grandchildren, Nancy Smith and W. R. I. Smith, 3rd, of Richmond, are spending the summer at their cottage on 26th St. and Baltic Avenue.

Mr. and Mrs. Charles W. Morris of Detroit, who have been visiting Mrs. Morris' mother, Mrs. J. Alston Cabell at Point of Fork, Pluanna County, will arrive Saturday to spend a month at the Myers cottage. They will be joined there by their daughter, who has been visiting her aunt, Mrs. Herman A. Allyn, at her cottage on 115th Street.

Miss Mattie Sprinkel has returned to her home in Roanoke after spending some time with her brother-in-law and sister, Mr. and Mrs. John Potter of Oceana. She was accompanied home by Mr. and Mrs. Potter.

Private Howard Ives, who is stationed with the 29th Division in Ft. Geo. G. Meade, Maryland, spent last weekend with his parents, Mr. and Mrs. Preston Ives in Oceana.

Mrs. Robert Nelson of Roanoke is visiting her sister-in-law, Mrs. Junius Fishburn at the Tyler cottage on 102nd Street.

Miss Mary Lee will spend the weekend with Mr. and Mrs. James L. Camp in Franklin.

Howard Holland of Baltimore is the guest of his brother and sister-in-law, Mr. and Mrs. J. Peter Holland at their home on 53rd Street.

Gordon and Smith Potter of Oceana are spending two weeks with their uncle and aunt, Mr. and Mrs. Whitmark Mitchell at the Portsmouth Country Club.

Davis-Wilson
Mr. and Mrs. Ezekiel Matthew Wilson of Norfolk announce the marriage of their daughter, Miss Dorothy Louise Wilson, to Leroy Webb Davis, 2nd, son of Mr. and Mrs. Clyde L. Davis. The marriage took place February 16, in Fredericksburg, with the Rev. Father James H. McConnell, pastor of St. Mary's Church, officiating.

Mrs. Davis is residing with her parents, in Norfolk during the absence of Mr. Davis, who is stationed at Fort George G. Meade, Md.

Receiving Congratulations
Mr. and Mrs. Marion King Cox are receiving congratulations on the birth of a daughter, Wednesday, August 6 in Elizabeth Buxton Hospital, Newport News. Mrs. Cox is the former Miss Josephine Simpson.

Shorter And Smarter
The newer coiffures emphasize the shorter and smarter look. Locks only two or three inches long all around are curled into loose ringlets. Even the riamour bob is said to be on its way out in favor of "feather" curls.

Federal taxes collected in Virginia for the fiscal year which ended June 30, 1941 have reached a record high of \$284,796,596.18. This surpasses the previous year's collections by \$60,273,531.71.

Corrugated pipe is rolled over snow on Canadian landing fields to prevent snow glare. A native New Yorker and graduate of Harvard, won the hog calling contest in Kansas in 1916.

HOME OWNERS FORUM

By ARNER GORDON

WHETHER spring plans call for renovations in the attic or that much-needed game room in the cellar, it is well to remember the important part ample wall socket facilities play in creating home comfort. At but slight additional cost, an electrical outlet at the base of each wall will eliminate the necessity for multi-sided plugs as well as the dangers inherent in several extension cords coming from one over-loaded socket.

Bridge lamps, the radio and heater can all be functioning at the same time in appropriate room areas without the necessity for continual bundling of wires obstructing the floor.

Q.—How can knotty pine be painted to prevent "bleeding"?
A.—With the use of well-seasoned lumber, the painting of knotty pine follows regular painting procedure save that following the priming coat a thin layer of rosin-free shellac over knot areas prevents future "bleeding" from leaching through the topcoats to stain the decorative finish.

However, in stubborn cases, additional shellacking between the second and finish coats is often essential. Let the body coat stand for a week or ten days for evidences of "bleeding" which indicate the necessity for this extra precaution.

For the most effective results, the primer should be composed of 3 parts (by volume) soft paste white lead, 3 parts raw linseed oil, 2 parts turpentine and 1/3 gill of drier per gallon.

When the shellac has set up firmly, finish off with topcoats of equal parts soft paste white lead and lead mixing or lead reducing oil. Mix this flat finish coat formula with an equal quantity of good quality enamel to produce the eggshell gloss popular for trim and moldings.

Vitamins in Peanuts

"People could get enough thiamin using plain white bread if they would eat large quantities of oatmeal and use not less than six ounces a day of either peas, beans, soybeans, or peanuts," advises Dr. Russell Wilder, who is chairman of the nutrition committee for the National Research Council.

RIGHT OUT OF THE AIR

By EARLE FERRIS

ROSS HAMPTON, pictured here, is a Metropolitan Opera Star who sings for her country. With Robert

George Burns and Gracie Allen are considering an offer to appear in the play, "Mr. and Mrs. North" at the Pasadena Playhouse, before they return to the air with their new fall series.

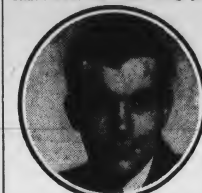

Cecil B. DeMille finished his Monday night Radio Theatre season with a flourish by presenting

Weede she was featured on the third program of "For America We Sing," a series heard on the NBC-blue network every Tuesday evening.

Benay Venuta's new assignment as Budd Hulick's "co-captain" on the NBC-red network's "Quizzer Baseball" series marks her first regular radio role since she retired from the airlines early this year in favor of Sir Stork.

How'd you like to get paid for asking questions of the ladies? That's what John Reed King, pic-

tured here, does on the Sunday night "What's My Name?" program over the NBC-red network. Says King: "Like most other men, I don't always get the answer I expect."

Burgess Meredith has reason to feel at home in his new role of host of "We, the People." The CBS Playhouse where the program originates Tuesdays is in the Times Square theatrical sector where Meredith has appeared many times as an actor.

Hedy LaMarr in her first microphone appearance. DeMille is purchasing plays and signing up stars now for the new season which commences Monday night, Sept. 8, over CBS.

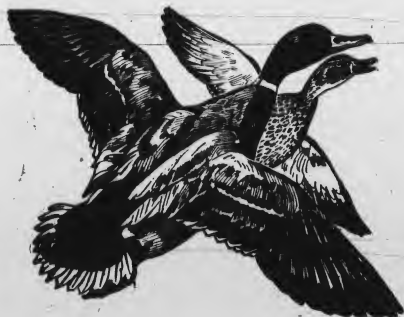

Meredith Willson, who has turned out all kinds of music from popular songs to symphonies, recently introduced his first spiritual, "Never Too Weary to Pray," on the final Thursday show and is using it in the coming Bett Davis picture, "The Little Foxes," of which he is music director.

Patricia Ryan, beautiful young star of the new CBS series, "Claudia and David," is only 19, yet she

boasts a radio career that began 12 years ago. Pat made her microphone debut at the age of seven, as a featured player on CBS children's programs.

As Others See It

(Continued from Page Two)
liquidated. Now they are the battleground for the "biggest battle in history," and this means burned towns, bombings, pogroms, uprising hideous reprisals of all kinds.

There was bound to be revolution in the Baltic states at the first opportunity, with or without the machinations of Hitler. These unfortunate nations are sure to be betrayed again if they exchange rule for Nazi rule; but it is probably inevitable, caught as they are between impossible alternatives, that they should help the devil they don't know to overthrow the devil they know. The case of Finland, which has maintained independence by its own force, is somewhat different. So is the position of Russian-occupied Poland; the great advantage of having an outside Government to act for the Polish state is that President Sikodski is in a position to negotiate for the release of Polish prisoners of war and other exiles held in Siberia, including the wives and children of Polish soldiers fighting for Britain. The soldiers in Russian camps will be in no condition to fight, perhaps, but their release will be of great political importance as the first sign that Poland can be reunited if Hitler can be defeated.

In any event, the policies of the border states are not real choices; they are reactions to cruelty and terror. It not for us to judge them in their tragic dilemma. It is for us to remember that we are one of the dominant and responsible Powers in a world in which man-eating and nation-eating monsters are at large.

Mr. Hopkins' Promises
The Clifton Forge Daily Review

Except for a personal fondness, it was never clear why Mr. Roosevelt selected Harry Hopkins as administrator of the lend-lease program. We doubt, too, if it has ever been clear to the general run of people just what Mr. Hopkins has been able to do in the office since it was created and turned over to him.

Mr. Hopkins has made some rather lavish promises to the British and the Russians as to what the United States would do for them. It may be that he knows what he is talking about, but there are many who have their doubts. Among these we find the well-informed Richmond News Leader, which has the following comment on the promises Mr. Hopkins made in a broadcast to the British people on Sunday night: "Do not Harry Hopkins' broad promises in England make you a little uneasy?"

"You remember that under his skin he is an emotionalist and that he has been stirred profoundly by the Russian war effort. In admiration of what Britain has done, and in concern over the future, he naturally wishes to contribute to the morale of a brave, kindred people. That is as it should be; but there should be the restraint of realism in what

Mr. Hopkins promises. Last week he went much further, we fear, than our industrial pace justifies. He promised, you will remember, that in 1942 the United States will put in service 6,000,000 tons of new merchant shipping. Fine as is the work of the shipyards, cordial as is labor relationships on the East Coast under the new no-strike agreement, most authorities believe Mr. Hopkins promised about twice as much as this country can deliver next year.

"Today Mr. Hopkins is quoted as telling the British: 'I have found out that there are certain things which you need in order to fight this war for the democracies. I am confident America can supply them.' Promises almost as broad were made the Russians.

"It may be that the products for which Britain and Russia are asking America are those of which we have or speedily can produce an abundance, but the odds are against that. Except for surplus food, tobacco, cotton and certain wool products, we know of little that America has available in ample quantity for the quick delivery abroad.

It is not far better to make moderate promises and to exceed them than to make large promise and to discourage the Allies by failing to deliver? 'Big-Mouth,' we must remember, is more than an American facial characteristic. It is a national disease."

QUESTIONS ANSWERS TO BUILDING AND PROBLEMS

Q. It seems to me that in most clothes closets, especially shallow ones, the shelf space usually provided in the upper portion of the closet is not accessible for the storage of articles such as luggage. How can closets be planned to make these shelves more convenient?

A. In shallow clothes closets, this space can be made useful for storage purposes if treated as an individual compartment having separate cabinet doors above the regular closet doors. This will permit easy access to the shelves directly from the room and eliminate waste space. With this arrangement, it will still be possible to include a single shelf for hats directly over the hanging rod.

Q. What provisions for artificial lighting should be made in garages?

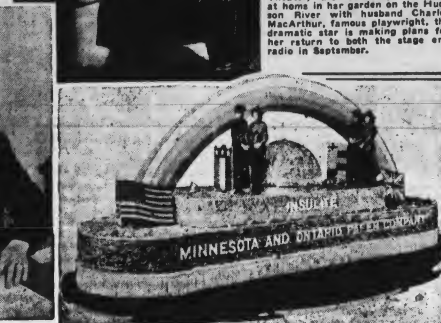

A. Exterior lighting is desirable for convenience in opening, closing, and locking doors and, in the

"Weep No More, My Lady!"

By Alice Blake

REMEMBER Meg in "Little Women," and how fond her husband was of jellies and jams? Well, soon after she was married she decided that she would do her bit to have a well-stocked jam cupboard. So all

one Summer's day she labored in her kitchen over a big, old-fashioned range. But when John came home that night, he found his little bride dissolved in tears because the jelly just wouldn't "jell."

Poor Meg, and lucky modern housewives! For brides today, while you will have your problems, jellymaking needn't be one of them. When you use the short-cut method you are being both practical and economical and your reward will be half again more glasses. Follow directions with care:

RIPE RASPBERRY MARMALADE
4 cups prepared fruit
7 cups sugar
1 bottle fruit pectin

To prepare fruit, peel off yellow rind of 2 medium oranges and 2 medium lemons with sharp knife, leaving as much of white part on fruit as possible. Put yellow rinds through food chopper; add 1 cup water and 1/2 teaspoon soda, bring to a boil, cover, and simmer 10 minutes. Cut off tight skin of peeled fruit and slip pulp out of each section. Add pulp and juice to cooked rind and simmer, covered, 20 minutes longer. Crush or grind about 1 quart fully ripe raspberries; combine with orange mixture.

Measure sugar and prepared fruit into large kettle, filling up last cup

with water if necessary. Mix well. Bring to a boil and boil gently 5 minutes. Stir constantly before and while boiling.

Remove from fire, stir in bottled fruit pectin. Then stir and skim by turns for just 5 minutes to cool slightly, to prevent floating fruit. Pour quickly. Paraffin hot marmalade at once. Makes about 11 medium glasses.

RIPE RED CURRANT JELLY
(Makes about 12 medium glasses)
6 cups juice
6 1/2 cups sugar
1 box powdered fruit-pectin

To prepare juice, crush about 3 quarts or 4 1/2 pounds fully ripe red currants. Add 1 1/2 cups water, bring to a boil, and simmer, covered, 10 minutes. Place fruit in jelly cloth or bag and squeeze out juice. (If there is a slight shortage of juice, add small amount of water to pulp in jelly cloth and squeeze again.) Measure sugar into dry dish and set aside until needed. Measure juice into a 5- to 6-quart saucepan.

Place over hottest fire. Add powdered fruit pectin, mix well, and continue stirring until mixture comes to a hard boil. At once pour in sugar, stirring constantly. Continue stirring, bring to a full rolling boil and boil hard 3/4 minute.

Remove from fire, skim, pour quickly. Paraffin hot jelly at once.

Council Meeting

(Continued from Page One)

Brown said. Mrs. Wallace Clark and members of the council agreed. The council voted to request the chief of police and health inspector to strictly enforce present laws requiring residents and visitors to place trash in appointed receptacles and to investigate large business places responsible for part of the conditions.

Mrs. Clark appealed to the council for a police patrol of the boardwalk after midnight, especially on week-ends. She and others reported conditions intolerable for hotel guests and residents adjacent to the boardwalk. The police committee was instructed to confer with the chief of police and with Army officials and arrange for military and civilian supervision after midnight on the boardwalk and beach.

The auditing firm of Jackson, Goodman and Co., was again selected to make the audit of Town books at the figure of \$300.

An ordinance offered by A. Worth Petty, town engineer, was adopted, to prevent the pollution of the city water supply by cross-connections with other supplies. Violation may result in the cutting off of the town's water service and in a misdemeanor.

Russell Hatchett, Town treasurer, made a report of financial affairs which appeared satisfactory and approved.

Cooperatives To Meet At Beach

Highlights in the life of a successful farm family will be presented in the technicolor movie, "Dad Brown's Job," when patrons of Southern States Cooperative in the Virginia Beach section hold their annual meeting at Ballroom Seaside Park in Virginia Beach Thursday morning, August 14, at 10:30 o'clock, with J. W. Halstead of Vendome Terrace, Norfolk, presiding.

The audience will take part in an open discussion of "What Farmers Can Do to Improve the Usefulness of Their Cooperative to Agriculture."

M. H. Hope, Farmville, district manager, will outline the cooperative's accomplishments during the year ended June 30 and will announce the patronage dividends. Board members will be elected. Rev. O. D. Poythress of South Norfolk will direct group singing. There will be contests with prizes and refreshments.

The event is being sponsored by Southern States Norfolk Service and L. D. Edwards, Norfolk; R. B. Mason, Portsmouth; and Southern States Cooperative.

Members of the board of directors are G. C. Nicholas, Northwest; S. E. Charlton, Hickory; G. E. Benton, Franklin; A. D. Malbone, Princess Anne; B. F. Wilson Paxson, J. W. Halstead, and R. F. Unser, Norfolk.

(Continued From Page One)

cases confiscatory, which needs a thorough overhauling.

We have barely begun to feel the pinch that the defense effort will produce. Next year, many a consumer who goes shopping for items that have been produced in abundance in the past will come home empty handed.

Evidence of the way the wind blows is found in the fact that motor car, electric refrigerator, and washing machine production will be cut about 50 per cent in 1942. Anything which requires aluminum, rubber, or basic metals will be harder to get.

Comments And Resumes on War

You don't have to be an authority on international power politics to figure out why the Vichy government invited Japan to occupy and "protect" French Indo-China. The Machiavellian hand of Hitler can be clearly seen in this potentially explosive move. The Vichy government is completely a pawn of the Nazis, and Hitler, who is now fighting the two-front war which he always said he would avoid, may profit materially from trouble in the Pacific. So long as the Japanese saboteur remains in power and pursue their imperial policy, it will be necessary to keep much of the American Navy in the Pacific, and it will also be necessary to divert much of our Army and military supplies to our Pacific possessions. It is altogether likely that what Hitler would like to see is a full-dress war between Japan and the United States, in order to keep us from giving maximum aid to Britain.

This government's reaction to Japanese move into Indo-China was precisely what was expected. We have long been criticized for permitting oil exports to the Japanese—and it is an ironical fact that while we have been giving our moral support and some material support to China, we have also been supplying Japan with most of the gasoline that has made the war against China possible. President Roosevelt, queried at a press conference, said frankly that the government had permitted oil exports in the belief that if we shut off these vital supplies, Japan would at once to seize Indo-China and other rich areas, and so cause a Pacific war of the first magnitude. In other words, the government was trying to localize conflict. That policy has now proven a failure. A start toward an embargo on all commerce with Japan has been made, and Britain and her possessions have followed suit.

From now on, a Treasury license will be needed to take any Japanese assets out of this country, or to send anything of any kind to Japan. As an AP dispatch said, "The asset freezing order put the Treasury in a position to turn the economic screws on Japan. Just how hard they will be applied may depend on future events in the Far East."

It is difficult to exaggerate the importance of the economic war we hold over Hirohito's empire. Japan buys the bulk of many

Benefit Dance For Infant Sanitarium Huge Success

Virginia Motorists Tax Bill Jumps

Higher taxation of motor fuel by the federal government, plus greater use of motor trucks and passenger cars, brought a \$5,000,000 increase in the gasoline tax bill of Virginia highway users during the first six months of 1941 as compared with the first half of last year, E. A. Kyhn, secretary of the Virginia Petroleum Industries Committee, said today.

"This big increase in the amount of federal and state taxes on motor fuel paid by motor vehicle owners of Virginia during the first six months of 1941 results not only from the extra 50 per cent federal tax on gas for defense purposes which became effective on July 1, 1940, but also because of the greater use of motor trucks and passenger cars in national defense activities," said Mr. Kyhn. Throughout this and other states trucks are carrying materials which directly or indirectly are important to our national defense activity of trucks is pushing up materially the revenue from motor fuel. Extensive use of passenger cars in connection with national defense activities, especially in getting workers to and from their jobs also is an important factor in the higher gasoline tax collections.

The two present federal taxes on motor fuel are equivalent to an average of 12 per cent of the retail price of the fuel. When added to the state taxes, the total tax burden now carried by motor fuel is approximately half of the retail price.

Cavaler Beach Club Scene Of Gaiety Attended By Huge Crowd

The Cavalier Beach Club Benefit dance for the Infant Sanitarium was a gala event of this week, and was attended by many patrons and patronesses from Norfolk and Virginia Beach.

Paul Pandaris and his Orchestra, who filling an engagement at the Cavalier Club, furnished music for dancing, and an attractive floor show arranged by Mrs. Seldon Grandy added much to the entertainment of the guests.

Charles Gomez, professional dancer at the Cavalier Hotel gave up an exhibition waltz, having as his partner Mrs. Alexander M. Earle, Jr. of Richmond, who graciously substituted in the absence due to illness of Mrs. Gomez. The Peller Singers of Norfolk, a group of charming young ladies, with lovely voices, rendered several selections. Private Mack Riddle with his guitar entertained in true "hill-billy" style. The Cavalier Quartet offered a program of Southern tunes and Negro spirituals, and ended with a patriotic air cleverly harmonized.

The Board of managers of the Infant Sanitarium wish to thank the management of the Cavalier Hotel Beach Club for offering the facilities of the Club for this occasion and for the splendid cooperation of its personnel; the press of Norfolk and Virginia Beach; W. T. A. R., W. G. H., and the public for their generous support.

The proceeds from this annual affair is used by the Infant Sanitarium to carry on the work, begun three years ago, of bringing health to babies of indigent families of Norfolk and Virginia Beach, and the Board of this institution appreciates the services and support of all those who made the dance a financial success.

Local Negro Youth Enters Air Corps

Of the total of eleven young men who were enlisted for the Army during the past week at the local U. S. Army Recruiting Station in the Post Office, Norfolk, ten chose service in the Air Corps at Jefferson Barracks, Saint Louis, Mo.

Three applicants for appointment to the Flying Cadet School at Randolph Field, Texas, passed their preliminary physical examinations during the past week, and will be given their final exams at Langley Field.

One of these three applicants is Ralph H. Bullock, young Negro of Virginia Beach.

County And Beach Join In Fast Time

M. C. Mansfield, chairman of the Board of Supervisors of Princess Anne County, announced that all county offices have adopted Daylight Saving Time, starting just after midnight Sunday, in accordance with Governor Price's request that all political subdivisions and private persons, firms and corporations follow the State's lead in adopting daylight time.

W. F. Hudgins, clerk of the Circuit Court of Princess Anne County, said his office and all other public offices, including those of the county treasurer, commissioner of revenue, sheriff and others would follow the State's lead.

Daylight Saving Time also is being observed at Virginia Beach, without exception.

All facilities with the exception of train and bus schedules which will remain on Eastern Standard time will be listed for the usual time, but the time will be, of course, Daylight Saving and not Eastern Standard.

Beach Visitors Show Steady Increase

August tourist trade at Virginia Beach this year far exceeds that of 1940, according to observers.

Don Sewell, manager director of the Virginia Beach Chamber of Commerce, told the Ledger-Dispatch today that the business at the beach over last weekend was greater than that during the Fourth of July celebration.

Asked for approximate figures on the number of persons at Virginia Beach last weekend, Mr. Sewell said that the normal population is about 5,000, the hotels and cottages contained around 60,000 and there were about 40,000 transients.

"One of the best features of this summer's business is that more people than ever have made a practice of spending an entire week at the beach instead of simply coming for a weekend," Mr. Sewell said. This meant much better business for the hotels and cottages.

Amusement concessions at all of the resorts were reported as having been more liberally patronized than usual. One of the factors in the transient traffic to Virginia Beach was that thousands of soldiers are stationed at Fort Story and Camp Pendleton, with the result that cars from many states brought relatives to the Beach for visits.

"It is a false report that accommodations are not available in Virginia Beach" according to Mr. Sewell. He said that rumors had been circulated in the Midwest that it would not be wise to bring cars to the east coast as it will in the operators having to ship their cars home.

"The reports, which efforts are being made to stop, are based upon the present national defense work here."

Wide publicity is now being given throughout the country.

Aid in the development of essential statistical and economic data on real estate and housing.

Water Shortage At The Beach

Two Local Camps Go Without Supply.

Local Consumers Requested To Conserve on Usage

During the past week it has been necessary for the State Highway Department to close the valves of the water mains leading from Norfolk to Virginia Beach on several occasions in order to carry on certain road construction work. As a result of these shut offs the reservoir surplus was virtually depleted and it took the capacity of mains to keep the Town requirements up. As a consequence, Camp Pendleton and Fort Story had to do without. For days the boys in these camps have been hauling water for drinking and cooking purposes and doing toiletting in the Ocean. In an effort to eliminate this condition, it has become necessary to reduce the pressure on the Town mains. This, of course, has brought low water pressure with in the Town limits and no water at all on the upper stories of the larger buildings.

Town Engineer A. W. Petty says this condition will continue to exist for some time unless the people of the community will lend their cooperation in conserving the use of water until the reserve has been brought to normal. In making this statement he urgently appeals to one and all consumers to refrain from the use of unnecessary water particularly on lawns and flowers. If this is done the supply will be brought back to normal with adequate pressure within a few days.

High School Site Selected By Town School Board

Negotiations Arranged for Two Blocks West Of Mediterranean Avenue Between 24th and 25th Streets.

All Owners Agree To Sell but Two; Condemnation proceedings To Be Filed Against Non-Objections.

Ample Grounds for Athletic Field To Be Provided.

The School Board of the Town of Virginia Beach has arranged with reasonable certainty that funds will be available for the construction of a new, modern building to be used as a high school and for the upper grades of the grammar school. Application has been made to the Federal Government for a grant of \$150,000 under the Lanham Act to defray the expense of construction. The Board has received information which reasonably assures that the funds will be forthcoming. On the basis of these assurances, the Board has selected a site on Mediterranean Avenue between 24th and 25th Streets, which will extend back two blocks west. So far all the individual property owners have reached an agreement with the Board for the purchase of their holdings, with the exception of two.

Condemnation proceedings are expected to be started soon to procure title to the property. The site will be of sufficient size to have an athletic field for both football and basketball.

The necessary for this new school has been brought about by the growth of Virginia Beach, due to the influx of defense workers and Army families.

The present school facilities have been greatly over-crowded necessitating the holding of classes in hallways. Classrooms have been filled to capacity in both the Kempsville and Oceana high schools. The new Kempsville High School, which is expected to be completed in the fall, will relieve some of the congestion, and the establishment of a high school at Virginia Beach should provide adequate facilities for some time to come.

Rudolph, Cooke & Van Leent, architects, are preparing the plans. Members of the Virginia Beach School Board are Wallace Clark, chairman; Charles Bryant and Dr. Walter L. Taylor, P. W. Cox, superintendent of Princess Anne County Schools, also is superintendent of the Virginia Beach system.

Waywood Methodist Church—Rev. Percy D. White, pastor; C. H. Mast, superintendent. Preaching first and third Sundays at 7:30 p. m.; second and fourth Sundays at 11 a. m.

There are many things for which men are willing to die, if they have to.

Gossip would hurt fewer people if there were more good people to disbelieve it.

Labor leaders, who call strikes for higher wages, seem to believe that "what helps business helps you."

From a local lady's scrapbook: "If you're stumbling over a hypothesis, you're going the same way as I."

SOUTHERN WILDLIFE

A Little Windy, All Right!

Two old vets of streams and fields were attempting to down one another with tales of their fishing accomplishments. A large audience hung onto every word as they sought to clinch the verbal battle.

"Listen, you snaggle-toothed pond toad!" shouted Uncle Jake. "Once I caught a 50-lb. bass with just a rusty old pin!"

"Wet reel grass!" Dad countered. "About two years ago I pulled in an old lantern, dated 1860, while fishing off Newfoundland, and believe it or not, that dang lantern was still burning!"

"Now look here, Dad!" Uncle Jake countered. "No use lying about it. I'll take 45 pounds off, my fish if you'll just blow out that blasted lantern!"

Conservation
"God has lent us the earth for our like. It is a great entail. It belongs as much to those who are to come after us as to us and we have no right, by anything we do or neglect, to involve them in any unnecessary penalties or to deprive them of the benefit which was in our power to bequeath."
—John Ruskin.

What Is a Mammal?
Any animal which possesses milk glands by means of which its young are fed during the early period of growth is called a mammal. Other typical mammalian characteristics are the possession of hair and a four-chambered heart. Thus whales, bears, fur-bearers, squirrels, deer, mice, and the human race are all classified as mammals.

Hands Off!
"Leave young birds and young game alone, if found in the woods," a number of game departments are advocating. Wildlife mothers protect their broods loyally and if young birds and animals are left alone in the woods, in most cases their mothers will find them. The mother probably has just strayed temporarily.

Kill That Cat!
Out of every hundred birds killed in a year, according to recent wildlife statistics, the much-maligned hunter accounts for less than five. FIFTY PER CENT of the birds killed in America annually are the victims of wildlife's dreaded foe, the prowling domestic house cat. Another twenty-five per cent is destroyed by a sort of wildlife fifth column—predatory foxes, hawks, crows, weasels and skunks. The remainder are victims of forest fires, disease and miscellaneous causes. The sportsman, in exchange for his modest toll of five per cent, is wildlife's most loyal year-round ally in its fight for survival.

The Paddlefish
Little known to most sportsmen is one of the queerest creatures of the pieces family—the paddlefish. Formerly they were common, but due to the fact that their eggs are used as domestic caviar and their flesh brings highest prices on the eastern markets, the species is becoming more rare each year. The flesh of this species, when smoked, tastes much like sturgeon. Too, the fish have no bones in their bodies. Cartilage replaces bones. The paddlefish, along with gar, sturgeon, and griddle have survived all stages of evolution. Each is still shaped exactly as it was during prehistoric days when mastodons and saber-toothed tigers roamed the world. They have been recorded as weighing up to 162 pounds. The paddle, or snout, is shaped like a duck's bill. It is found occasionally throughout the entire South.

Good Line of Lines
We received one of the most beautiful color catalogs the other day that has come to our attention in a long time. Previously,

Adequate Hot Water Necessary in Summer

An adequate supply of hot water, available at the turn of a faucet, is just as necessary to the family during the summer months when the main heating plant is turned off as it is during the winter.

A separate hot-water heater, or one that will function without putting in operation the entire heating system, is no longer regarded as a luxury, and many of this type are available for modern small homes.

The two general classifications as applied to the many types of domestic hot-water heaters are "direct" and "indirect." In the direct type the unit is devoted entirely to the heating of hot water, while in the indirect type the hot water is a byproduct of the regular heating plant.

Direct heaters can be obtained in types such as automatic units requiring storage tanks, automatic units requiring no storage tanks, and nonautomatic units requiring storage tanks. In the indirect type heaters a special coil is built into either a hot water or steam boiler through which the water is passed and piped to a storage tank.

We had thought that the major fishing line manufacturers were located in the East. But if they've got anything east of the Mississippi that out-ranks the array and variety of lines put out by this western company, we'd like to see them! The catalog comes without obligation and can be had by writing Sunset Line & Twine Company, 564 Sixth Street, San Francisco, California, and asking for catalog 9k.

Homes Need Regular Repairs

Every home owner knows that his home needs regular repairs.

If essential repairs are long neglected, future repair bills accumulate. A roof that leaks, woodwork that is in need of paint, sheet metal that has rusted, doors that sag, walls or floors that have been allowed to deteriorate are signs of neglect. If neglected too long, any house will lose its worth as a dwelling place and as an investment and will cost more to operate.

A convenient way to enjoy more home comfort immediately by making all necessary repairs and improvements and then paying for them out of monthly income is offered by the Federal Housing Administration plan, which many builders recommend.

A wide range of improvements may be made with funds obtained from qualified lending institutions under Title I of the National Housing Act.

Better Homes Better Living by the Housing Editor

Our kitchens shortly will be welcoming all sorts of little strangers, offspring of the defense program.

The annual Housewares Show held recently in Atlantic City threw a new slant on the ingenuity of American Manufacturers. Deprived of their usual materials because of defense priorities, these manufacturers are showing impressive resourcefulness in redesigning their products to use materials which do not conflict with the demands of the armament program.

One large electrical company is perfecting both a radio and an electric iron of glass. Wood is replacing steel in kitchen cabinets, and plastics are replacing bronze in flying-screens, and aluminum

in bottle tops. Running short of the synthetic, koroseal, which was requisitioned for the Army and Navy, other manufacturers are using rayon fabric for shower curtains.

From cooking utensils to lamps, the housewares industry has been affected in the use of materials—but the ingenuity of these manufacturers has created new items which "for the duration" will fill every household need. Don't even be surprised if your new electric toaster this winter is made largely of glass!

LEGALS

VIRGINIA.
In the Clerk's Office of the Circuit Court of Princess Anne County on the 15th day of July, 1941.
MARYANN ALFRED MOBLEY,
Complainant,
vs.
GLADYS WALRATH MOBLEY,
Defendant.

IN CHANCERY.

The object of the above styled suit is for the complainant to obtain from the defendant, a divorce A MENSA ET THORO, later to be merged into a divorce A VINCULO MATRIMONII upon the grounds of desertion.

And affidavit having been made that the defendant Gladys Walrath Mobley is not a resident of the State of Virginia, it is ordered that she appear at the Clerk's Office of our said Court within ten days after due publication hereof and do all things necessary to protect her interest. It is further ordered that this order of publication be published in the Virginia Beach News, a newspaper published in the County of Princess Anne, once a week for four successive weeks; that a copy of this order be posted at the front door of the Court House of our said Court on or before the next succeeding Rule Day, and a copy be mailed to the defendant at the Post Office address given in said affidavit.

Teste: William F. Hudgins, Clerk.

W. R. Ashburn, p. q. 8-1-41

AUCTION SALE OF VALUABLE REAL ESTATE

PURSUANT to the terms of a certain decretal order entered in the Circuit Court of Princess Anne County, Virginia, on the 11th day of August, 1941, in the chancery cause of Commonwealth of Virginia, Plaintiff vs. Alice Leigh, et al., defendants, the undersigned Special Commissioner, will offer for sale at public auction, at the Town Hall, 14th Street and Pacific Avenue, in the Town of Virginia Beach, Virginia, on Wednesday, August 21st, 1941, at 4:00 o'clock P. M., the following real property located in the Town of Virginia Beach, Virginia, to-wit: Lots Twenty-nine (29), thirty (30), thirty-one (31), thirty-two (32), thirty-three (33) and thirty-four (34), Block Twenty-two (22) and Lot One (1), Two (2), Three (3), Four (4), Five (5), Twenty-one (21) and Twenty-two (22), in Block "A", all as Map 4 of the Virginia Beach

Development Company, which Plat is duly recorded in the Clerk's Office of the Circuit of Princess Anne County, Virginia.

These lots will be sold free from liens and encumbrances. TERMS: CASH. All sales subject to confirmation by the Circuit Court of Princess Anne County. Purchasers will be required to deposit twenty per cent of the bid price when the property is knocked down and to consummate their purchase within ten days after sales are approved by the Court.

ROY SMITH,
SPECIAL COMMISSIONER
I certify that the bond required by above decree has been given by the Special Commissioner.
William F. Hudgins, Clerk.
By L. S. Belton D. C.

Pursuant to a resolution of the Council of the Town of Virginia Beach adopted August 4th, 1941, I shall receive bids for the sale per ton of sewage sludge now located and to be accumulated at the Virginia Beach sewage disposal plant near the Town of Virginia Beach, Virginia, said bids to be made on a tonnage basis and the sludge to be delivered as taken from the drying beds, (there will be approximately 150 tons per year), all bids to be in writing and to be delivered to the undersigned not later than Friday, August 22, 1941, at 12:00 o'clock noon. The following is an analysis which has been made of the said sludge.

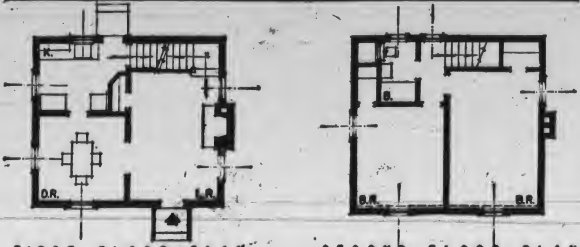

Moisture	16.40%
Nitrogen	2.35
Phosphoric Acid, Available	3.95
Phosphoric Acid, Insoluble	3.30
Phosphoric Acid, Total	3.30
Potash	.33

The right is hereby expressly reserved by the Town Council of Virginia Beach to reject any and all bids.

W. R. HATCHETT, CLERK
TOWN OF VA. BEACH, VA.

Pursuant to a resolution of the Council of the Town of Virginia Beach adopted August 4th, 1941, I shall offer for sale, for cash to the highest bidder, at public auction at the Town Hall on 14th Street, Virginia Beach, Princess Anne County, Virginia, on Friday, August 22nd, 1941, at 12:00 o'clock noon the following described property, to-wit:

All that certain lot, piece or parcel of land with buildings and improvements thereon in the Town of Virginia Beach, in Princess Anne County, Virginia, being known as the Town Hall of the Town of Virginia Beach, Virginia,

FIRST FLOOR PLAN SECOND FLOOR PLAN
This inexpensive two-story house is well suited to the needs of the average small family. It has a neat and unpretentious appearance. The exterior design is a simple expression of the interior plan. Downstairs are the living room, dining room, and kitchen, while upstairs are two bedrooms and a bath. In the North Central section of the country, this property is valued at \$5,500 and was financed with a mortgage of \$5,200 insured by the Federal Housing Administration. Average monthly payments on a 25-year mortgage of this amount, exclusive of local taxes and hazard insurance, total approximately \$30. The cost of a similar property in another locality will vary.

said property being more particularly described as follows.

Beginning at the Southeast intersection of 14th Street and Pacific Avenue and running Southerly along the Eastern side of Pacific Avenue one hundred twenty-five (125) feet; thence Easterly and parallel with 14th Street one hundred (100) feet; thence Northerly and parallel with Pacific Avenue one hundred twenty-five (125) feet to the Southern side of 14th Street; thence Westerly along the South side of 14th Street one hundred twenty-five (125) feet to the point of beginning, said property taken as a whole faces one hundred (100) feet on 14th Street and extends back between parallel lines one hundred twenty-five (125) feet, excepting therefrom, however, a plot of ground in the Northwest corner of the above described lot which faces twenty-two and a half (22½) feet on 14th Street and extends back between parallel lines along the Eastern line of Pacific Avenue forty (40) feet. This sale will be made subject to confirmation of the Town Council of Virginia Beach.

W. R. HATCHETT, Clerk
TOWN OF VA. BEACH, VA.

THE POCKETBOOK OF KNOWLEDGE

THE POCKETBOOK OF KNOWLEDGE
This book is a comprehensive guide to various types of machinery and tools, including steam locomotives, industrial machinery, and household appliances. It is available for purchase at a special price of 35¢.

Where Will We Land?
It would seem that we have ceased to consider the consequences of adding billions upon billions to our national indebtedness. The sky is the limit to our borrowing and spending, with little or no thought of where the money is coming from or who is going to pay the bills. This is a new and an extremely radical policy in the life of this nation. Just where the policy will lead seems to be of no special interest to those in control of the government.

At the beginning of the Civil War in 1861, the national debt was \$90,562,417. At the close of the war, in 1865, the national debt was \$2,677,929,012. At the beginning of the World War in 1916, the national debt was \$1,225,145,568. At the close of the war in 1919, the national debt was \$25,482,024,419. In 1930, the debt had been reduced to \$16,185,306,299.

The national debt had been increased to nearly 50 billion dollars before the defense program was put in action. The spending program of the administration for defense has already reached the staggering sum of \$2 billion dollars. If we spend \$2 billion dollars in preparation for war, what will we spend when we get into war? Week after week, Congress appropriates billions, seemingly, with no thought of where the money is coming from, and with no consideration of the national calamity that threatens such a course.

The government has no money. It is spending billions on the credit of helpless, unborn babies. The people should demand a clear and full explanation of all that is involved in this huge spending program.

The administration's appropriations for defense are already more than the total wealth of 19 of our states.

HEALTH NOTES

BOTULISM

Last autumn several Virginia deaths due to botulism were reported to the State Health Department's Bureau of Vital Statistics. This disease is rare in the United States and is entirely avoidable. When it occurs, the infection in many instances is fatal because of the high potency of the poison and its stealthy approach. From 18 to 36 hours after eating the poisonous food responsible for the condition, the symptoms appear. However, even this developing period may be shorter or longer depending upon the quantity of toxin partaken," states Dr. L. C. Riggins, State Health Commissioner.

"The early symptoms generally are indefinite, thus making diagnosis by the doctor, who usually arrives late on the scene, difficult. Fatigue, headache, dizziness and increasing muscular weakness which, in severe cases results in near-paralysis, manifest themselves. Dissimilar to the usual type of poisoning, acute intestinal irritation for the most part is lacking. Even if diarrhea be present, it is only temporary. Induced constipation exists. Little if any pain accompanies the infection.

"Prevention is based upon cleanliness and care in the home-canning and home-processing of nitrogenous foodstuffs. Botulism does not occur in fresh foods. It is the carelessly canned, preserved, pickled or processed food, especially so-called cold packing, that causes the trouble.

ODORS AND PUBLIC HEALTH

"There is a more or less popular misconception that unpleasant odors in themselves are detrimental to health. Nevertheless, it long has been known that, however disagreeable odors may be, they are not likely to be harmful physically. This does not mean that areas should not be taken to eliminate such nuisances. In fact, civilized living demands that in so far as is possible this should be done," states Dr. L. C. Riggins, State Health Commissioner.

"No particular odor is associated with disease germs. Such odor is not spotted by smell. Even the existence of harmful dusts or organisms in the atmosphere seldom can be detected through related odors.

"It is a characteristic of the sense of smell that one's sensitivity to any particular odor soon becomes dulled if exposure is more or less constant. For example, persons living in the neighborhood of certain types of manufacturing that permeate the air with odors are scarcely aware that they exist, whereas a visitor will be uncomfortably acute to them. A more general illustration is the unconsciousness of a bad atmosphere in an occupied room which suddenly is realized if one steps into the fresh air and then back again into the room. When inside air becomes actually vitiated, the olfactory sense may detect the situation; even so, sleepings and headaches are the more likely manifestations.

"The misplaced emphasis on odors is well illustrated by the repeated complaints to health officers of smells from pigpens, dumps and rubbish heaps, coupled with the notion on the part of the complainant that it represents a health hazard.

"Undoubtedly, good town, city, and backyard housekeeping indicates that conditions that give rise to offensive odors should be removed. And from the standpoint of cleanliness and decency, personal and official efforts are continually being directed both to prevent and remove conditions of this character.

"However, from strictly a health point of view, it is even more important for the public to appreciate the health value of certain preventive measures. Among these are immunization of children against diphtheria, the protection of the private water supply, the use of safe milk, the disposal of sewage in rural either by septic tanks or by a sanitary pit privy, and protection of food and home in summer against flies.

"In short, many persons who become quite agitated over an offensive odor, are quite indifferent to the measures designed to protect them against disease. Consequently, while it is natural to become disturbed about conditions that create disagreeable odors, it is much more important to follow approved practices that result in safe environmental and personal protection against disease.

RURAL TRENDS

ROGER M. KYE

Every day we hear of more and more people buying farms. Most of them look upon these purchases as investments in future security, and they have found sound reasons behind their thinking.

Bricks and mortar, and machines and factories and stores are by their very nature bound to disappear in time. They are subject to constant changes which affect their real worth. But the land does not change, if it receives reasonable care. An investment in a good farm is a permanent investment. Its dollar value may vary from year to year, but it still remains the same farm, ready to produce the vital necessity—food.

The land offers two kinds of security. The first is simple and elemental—merely something to sit at. Any man with hands and energy can raise enough food for himself and his family, that's basic security, reduced to its lowest terms.

The broader kind of security offered by the land is protection for a way of living—a fuller kind of life than mere subsistence.

The farmer who is a good manager can always find a cash market for something that he grows, and from it secure the money to buy the things he cannot raise himself.

To earn that kind of security—to live what we have come to look upon as the American way of living—this one sound principle should never be overlooked; plan your crop before you plant it. Another way of stating that important fact is "raise a crop that will sell, instead of selling the crop you raise."

When you get right down to bed rock in thinking, all the talk we have listened to about agriculture is too big and too general, beginning with the farmer himself.

We are overproduced on wheat and corn and cotton, largely because so many farmers haven't learned to plan before they plant. What would you think, for example, of a manufacturer of automobiles who persisted in building 25 percent more cars than the market would absorb. Just because he had facilities for making 100 cars a day, would he be wise to build that many, knowing that he could only sell the surplus?

We would accuse such a manufacturer of being a poor planner, a poor manager, no matter how good his product.

Yet that is the very kind of thing our farmers have been doing for generations. It is one of the basic things we must do every year to achieve real agricultural prosperity. Some day agriculture will be operated, not as a theory of scarcity or a theory of surplus, but on a plan of producing enough. Perhaps agriculture today is too big and too general, but the individual farmer can plan that way.

The man who gauges his production by what he can sell, plus what he can sell, will make money out of farming. He will earn that security we like to talk about, but that to few of us ever achieve.

Behind the Scenes In American Business

(Continued from page two)

which produce is moved from farm to market—the old-line system by which produce reaches the consumer only after passing through the hands of numerous trade middlemen, and the modern streamlined mass-distribution system—pioneered by chain stores—which rushes vegetables to the housewife with a minimum of stops and waste along the way.

TRY TO WATCH—More maroon automobiles—latest survey by Pontiac shows the dark red now ahead of the standard black in popularity; and with gray and blue in third and fourth places. . . . A kit called "Sew Your Own" containing all materials needed for making your own gloves. . . . A radically new photograph record-changer by RCA Victor, which will play both sides of a record without turning it over, can run through a whole two-hour concert without any human-hand help whatever, plays symphonic sets in old-style "one-and-then-the-other" as automatically as it does the mechanical sequence sets. . . . New in the toy line will be magnetically-operated ones by General Electric; magnets in their bases enable them to be put through magic-line games.

Private Harry Holland, Jr., attached to the 111th Field Artillery band, Fort George G. Meade, Md., spent last weekend with his parents, Mr. and Mrs. Harry Holland on Pacific Avenue.

Capt. B. G. Garrett, who has been stationed at Fort Monroe, has been transferred to Pendleton. Capt. and Mrs. Garrett and their son, B. G. Garrett, Jr., are residing at 313 21st Street.

Mrs. Eunice Cole and daughters, Misses Christine and Delta Cole, of Eustis, Florida, spent a week with Mr. and Mrs. H. R. Holland at their home on Pacific Avenue.

Mrs. J. E. Garrett and daughter, Mary Virginia, have returned to their home in Oceana after spending two months in Arkansas visiting relatives. Capt. Garrett is stationed at Fort Story.

Mr. and Mrs. C. H. Waters of Hilton Village are spending a week with Mrs. Waters' parents, Mr. and Mrs. Harry Holland at their home on Pacific Avenue. Mr. and Mrs. Waters will go to New York and New Jersey before returning to their home.

Mrs. C. R. Wilson of Huntington, West Virginia is visiting her son-in-law and daughter, St. Commander and Mrs. F. W. Schoew on Raleigh Drive.

Mrs. Andrew S. Browne of Norfolk is visiting her son-in-law and daughter, Mr. and Mrs. James M. Jr., at their home on 51st St. and Holly Road.

Jack Portersfield of Richmond will arrive today and spend the weekend with Wardlaw Thompson on 98th Street.

Miss Betty Schow who has been visiting Miss Nettie Schoew on Raleigh Drive will return Sunday to her home in Huntington, West Virginia.

The Rev. Joseph B. Dunn, D. D. and his daughter, Miss Martha Dunn, of Richmond will be the weekend guests of Mr. and Mrs. Wilcox Dunn on Arctic Avenue.

Miss Frances Stansbury of Norfolk and Miss Virginia Taylor of Richmond are spending sometime at the Webb Cottage.

Mr. and Mrs. Edward Smoot of Richmond are spending two weeks at the Princess Anne Club.

Mrs. Henry Young, Jr. of High Point, N. C., is spending a week with Mr. and Mrs. Philip Dale Dean on Avenue C.

Mr. and Mrs. George Bernard, Jr., and their two children of New Kensington, Pa., will arrive Sunday and spend two weeks with Mr. and Mrs. George Bernard on 25th Street.

Mr. and Mrs. Edmund Ruffin, Jr., and family of Pittsburgh, Pa., are visiting Mr. Ruffin's parents, Mr. and Mrs. Edmund Ruffin at their cottage at Sea Pines.

Pat Thompson, who has been spending the summer in Indiana, Pa., with his grandparents, Mr. and Mrs. H. J. Thompson returned Wednesday to his home "Mary Mac."

Miss Margaret McIntire has returned to her home in Petersburg after visiting Mr. and Mrs. James Gilliam, of Lynchburg, at their cottage in Cavalier Shores.

Lieut. Claude P. Brownley, 3d, of Fort Bragg, N. C., arrived Tuesday to spend a week's leave with his parents, Mr. and Mrs. Claude P. Brownley, Jr., at their cottage on 55th Street.

Fishman Sharp, Jr. of Baltimore, is visiting his aunt, Mrs. Wardlaw W. Thompson, and Mr. Thompson, at their cottage on 98th Street.

Mr. and Mrs. Peyton Fleming and their son, James A. Fleming, of Richmond, are spending some

time at the Myers Cottage.

Mrs. Corbin G. Waller and her three daughters, Mrs. Anne Byrd Waller, Misses Catherine and Fanny Waller have returned to their home in Norfolk after spending two months at their cottage on 55th Street.

Shower for Bride-Elect
Miss Miriam Smith entertained Monday evening at her home on 17th Street at a lingerie shower in honor of Miss Marian Brothers, whose marriage to Sgt. William C. L. Martell, will take place Friday, August 22.
Those invited numbered twenty.

Theatre Prevues

At The Bayne

"The Shepherd of the Hills," motion picture version of Harold Bell Wright's unforgettable "best-seller" novel, will be featured at the Bayne today and tomorrow, August 15 and 16. Filmed in technicolor, directed by Henry Hathaway, director of "The Trail of the Lonesome Pine," Wright's lusty novel of the Ozarks, of the superstitions and the salty earthiness of the hill folk, brings to the screen an admirable characterization of the Shepherd, portrayed by Harry Carey, John Wayne is cast as Young Matt, hot-blooded, reckless young son of the Shepherd, and Betty Field has the role of Sammie Lane, the half-wild, lovable, tempestuous girl of the hills. Other popular members of the cast are: Beulah Bondi, well-known character actress, James Barton, known to theatre-goers as Jeter Lester of "Tobacco Road," and Marjorie Main, recently featured with Wallace Beery in "Barnacle Bill".

On Sunday, Monday and Tuesday, August 17, 18, and 19, Greer Garbo, whose unforgettable performance in "Goodbye, Mr. Chips" has placed her among the most beloved stars of the screen, will be featured in "Blossoms in the Dust," a tender, poignant story based on the experiences of Mrs. Edna Gladney, of Fort Worth, Superintendent of the Texas Children's Home and Aid Society, Co-starred with Miss Garbo is Walter Pidgeon, who recently gave an outstanding performance in "Flight Command." Featured in the outstanding supporting cast are: Felix Bressart, Marsha Hunt, Fay Holden, Samuel B. Hinds, Kathleen Howard, George Leacey, William Henry and more than 800 children and babies.

On Wednesday and Thursday, August 20 and 21, Martha Scott, George Brent and Paul Lukas will be featured in the new and stirring drama, "They Dare Not Love." You will remember Miss Scott as the star of such outstanding motion pictures as "Our Town" and "The Howards of Virginia." George Brent needs no introduction, since he is one of filmdom's most popular leading men. Paul Lukas will be remembered as one of the screen's ablest actors, and his return will be welcomed by many admirers of his talent.

At the Roland

Today and tomorrow, August 15 and 16, the Roland will present a double billing, including "Bowery Boy", co-starring the popular young singing star, Dennis O'Keefe, and Louise Campbell; also "Dangerous Game", featuring the popular team of Richard Arlen and Andy Devine.

Pettengill

Personages. Note well.

X. Chief of Constabulary.
TAX NOTICE: All bachelors and spinsters above the age of 15 shall report for public work without pay one week in every month until married. If not able to find a Mate duly certified as Fit, evidence that bachelor or spinster is a parent will be accepted in place of marriage certificate. All children are hereby legitimate. Every infant shall be surrendered to its fourth birthday at the County House for proper rearing.

Sarah Dogood, National Guardian of Youth.
NOTICE TO LABORERS: Unemployment has been banished by executive order. All persisting in this vice will be adjudged guilty of an Improper Attitude toward The Program. Beginning the day following Christmas (Old Style) hours of work will be raised from 54 to 60 per week, and wages reduced twenty per cent. It is your sacred privilege thus to contribute to the Nation's Honor on account of incident arising at Dong Dang, Indo China.

Frances Parkinson, Commissioner Extraordinary.
EDUCATORS ATTENTION: It has come to my notice that copies of the infamous document, The Constitution of the United States, have been secretly circulated in certain schools. Warning was previously given under date of June 30. This is the Second Notice. Concentration Camp for Life will be The Fate.

Harry Hillweis, Superintendent of Instruction, per Bridges, deputy.

VEHICLE OPERATORS: The Constabulary for Jefferson County hereby notifies all licenseless carriage operators that their must not be driven when the purpose is merely for pleasure, wastefulness or other non-essential purposes. All gasoline is the property of the State. Beginning tomorrow all users must apply for a Certificate of Public Necessity. Offenders will be taken to the County House for public auction.

Neon Hanks, Manager in Chief of Wheels.
BUSINESS NOTICE: ONE month from this the Constabulary of Ephraim will discontinue two service stations at Rochester; six grocery stores at Hartford; three garages at San Antonio; the spinning mill at Macon; the automobile factory at Toledo, and all Beauty Shops and Women's Clubs in the Union of States. Said establishments are considered non-essential to the Third New Program. Displaced laborers will report at this office to be assigned elsewhere.

Adolph Burley, Lord High Commissioner.
SOLDIERS TAKE NOTICE: Minimum age for Conscription is hereby reduced to age 16. Length of service is increased to four years. Military chaplains of all churches are abolished as weaklings to morale. All newspapers forbidden within two hundred kilometers of Cantonment. Pocket radio sets are proscribed. Soldiers will listen only to Official Programs. Death to violators.

Adequate Wiring Is Required

A well-planned and adequate wiring system helps protect the home owner against poor service from his appliances. There are many symptoms of an inadequate wiring system. Among them are:

- Hesitation of heating appliances to come up to the proper temperatures.
- Dimming of light when heavy current-consuming appliances are turned on.
- Necessity of frequent replacement of fuses or readjustment of circuit breakers.
- SCREEN PAINTING
To prevent screen frames from sticking in place, it is necessary to use a lighter coat of paint when finishing them than is used on the rest of the house. Because the frames, when in place, are not subjected to exposure as the rest of the house, they are frequently not allowed as much opportunity to harden, or they are stored in the basement too soon after painting to allow them to dry thoroughly. The paint may be reduced considerably with turpentine or other thinner or a thin coat of spar varnish to which just enough coloring matter is added for good coverage.

FRIED CHICKEN with a luxurious ALMOND-CUCUMBER GRAVY

by Dorothy Greig

YOU'VE never tasted anything so good as crisp brown fried chicken smothered in this gravy. To the delicate succulence of the chicken itself is added a smooth savory flavor blend of creamy mushrooms, shredded almonds and gently

sauteed cucumbers. For all it is a luxury gravy, there's nothing complicated about the making of it. We simply use as our base condensed cream of mushroom soup—like this:
The Gravy:
3 tablespoons butter
1 cucumber (4 to 7 inches long)
1 can condensed cream of mushroom soup
1 cup light cream
1 cup shredded almonds
Peel the cucumber and cut into small cubes, about 1/4 inch square. Cook the cucumber in butter until soft which takes 10-15 minutes. Add the cream of mushroom soup and mix well. Then add the cream and shredded almonds. Heat, but do not boil. Serve over the Fried Chicken.
The Fried Chicken:
Select tender young fryers, about 3 1/2 pounds each. Cut into pieces for serving, wash and dry. Roll each piece in seasoned flour, dip in egg slightly beaten with 3 table spoons of water added, then roll in bread crumbs. Place large pieces of butter or chicken fat in a skillet and when hot, brown the chicken quickly on all sides. Reduce the heat and cook slowly until the chicken is tender. Serve with "Almond-Cucumber Gravy." Serves 8.

Betty Capps Enters Ohio State College

It was just been learned the Miss Betty Capps has already completed her admission requirements to the Science Department of Ohio State University. Although Freshmen Week at the university does not open until

September 24, nearly one thousand students have passed their requirements for admission to the Freshmen Class.
Miss Capps is the daughter of Mrs. Harvey M. Capps of Oceana, and will return next week from Camp Strawdman, near Harrisonburg, where she is serving as a councillor.

A Reminder

Order Your Coal Now

It's smart to order coal now for three reasons. First, you will be protected against any possible mid-winter shortage or increase in prices. Second, the weather may turn cool suddenly, and you want to be prepared. Third, for more heat and less work, more saving and less waste, order "OLGA" POCAHONTAS STOVE & EGG, PENNSYLVANIA ANTHRACITE, CERTIFIED BRICKETTES, RUN OF MINE SPLIT EGG AND STOVE, or "OLGA" STOKER PEA from

Fuel, Feed & Building Supplies, Corp.

Items Of Interest In Princess Anne

A picnic supper was given Thursday by the Methodist Sunday Schools of Princess Anne County at Dam Neck Beach.

Mrs. Blanch Woodhouse has returned to her home in Oceana after spending two weeks with relatives in Galax.

Mr. and Mrs. Ormond Williams and daughter, Joyce Anne, of Newport News, expect to arrive shortly to visit Mrs. Williams' parents, Mr. and Mrs. H. Edmondson in Salem.

Mr. and Mrs. Robert Push of New Brunswick, N. J., were Sunday visitors at the home of the

latter's aunt, Mrs. Nettie P. White in Oceana. Mrs. Push is the former Miss Janet Connor, and resided at the beach.

The ladies of the Salem Methodist Church will serve a chicken supper Wednesday, August 28 beginning at 5 o'clock on the church lawn. The public is invited.

Mrs. S. D. Pledger has returned to her home in Landtown after visiting her mother, Mrs. E. S. Fisher in Scranton, N. C.

Nature is grand until the weeds begin to grow.

Human nature encourages mankind to find excuses for what individuals desire.

Revolutionizing The Hotel Business

The newest thing in hotel operation is a hygienic program of health protection recently introduced at the Hotel Empire, Broadway and 63rd Street in New York City by Edward B. Bell, its General Manager.

The program involves the complete sanitary treatment of every item the human body contacts while in the hotel. The bathrooms are antiseptically treated by cleansing the toilet, the wash basin, the bathtub, the bathroom floor, all the faucet handles, the flushometer handle and the glassware. The toilet seat and glassware are protected against use by cellophane wrappers. The ice water pitcher and glassware in the rooms have their own cellophane wrappers.

All inns on the beds and in the bathrooms are treated with the same active antiseptic. The spare blanket usually found in the dresser drawer is placed in a specially sealed bag and in order to use it, the seal must be broken. When guests return home at night, they find their beds turned down, all prepared for slumber, except that protruding from beneath the pillows, there is a printed piece of paper portraying a sleeping child with the caption "Sleep like a baby" which describe this new hygiene service.

The Hotel Empire is the first hotel in the world to offer such a comprehensive and complete sanitized service to the travelling public but, as Mr. Bell stated, it is unquestionably a very necessary service and the good hotels of America will soon add it to their usual service.

A.A.A. Explains "What" and "Why" Of Wheat Quotas

Reveals Low Penalty By Penalty

In view of the widespread interest in recent weeks among farmers and the press concerning wheat marketing quotas, the state AAA committee feels that a brief review of the law may clear up some points that may have arisen in the minds of the public, says S. K. Cassell, executive assistant.

The Agricultural Adjustment Act of 1938 provides that a marketing quota for wheat shall be proclaimed whenever the total supply in this country exceeds a normal year's domestic consumption and exports, by more than 35 per cent. Early in the year it was found that this condition would exist in 1941. The Act also provides that when marketing quotas are proclaimed the question must be submitted to farmers affected by quotas in a referendum and at least two-thirds of the farmers voting must approve quotas before they remain in effect. The question was submitted May 31 to all farmers affected and of those voting 81 per cent favored quotas.

Penalty Wheat Quota
For all commercial wheat farms allotments were announced last fall. The usual acreage was announced for non-commercial farms. Growers who seeded with in their allotted acreage, or did not harvest in excess of their

usual acreage on non-allotment farms, have no particular problems in connection with quotas. Moreover, those with excess acreage could dispose of the excess as late as May 15 and comply with quotas. Information received from 83 counties shows that only about 1200 Virginia farmers have excess wheat averaging approximately six acres each, out of a total of about 67,000 growers in the state. About 95 per cent or more of the growers are in full compliance with quota regulations.

Under the regulations a grower who produced excess wheat is liable for a penalty of 49 cents per bushel on the production from the excess acreage, figured on the basis of the smaller of the normal per acre yield established for the farm, or the actual per acre yield for the farm. The entire crop is subject to a lien until the penalty is paid. If a grower refuses to permit his acreage to be checked his entire crop is likewise subject to a lien, because until a check is made there is no way to determine whether the farm has a marketing excess or the amount of the excess.

To satisfy a wheat penalty a grower may: (1) Pay in cash to the treasurer of the county association 49 cents per bushel on the farm marketing excess. (2) Deposit with the county committee funds equivalent to the penalty to be held in escrow. Such funds are recoverable if the acreage of wheat planted for harvest in 1942 is reduced below the farm acreage allotment by an amount equal to the 1941 excess acreage. Par-

tial recovery may be made if the county committee determines that the 1941 actual yield was less than the normal yield established for the farm. (3) Store a number of bushels of wheat equivalent to the excess, under any of the following conditions: (a) Store in a mill or elevator and deposit a negotiable or non-negotiable receipt with the county committee; or, (b) store an equivalent amount of wheat on the farm and give acceptable bond as defined in the regulations to secure the payment of the penalty. (4) Deliver the excess wheat to a warehouse or elevator and turn the receipt over to the Secretary of Agriculture as a gift of the wheat for relief purposes.

Producers who complied with quotas have been issued marketing cards which identify all of their wheat as penalty-free. Growers with an excess but who satisfied the lien by one of the above methods have likewise been issued a marketing card. When a grower has a card no restrictions whatsoever are on any sale or use he wishes to make of his wheat. Buyers of wheat not identified by a marketing card liable for the penalty, which may be taken out of the price paid the seller.

Wheat Loan Program
Last year, with a 65 per cent of parity loan program, wheat in this state averaged about 30-odd cents per bushel. For this year the loan rate was raised to 85 per cent of parity, but the existence of a loan was dependent under the act upon the adoption of quotas. Businessmen agree that it would be unwise to lend Government funds to support the price of a commodity unless there was some regulation on the production of that commodity.

Under the 1941 loan program Virginia farmers can today obtain loans on their No. 2 soft red winter wheat ranging from \$1.16 to \$1.25 per bushel in every county in the state. If the market goes up farmers may pay off their loan, sell the wheat or use it as they see fit. If the market goes down they may give the Commodity Credit Corporation title

Champion Drivers of Virginia

Richmond, Va., July 2—Margaret A. Monteith of McLean and A. J. Mitchell, Jr. of Norfolk are the champion safe drivers of Virginia. They won the titles here late yesterday in a contest sponsored by the Ford Good Drivers League. Both Miss Monteith and Mr. Mitchell will represent the state at the national finals at Dearborn, Mich., in which they will compete against the champion drivers of the other 47 states and the District of Columbia for \$25,000 in university scholarships offered by Edsel Ford, founder of the league. The winners are shown with Col. M. S. Battle, Director of Virginia Division of Motor Vehicles, who presented them with wrist-watches. Left to right: Miss Monteith, Col. Battle, and Mr. Mitchell.

to the wheat in full payment of the loan. Producers who have excess wheat may obtain a loan on their excess, but at only 60 per cent of the regular loan rate. The marketing quotas penalty due on the excess must first be satisfied before a loan may be obtained, otherwise the borrower could relinquish title to the wheat to the Commodity Credit Corporation and that would constitute a sale and the Corporation would be liable for the penalty.

A comparison of records reveals that even those farmers who have to pay some penalty are better off with marketing quotas and the loan program than they would be without these provisions. While with the program today Virginia farmers are assured a fair price, in 1937 without quotas and without a loan the United States farm price of wheat was 96.3 cents per bushel; in 1938, 56.1 cents, and in 1939, 69.1 cents. Back in 1932, when we had a carry-over comparable to the present, the price was 38.3 cents. Department of Agriculture officials estimate that the world price of wheat today, considering the surplus and other factors, would support a price in the United States of not over 40 to 50 cents per bushel. Some estimates place the figure as low as 35 cents. It is for this reason, they say, that a farmer who even has to pay a 49-cent per bushel penalty on a part of his wheat crop is better off today than he would be without marketing quotas and the loan. Obviously the remaining approximately 96 per cent of the wheat producers who are in full compliance with the program

As Others See It

(Continued from Page Two)
 ivity within the organization. The Red elements, have been banished and a new union soon will be established.

If there were not a great many Communists within the union evidence shows that many of the members considered themselves as only Communists would. First they tried to prevent the referendum that finally settled their outer. Then they announced they would not be bound by the decision. Now they are insisting that their delegates shall be seated at the convention of the Federation next August. Several have indicated that they will take the matter into court.

These widespread reports of Communist activities in Teachers' locals have terribly weakened the movement for trade unionism among teachers throughout the country. That is the saddest part of the whole matter. With no assurance that the American Federation of Teachers has entirely rid itself of Communistic influences, there is small chance for an effective and respectable union for teachers within the next few years. Until teachers in the United States schools cease following the "party line" in the classrooms, their organization cannot hold the respect to eliminate from the federation the most despicable Red groups as a body, but to dismiss them individually from the school system is a far braver step that seldom has been taken. It is a step that should be taken for the welfare of every student in the class. American schools are the greatest instruments of democracy and the expulsion of subversive instructors should be carried out without delay. The American school system cannot afford to be indulgent toward these fifth-column educators. No half-way measures will do.

Native Son Honored

The State Board of Education made a wise decision in its selection of Dr. Joseph H. Saunders to be chairman of that important body in succession to Sinclair Brown of Salem, resigned. Dr. Saunders' experience in educational affairs especially fits him for the administrative duties of the office he has been called upon to fill.

The office of chairman of the State Board of Education, while honorary and without emolument, is highly important and it is wise that the board has come to realize that a professional educator should direct its affairs.

Dr. Saunders, has been a member of the State Board for some years and knows the requirements of its chairmanship. He is now, and for some years past has been Superintendent of Instruction of the city of Newport News and in additional has held important posts with the national Education Association.

NEWS OF INTEREST

ARE WEAS GETTING BETTER?

The unexpected has happened in Russia and the Capital of the United States has been switching towards the belief that Hitler will lose the war. There has been as much optimism and hope in Washington of late as there was pessimism and gloom sixty days ago. It didn't take the Washington Government long to offer aid and military supplies to Russia. Apparently anybody that'll help Hitler will get help from our Administration. That's exactly why Harry Hopkins flew to Russia to talk with Stalin, and report to President Roosevelt and Winston Churchill.

The Japanese situation isn't worrying Washington and it is the belief of the Capital that "if worst comes to worst" Japan will wash-up in about the same way Mussolini practically faded out of the picture.

While Summer Welles was Acting Secretary of State he succeeded in bringing Vichy France back to life, as a result of which the Petain government refused to consent to Germany establishing a naval base at Dakar, West Africa. The Captain of the ill-fated Robin Moor convinced official Washington that his ship was sunk by a German submarine that had come out of the harbor of Dakar. Undoubtedly, that was one of the reasons why the able Mr. Welles told Vichy in blunt plain language that it couldn't continue to look to the United States for support if it gave up Dakar to Hitler. The United States representative to Vichy is Admiral Leahy and he must share the credit of having prevented Hitler from capturing and plowing under the Petain Government.

The month of August furnishes hope that some unpredictable incident will bring this terrible war to a close "sooner than anybody expected."

MUST STAY IN THE ARMY

Many Congressmen have opinions about the length of time in which National Guardsmen and reservists should stay in the service. What is really going to happen is forecast by the votes taken in the Senate on the "raft amendment for an 18-month limit." This proposal was defeated by a vote of 50 to 27. That clearly indicates that the recommendation of President Roosevelt to keep all draftees and Guardsmen during the period of the present emergency will be the rule.

In case the war should collapse the young men in the service will be dismissed as speedily as possible, but if the war continues the service men will be kept in the Army. The time has gone by when it is useless to protest "that this is not right." Whether it is, or not, the above is a plain statement of fact based upon the position of the Army, the President and Congress.

24 HOURS A DAY FOR DEFENSE

At Meriden, Connecticut, there is a family which has an unusual distinction. Gennaro DeAngelis and six of his fourteen children are working 24 hours a day on products for national defense for the New Departure division of General Motors.

Gennaro and three daughters work on the first shift, making defense ball bearings for machine tools, airplane instruments, tanks and guns. Two sons, Pasquale and Louis work on the second shift, and Alfonso is on the third shift. Perhaps there are other patriotic families in various parts of the country who are contributing so fully to defense production. If there are, the Meriden DeAngelis' will gladly share with them the distinction of working the clock around to produce the defense materials the country needs.

A LIGHTING PLACE FOR AIRWAYS

The new Washington National Airport is the world's most modern commercial air field. It has all the latest gadgets, including an electric bulletin board that will post instantaneous information of plane movements between this airport and other airports within a radius of 200 miles. If you haven't seen the new Washington airport, then "you ain't seen nothing, yet."

ROLLING AROUND

The power of Government is increasing day by day. The control of production; investments, life insurance, prices, food, textiles, and luxuries and necessities of life is a vicious circle.

DON'T GET SCARED

The Monroe Doctrine and the Good Neighbor Policy are in first-class condition. The Western Hemisphere seems to be tied to-

gether in twenty-one solid knots and any one that attempts to untie any of the knots will regret it. Japan will be taken care of if she gets rough with our possessions in the Pacific.

Price control may sound very wicked, but the object is to prevent runaway prices and inflation.

Taxes are going to be higher than anyone ever expected, but no one expects that they will be any higher than they look right now.

The boys will not get out of their uniforms as soon as they expected but Russian results indicate that American soldiers will not be needed overseas.

Defense production has attained terrific speed and the OPM in Washington is simply crying for more so that there will not be less.

Foreign trade is on the bum but when the war is over there will be a boom in agricultural products and all kinds of supplies in Europe. Remember 1919.

"Priorities" isn't a very word—it simply means the Government asks for the preference in its orders for defense deliveries.

There wasn't any talk about aluminum in the last war and the greater part of this war can be run without it—but it is a preferable material for certain defense machines; so housewives didn't object to throwing in their pots and pans.

There are surpluses of oil, and rubber, and trucks and railroad cars. Planes and bombers are getting thick in the air, and new houses are sprawling all over the landscape from the Atlantic to the Pacific.

Bread and milk are plentiful, and so are lamb chops, meat, beef steaks, and fresh fish. Oh boy, there never was such corn as we have this year.

Next year's Congressional and State elections will be up for consideration in less than 12 months and the voters will have an opportunity to tell some of these smartaleaks in Washington to stay home.

So don't let your blood pressure go any higher.

DIFFERENCES OF OPINION

President Thomas of United Automobile Workers of America says that the proposed drastic curtailment of automobile manufacturing is not intended to increase defense production. That's interesting, indeed! Mr. Thomas says he was told in Washington that automobile workers would not be immediately transferred to defense jobs, but that on the contrary plants would shut down in such numbers that "large automobile-producing centers like Flint, Pontiac and Saginaw, might become 'ghost towns.'"

There seems to be perfect agreement in statements made by Price and Supply Administrator Leon Henderson, and labor union leaders, that the auto industry and the Government have no concrete plan to employ 200,000 or more automobile workers in defense plants—if they are forced out of their jobs in automobile factories.

A staff writer for the Washington Star states in a news item from Detroit that "transportation is going to be in greater demand" than in previous years because of the very circumstances that are forcing a curtailment of car production.

The latest report—which may be an alibi—is that automobile production is being limited because cars cannot be manufactured without steel, and there is no substitute for that material. This does not impress the United Automobile Workers, who insist that radical curtailment of automobile production would bring "ghost towns" to Michigan. An even broader view of conditions shows that every State and every community in the Nation contributes its products for the building of automobiles, and that every town and crossroad would be seriously affected, from a economic standpoint, in case highway transportation is cut down.

The OPM Industry Advisory Committee states that auto makers will be given increased defense orders wherever it is possible to utilize men and machines released by production in automobiles. As a matter of fact the automobile manufacturers have almost doubled production of defense materials in the past 9 months.

WOMEN'S STOCKINGS

To wear or not to wear! That question has been met this week by thousands of women in Washington and in every city in the nation who have stood in line in the principal stores in the country waiting to buy silk stockings. The excitement in the National Capital was second only to the alleged shortage of gasoline. The women of Washington were no different from the women of other cities in their willingness to contribute their pots, pans and kettles to the LaGuardia aluminum collections.

Our women have all gone right to bat on every proposition of the war, but if there was any differences of opinion among them

it was all wiped out by the closing of the silk mills. And now there are "runs" in stockings.

HIGHWAY TO MEDICAL PROGRESS

"Vivisection" is an unpleasant word. It brings with it to the uninformed only a picture of cruel and unnecessary surgical experiments upon living animals.

Those who fight vivisection are moved by humane ideals. Their error lies in a lack of knowledge of the facts—and in a misplaced sentimentalism in the approach to the solution of scientific problems of the highest importance.

If vivisection were not permitted on guinea pigs, rabbits and other lesser animals, the experimentation would have to be done on human beings. There is no other way out. The medical profession's most outstanding achievements have usually followed experimentation on animals. No theory is tenable until proved. And it can only be proved, definitely and for all time, by trying it on living beings.

Think back over medical history. Pasteur experimented with dogs, and the result was the discovery of a sure preventive for one of the most horrible and hitherto incurable diseases—rabies. Ross experimented with a careful of larks—and a start was made toward conquering malaria. Roux and Behring killed thousands of guinea pigs—and diphtheria antitoxin was discovered, and one of the great scourges of mankind was brought under control.

So the story goes, down the record of medical progress. Vivisection and experimentation on animals, properly conducted by qualified men, have been the means of saving millions of human lives. Always—when animals are subjected to surgery, they are placed under anaesthesia. In truth, more suffering by far is caused by hunters than by the experimentation of medical men. However, these experiments lead to methods of control and cure of disease not only in human beings, but of other animals as well. Experiments have but one purpose—longer, happier, fuller lives for all the people.

Experimentation on animals should never be permitted by the untrained. And it should never be denied to men of science. It provides the great highway to medical progress.

State Court Clerks Hold Annual Meet

The Virginia Court Clerks' Association will stage its thirty-first annual convention today and tomorrow at the Cavalier Hotel, with an attendance of more than one hundred expected.

The assembly will be called to order at ten o'clock on this morning in the Colonial Room of this hotel. Following the invocation and roll call of members, an address will be made by the president of the association, E. F. Hargis, clerk of Russell County. Also during this morning session, reports will be made by George R. Walker, of Prince George County, secretary, and by Jesse N. Basing, Pulaski County, treasurer of the association and by members of the Advisory Committee. The business of the morning session will include presentation and election of new members, appointment of committees, introduction of visitors, and a general discussion pertaining to duties and procedure of Clerks.

The feature of the afternoon session will be a talk by the Honorable William M. Tuck, Democratic nominee for lieutenant governor of Virginia, who will be introduced by Mr. Ernest C. Lacy, Clerk of Halifax County.

The social highlights of this assembly will be the banquet tonight of which the Hon. Walker C. Cottrill, clerk of the Circuit Court in Richmond, will be the hostmaster. The speakers of the evening will be His Excellency, James H. Fries, Governor of Virginia, the Honorable Harry F. Byrd, United States Senator from Virginia. Following the banquet, a dance at the Cavalier Beach Club, where Paul Pendarvis and his orchestra will present special music in honor of the distinguished guests.

The Clerks will convene on Saturday morning at ten o'clock, when an address will be made by the Honorable C. H. Morrisett, the State Tax Commissioner. Following this address will be remarks by several State officials in high office, including the Honorable R. R. Combe, clerk of State Senate, Honorable A. P. Staples, Attorney General, Honorable L. Roy Hodges, State Comptroller, Honorable L. McCarthy Downs, Auditor of Public Accounts, Honorable Edwin B. Jones, State Treasurer, and the Honorable Marion S. Battle, Director of the Division of Motor Vehicles. Reports of Committees and election of Officers will be followed by adjournment.

Now is Time for Farmers to Sign AAA Farm Plans

Maximum Soil-Building Payment for 1942 Outlined

A 1942 AAA Farm Practice Plan, which indicates whether a farm participates in the Agricultural Conservation program, is now available to every Virginia farm which participated in the 1941 program and every non-participating farm for which the operator requests before November 1 to be considered a participating farm in the 1942 program year, says the State AAA Committee.

While October 31, 1941, is the last day that the 1942 farm practice plan may be signed, farm operators who are interested should contact county and community committees without delay. Until the farm practice plan is signed, a farm will not be considered as participating in the 1942 conservation or parity programs and will therefore not be eligible to submit applications for either conservation or parity payments. However, failure to execute a farm plan will not excuse a farm operator from the provisions of any marketing quota law that may affect the farm.

The approximate maximum 1942 payment which may be earned by carrying out approved soil-building practices on the farm will be shown on the farm practice plan. This payment will determine the amount of conservation materials which may be approved for the farm under the 1942 program.

The soil-building allowance determined for each farm will be the sum of: 1. \$2 times the acreage of commercial orchards on the farm; 2. 70 cents times the acreage of cropland in excess of the sum of the 1941 acreage allotments, used in computing payments for tobacco, cotton, wheat, peanuts and potatoes; 3. 25 cents times the acreage of fenced, non-

Saturday night the Clerks and their guests will join other colonists in the dance at the club. Many of the group will remain over the weekend at the Cavalier hotel.

In addition to those above mentioned, the other officers of this association are Walker C. Cottrill, first vice president, who is clerk of the Circuit Court in Richmond; J. Robert Switzer, second vice president, Clerk in Rockingham County, and R. A. Edwards, third vice president, Isle of Wight County Clerk.

Progressive Gains Outlined Planning Hints

General progress is being made toward the FHA's objective of "encouraging improvement in housing standards and conditions," Administrator Abner Ferguson recently announced.

The Federal Housing Administration is continuing to exert its influence toward this general objective, according to the Administrator.

Efforts of the Federal Housing Administration, Mr. Ferguson said, have resulted in:

Expedition of recovery in the building and allied industries.

Encouragement of private-capital investments in the home-mortgage field.

A more uniform flow and wider distribution of home-mortgage funds.

A lower and uniform available interest rate on home-mortgage securities.

Improvement of mortgage-lending practices.

Improvement of building standards.

crop, open pasture land in excess of one-half of the number of acres of cropland which is capable of maintaining during the normal pasture season at least one animal unit for each five acres; 4. 31 times the 1940 acreage of commercial vegetables determined for the farm under the 1940 ACP, applicable only to farms having three acres or more of commercial vegetables in 1940.

The Farm Practice Plan, says the AAA, helps the individual to select and carry out soil-building practices which he and the committeeman agree upon as most needed on the farm, and will enable the farm to participate to the fullest extent. Participation in the program is voluntary. While a farmer may not be able to carry out in one year all practices listed on the farm practice plan, they afford him a workable plan to keep in mind for succeeding years.

Included in the 1942 program, as in 1941, will be a special allowance of \$15 which farmers may earn by planting forest trees, in addition to any other allowance which may be computed for the farm. The 1942 program continues the \$20 minimum payment that may be earned on any farm which, plus the \$15 tree-planting provision which may be earned by planting trees, makes it possible for producers on any farm to earn as much as \$35.

Added Attraction At Terrace Club

Petite Princess Zoeta, noted televisionologist, who is appearing nightly at the Terrace Beach Club, is attracting much attention with her mental act. This "Girl Who Sees Tomorrow" has won fame for her clever performances, and came to Virginia Beach from the Beachcomber Night Club in Baltimore, where she concluded a seven weeks' engagement.

Wiley Crockett Sent To Officer's School

Corporal Wiley Crockett left Tuesday for Fort Sill, Oklahoma, where he will attend field artillery school for the next three months. Corporal Crockett has been attached to Headquarters Battery, 2nd Armored Division, 76th Field Artillery in Fort Benning, Georgia, and was one of three picked from 100 applicants at the Fort Benning post to attend the artillery school. He will receive the rank of second lieutenant when he completes the course.

Comments And Resumes on War

In wars, as in horse races, the long shot occasionally upsets the dope and comes through for a win. Some of the experts are now cautiously hazarding the guess that this may prove true of the Russians.

When the German-Russian war began, the bulk of the military authorities reluctantly agreed that Hitler was probably right when he said that it would be over in six weeks. Those six weeks and more have now passed, and the Russians, instead of retreating in confusion, are said to be planning gigantic counter-attacks. The Germans have not taken any areas of major importance. The Red air force, which, according to German claims, was almost totally destroyed in the early days of the fighting, is still very much in evidence and is giving excellent support to the Soviet land forces. The Red mechanized equipment, which was supposed to be second-rate, has, according to some reporters who have seen it in action, actually proven equal and even superior to the German. Most important of all, the morale of the Russian people—military and civilian alike—seems to have proven far more staunch than anyone expected.

Germany has not lost the Russian war. It would not come as any great surprise if Hitler's forces yet succeeded in taking Moscow, Leningrad and other key cities. But these would be hollow victories unless, at the same time, Hitler was able to destroy Russian military power. So long as substantial Red armies remain in existence and are fighting, Hitler will not be safe no matter how much Russian territory he succeeds in conquering. On top of that, Russian civilians have shown an almost suicidal fervor in destroying areas which have been evacuated, and in sniping at German troops. The Russians are fighting a total war in total fashion now, and they have demonstrated surprising courage.

Best of all from the British-American point of view, is the apparent fact that Germany is suffering terrific losses. On August 2, the Russians claimed that 1,500,000 Reich troops had been killed, wounded or captured. That may represent a big exaggeration—neither the Russian nor the German propaganda ministries can be depended upon for the whole truth. But, if even a third or half that many German

troops have been incapacitated, it is a severe reverse to Hitler. The first divisions sent into Russia were the cream of the German crop—the tough veterans of the Polish, French and Low Countries campaigns. No nation can create soldiers of that quality overnight. That may explain reports to the effect that the reserves Germany has lately sent into Russia have proven inferior in quality to the men who preceded them.

It also seems unquestioned that Germany has lost vast quantities of aircraft and mechanized equipment—and has consumed immense amounts of oil, that most precious of war materials. Russian bombers have been invading the Rumanian oil fields, and may have done considerable damage. And in the meantime, Britain has been carrying on determined, big-scale air raids against the Continent.

At the beginning, British spokesmen had little to say of Russian chances. They were frankly skeptical. Now they are saying that the Russians have actually stopped the Germans, and that there is no possibility of the campaign ending before the winter rains set in. If that is true Germany will be in for a war of position—and that is precisely what Hitler cannot afford. In addition, Britain gets stronger as Germany weaker. This war isn't over yet—but not since it started has the outlook been so good for the Allies.

In time, news of the German reverses and losses is bound to seep through to the German people, no matter how much baloney Dr. Goebbels puts out through press and radio. Then, think some, German morale will start to crack. It is a fact that in the last World War, Germany went to pieces in a matter of a few months, and the main reason for that was the collapse of morale at home. Will it happen again?

Congress has again demonstrated that a considerable and influential bloc of its members are dead set against levying direct taxes against persons in the lower income brackets.

That happened when President Roosevelt requested a number of changes in the new tax bill, one of them being to lower income tax exemptions to \$750 for single persons and \$1,500 for married persons. The House Ways and

(Continued on Page Five)

Red Cross Starts Home Defense Work

Wives of Army and Navy Personnel Join Local Chapter In Conducting Classes And Making Dressings

According to Mrs. Harry Baldwin Gantt, Chairman of the Red Cross committee of Fort Story and Camp Pendleton, about 75 persons, members of the American Red Cross and wives of Army and Navy personnel, attended a meeting held last Tuesday at the Officer's Club at Fort Story, and made plans for fall and winter activities to include the following schedule of training and production:

On Monday, gas mask demonstration will be held at the hospital at Fort Story at 1:30 o'clock, p. m. This demonstration is open to all who wish to participate, either actively or to observe. Those who wish to participate actively are requested to telephone Mrs. F. H. Steele between 2:30 and 3:00 p. m. in order that gas masks may be supplied.

On Tuesdays and Fridays, beginning Tuesday, August 26, a Motor Corps unit will be trained at Holt's garage promptly 1:30 p. m. According to Mrs. Gantt, several prominent Virginia Beach women already have signified that they will take this course. In view of the fact this is one of the most important courses to be given and that the number of students must be limited to 20, it is requested that those who enroll should do so with determination to complete the course. Uniforms, consisting of top-coats, caps and black oxfords, may be purchased through the local chapter of the Red Cross.

Immediately following the Motor Corps Class to be held at Holt's Garage, Dr. McNeal will conduct a class in Motor Corps First Aid. This course will be conducted at the Fort Story Hospital, at 3 o'clock. Transportation will be furnished those attending this class.

Other courses to be offered during the fall are to include the Gray Ladies course, Nurse's Aid, Staff Assistants and Braille. All persons interested in these courses are invited to communicate with Mrs. McNeal at 156W1.

In view of the fact that surgical dressings, clothing and other items are so badly needed at this time, all those who can possibly find time to assist in the production of these articles are requested to participate in this work. Those in charge of the Wool Committee are: Mrs. Willard White, Chairman, Mrs. Henry A. Miley, Jr., who will assist the knitters, and Mrs. Robt. Kiser, Jr., who will inspect the finished product. Miss Cornelia Holland has volunteered to advise the knitters. Wool will be furnished by the Red Cross to those who wish to assist in this work.

Mrs. W. R. Mitchell, Mrs. Craig, Mrs. Hurt and Mrs. Hendon will conduct classes in surgical dressings. Mrs. E. L. Hill, Mrs. W. N. Thomas and Mrs. E. M. Ford will supervise the packing of these dressings.

Sewing classes will be conducted by Mrs. H. F. Harding, and volunteers are requested to communicate with Mrs. Harding at 187.

The Fort Story and Camp Pendleton Committee of the Red Cross is cooperating with the Princess Anne Chapter in conducting these classes, and in view of present conditions, everyone should do his part in order to prepare for any eventuality.

County Youth Accidently Shot

A Princess Anne youth, Alfred Green of Route 2, Burton Station was admitted Wednesday to St. Vincent's Hospital after emergency treatment for a pistol shot wound in the chest.

Chief W. S. White of Princess Anne County listed John Wright, of Burton Station as the person who fired the bullet that passed through the boy's body.

Hospital attendants stated that Green's condition was not critical.

County Schools Open Thursday Sept. 4th

Schools of the County including the Willoughby T. Cooke School at Virginia Beach will open Thursday, September 4th it was announced this week.

All pupils will be expected to report to their respective schools at 9:00 A. M. for enrollment and parents are urged to send their children on the opening day in order that there may be no delay in opening procedures. Friday will be a regular school day with classes being held throughout the day.

Children entering school for the first time must present a birth certificate before they can be enrolled. Parents are urged to secure same immediately if one has not been obtained. The attention of the parents is also called to the new state regulation which provides that no child may enter the public schools of the state who has not reached his sixth birthday on or before September 1st. Parents are requested to note this and not present their children for enrollment unless they have met the necessary age requirements.

As in the past all children entering school must have been vaccinated against smallpox.

Text books will be handled from the School Board office as in the past. Parents are urged to secure their children's books on the opening days. Orders will be placed with the individual teachers and it will be of material assistance to the teacher and the work of the school if all books can be purchased at the opening.

Army Doctors Take Heed

"Say what you mean" is the warning to doctors and dentists of the Army. At Camp Meade, the following incident forcibly emphasizes this point. A selectee of the 11th Infantry having trouble with his teeth reported to the dental clinic for treatment.

The dentist upon finishing his job on the youthful soldier's teeth said, "Now you can go home."

Obedient to that order, the soldier went, but now finds that he is back-in-camp and in the dog-house for being A. W. O. L.

New Ice Company To Open Soon At Virginia Beach

Local Youths Pass Air Corps Test

William J. Ward, Virginia Beach, who passed his physical examination this week, was among the seven applicants applying for appointment to the Flying Cadet School at Randolph Field, Texas. Final educational and physical tests will be given at Langley Field.

Another Youth, Jack W. Ruby of Virginia Beach, has successfully passed his physical examination for the Flying Cadet School and will also take final tests soon.

Recruits are still needed for the Air Corps at Jefferson Barracks and at Biloxi, Miss., and for the Infantry, Coast Artillery, and Chemical Warfare Service in Panama.

Big Berthas to be In Action Today

Warning Given To Local Residents To Guard Against Percussions.

Residents of the Fort Story and Virginia Beach area have been notified that the Pennington Coastal Defense Battery will be manned for target practice by a unit of the 24th Coast Artillery, beginning at 1 o'clock this afternoon, and have been warned to lower their windows during the period of the practice.

All personnel of the Post have been advised to keep clear of their quarters and offices until the firing is over.

No pedestrians or motor traffic will be allowed on Route 60 or through the reservation during the period of practice.

Federal Government Gives Grant For Construction Of Recreation Center At Beach

County Man Fatally Injured in Accident

Albert William Gray, of Route 1, Lynnhaven, was killed instantly yesterday afternoon when the truck which he was driving overturned on Route 60, about a mile west of Ocean View.

Dr. H. F. Dormire, Princess Anne County Coroner, said that Mr. Gray apparently attempted to jump or fell from the Bayview Farms truck he was driving, and the rear wheel passed over his head, causing a fractured skull followed by cerebral hemorrhage.

Apparently, the machine got out of control on the wet concrete, skidded and careened over on the right side.

Mr. Gray is survived by his wife, Mrs. Irma M. Gray; a son, Granville Gray; three sisters, Miss Ruth Gray, of Bedford; Mrs. Joe Frasca, of Alken, S. C., and Mrs. George T. Whitehurst, of Bedford; three brothers, Earl, Oscar and Berkeley Gray, all of Bedford, Virginia.

Interment will be in Bedford. Mr. Gray was a former resident of that city before coming to Lynnhaven.

Troopers Club Entertain Soldiers

A program of songs and specialty dances by The Troopers Club, Unit Three, entertained the service men at Fort Story Tuesday night.

This troupe of entertainers was sent out by the Y. M. C. A., and the performers were from the Hollywood School of the Dance in Portsmouth and the Eva Mae School of Dancing, Norfolk.

The soldiers from Fort Story and Camp Pendleton were entertained last week by the National Catholic Community Service at a dance given at the Holy Trinity gymnasium at Ocean View. About four hundred guests were present.

Site Already Purchased By Town From N.-S. Railway

Chamber Board Met To Arrange Annual Membership Meeting

Treasurer Makes Report On Financial Condition Showing Surplus On Hand.

The Board of the Chamber of Commerce held its regular meeting on Tuesday night. The principal business under consideration was the making of arrangements for the annual membership meeting and a report from Treasurer at to the receipts and expenditures as well as the general financial condition.

It was decided that a dinner meeting be held some time early in September, the exact date to be announced, at which time a prominent out of town speaker will be present, several having been suggested who are well informed on Chamber of Commerce work.

Col. H. L. Rice, treasurer of the organization, made a report on the present financial status. The anticipated receipts for the fiscal year were placed at \$8,200 of which amount approximately \$6,200 has been collected. Col. Rice stated that it was reasonably certain that the anticipated amount would be reached.

He reported to date the amount expended have been \$4,314.00 with all major bills having been paid leaving a surplus of around \$2,000. This expenditure included 50,000 folders on Virginia Beach costing \$1,900; 40,000 Hotel and Cottage Directories at a cost of \$235; photographs \$100.00 and the balance expended in office expense and salary.

Popular Rector Fatally Stricken

News has been received here of the death on Wednesday morning in New Haven, Conn., of the Rev. Herbert N. Laws, rector of Emmanuel Church, Kempville, Old Dominion Church, Princess Anne County, and Church of the Epiphany, Norfolk.

At the time of his death Mr. and Mrs. Laws were visiting their daughter, Mrs. Dennison Laws Burton.

Born in Millwood, Virginia May 1, 1864, Mr. Laws was the son of the late Joel Newton and Mrs. George Kerfoot Laws. He was graduated from the University of Chattanooga in 1896 and later attended Colgate.

Following his ordination in 1922 he was made rector of three churches on the Eastern Shore: Holy Trinity, Onancock; St. George's Pungoteague; and St. Michael's, Belle Haven.

Mr. Laws in 1930 accepted a call to the Church of the Good Shepherd, Richmond. He served this parish until February of this year, when he became rector of the three churches in this vicinity.

Although serving in this diocese but a few months, Mr. Laws had made many friends and his death will be keenly felt by the communicants of his three parishes. Funeral services will be conducted at St. George's, Pungoteague, today at 2:30 p. m.

Dancing Shoes For Army Boys

A news item on the latest fashion in shoes for the U. S. Army is causing much interest. A low shoe, a tan blucher oxford for duty wear is now being considered with a thought to its suitable use for tertiorecan and drawing room duties.

The quartermaster depot at Boston announced the distribution of invitations for bids for 1,250,000 pairs of these "dancing" shoes.

President Roosevelt Gives Approval of Allocation of \$124,000.00 for Improvements

Recreation Hall and Athletic Center To Be Created For Use Of Soldiers At Fort Story and Camp Pendleton.

The Virginia Beach Defense Service Committee recognizing the needs of a recreation center at Virginia Beach for the use of the selectees and other enlisted men as well as officers applied to the Federal Government for an allocation for the construction of an adequate building which would serve the purposes for some 10,000 men stationed in this surrounding area. In addition it was planned that an athletic field be constructed in conjunction with recreation center. Official application was made for an allocation of \$124,000.00 for this purpose.

It was learned this week through Hugh Lynn Cayce, Secretary of the Defense Service Committee, that this allocation had been approved and funds would shortly be forthcoming to provide for the construction of the Center.

In anticipation that this approval would be given to the application for the grant, the Town of Virginia Beach has already arranged for a site. Negotiations have been virtually completed pending valuations determined through appraisal committees to purchase two blocks of land between 51st and 53rd Sts. to the West of Pacific Avenue from the Norfolk Southern Railway. This plot of land measures 600 feet and runs Westwardly from Pacific Ave. 364 feet. This purchase has been arranged for by the Town by waiving tax payments on physical properties of the Norfolk Southern located within the Town limits until the agreed price has been equalled. Two appraisal boards have been appointed to represent the parties concerned to arrive at an equitable valuation.

At the present time the Parish House of the Galilee Episcopal Church has been rearranged and put in use as the recreation center for the boys at the two camps. Reading rooms and writing facilities and other incidental needs have been put in service. Mrs. E. G. West is hostess now in charge and welcomes all enlisted men.

At the present time the Parish House of the Galilee Episcopal Church has been rearranged and put in use as the recreation center for the boys at the two camps. Tides and Sun

(Reported by U. S. Weather Bureau, Cape Henry)

Friday, Aug. 22—High Water, 7:28 a. m.; 7:43 p. m.; low water, 1:29 a. m.; 1:39 p. m.; sun rises, 5:28 a. m.; sun sets 6:47 p. m.
Saturday, Aug. 23—High water, 8:14 a. m.; 8:27 p. m.; low water, 2:09 a. m.; 2:23 p. m.; sun rises 5:27 a. m.; sun sets 6:46 p. m.
Sunday, Aug. 24—High water, 8:58 a. m.; 9:13 p. m.; low water 2:48 a. m.; 3:06 p. m.; sun rises, 5:26 a. m.; sun sets 6:44 p. m.
Monday, Aug. 25—High water, 9:45 a. m.; 10:00 p. m.; low water, 3:29 a. m.; 3:55 p. m.; sun rises, 5:29 a. m.; sun sets 6:43 p. m.
Tuesday, Aug. 26—High water, 10:33 a. m.; 10:49 p. m.; low water, 4:12 a. m.; 4:46 p. m.; sun rises, 5:30 a. m.; sun sets 6:42 p. m.
Wednesday, Aug. 27—High water, 11:24 a. m.; 11:40 p. m.; low water, 5:00 a. m.; 5:44 p. m.; sun rises 5:31 a. m.; sun sets 6:40 p. m.
Thursday, Aug. 28—High water, 12:19 p. m.; low water 5:55 a. m.; 6:48 p. m.; sun rises 5:31 a. m.; sun sets 6:39 p. m.

Note: Above tides are calculated for Virginia Beach. To correct for other points make the following additions to the last figure: Naval Operating Base, 6 minutes; Lynnhaven Inlet, 6 minutes; Cape Henry, 5 minutes.

PETTENGILL

"The Gentleman from Indiana"

QUO VADIS?

It seems plain that we are in for a boom period due to war orders and national defense buying. The war may last three months or three years. While it is on there will be a feverish prosperity. People will be quite busy killing people.

But when war buying comes to

MICKIE SAYS—

YA KNOW, FOLKS, THIS NEWSPAPER MEANS A LOT MORE TO US THAN A LIVING—WE LIKE TO FEEL THAT WE HELP FOLKS SOME TIMES, AND ARE DOING OUR BIT TO MAKE LIFE MORE PLEASANT

an end; when the bill is presented to our children; when, as John L. Lewis said, the 10,000,000 men now in uniform and the 70,000,000 civilians servicing the soldiers look for other jobs, what then?

Virgil Jordan, president of the National Industrial Conference Board, leading statistical and fact finding organization, believes that "We shall be confronted inevitably with the prospect of the deepest and most prolonged depression this country or the world ever experienced. . . . As for public debts, the whole experience of history points to no other end than that of repudiation, either through inflation or actual default. . . . The American standard of living will be lower than at any time in our country. . . . The effects of this world catastrophe are going to be more devastating in every aspect of human life than anything that has been recorded in modern history. It will probably require most of the remainder of the century to emerge from the economic disintegration which will result."

Of this dark prophecy two things can be said, first, that it will be deferred for a few years, and, second, the storm may not be as bad as he foresees. But that no storm is coming, no prudent person will assert. Joseph P. Kennedy, who flew back from London last November to cam-

"THE VOICE of a majority, swaying the course of government does not insure good government except it be the voice of a well-informed and well-intentioned people."

TIME

Some four hundred years B. C., astronomers began to formulate some systematic method of measuring time. This, of course was based on the solar system and as a result thereof what is known as the sidereal system was formed, measuring time on a twenty-four hour basis beginning at noon of each day or when the sun crossed the equator. Under this method sun dials, water and sand glasses were developed which measured out the hour, likewise candles were burned to signify the time of day. However, as progress was made in civilization it developed that this system did not prove entirely accurate for measuring the time due to the daily change of the relative position of the world to the sun and, therefore, a mean time system was adopted. This system was established on the position of the world as the sun passed the equator and the basis of the day was figured on twelve hours beginning at midnight. It was learned after careful study that the daylight lost ten seconds per hour per day and, therefore, the differences of the present standard time in the various parts of the world.

On January 16, 1484, Bernard Walter performed a clock as a measure of time. This clock was operated by weights with a gear of fifty-six teeth representing each hour. However, it was learned that it lost approximately four minutes per day or during the course of one year lost one day. Some two hundred years thereafter the pendulum system was developed which is the basis of our present clock system. This gives a far more accurate time and has today reached the stage of reasonable uniformity throughout the world.

In 1880 there were innumerable standards of time, so in October 1884 there was an international conference held in Washington at which time was introduced a program for the universal time of day. This has been accepted throughout the universe as a basis of comparison. Greenwich was accepted as a meridian to compute time and ten seconds has been added or subtracted per hour in reference to certain sectors of the world, either East or West.

Having once established standard time with reasonable accuracy throughout the world, after centuries of work by scientists, there would seem little use of experimentation with time changes.

During the first world war there was inaugurated in this country what was known as daylight saving time that is moving the clock forward one hour during the Summer months on the basis that it would increase production and curtail certain expenditures in power production. This was a nation-wide policy and therefore operated with reasonable accuracy and little confusion. Since that time several sections of the country have continued the practice resulting in a continuous confusion, and in our opinion little benefit. The excuse for this procedure has, in the past, been that it gives the working man more free hours, which in turn proves to develop more efficiency. This logic we believe to be somewhat fallacious, our basis being that the vast majority of the laboring class of people live in congested areas and close housing conditions go on daylight saving claiming that it is beneficial to the defense program as an economy in power production. It is noted however from statistics furnished by power plants in states where this plan has been adopted that consumption has not decreased, and therefore, no financial saving as a result thereof and merely a loss of one hour man power energy.

In order to create any beneficial result it is necessary that the advance of the clock be nation wide and not have to contend with the hap-hazard system now in existence with one community on one time and another community remaining on standard time, as well as inconveniences occasioned in

transportation systems which vary greatly according to their locations.

As it has taken thousands of years to work out the solar system of keeping time and that system has been universally adopted, it seems only logical that we should remain on that accepted system without efforts of attempting to change the workings thereof. Efforts were made to change the date of Thanksgiving Day. It was adopted in some states and rejected in others. As a result, whatever its purposes may have been, it has proved to be a failure. The changing of time is likewise proving to be a failure as now operated, and unless there is a coordination throughout the universe it will be an absolute failure. It is our belief that we should stick to the universal time known as the mean time regulated by the solar system, as daylight saving time has proven to be of no economic benefit and a detriment to the masses, only benefitting the minority of the so-called "white collar" group.

THE FALL OF FRANCE

The French are the most brilliant people in the world. They are profound thinkers, and have intelligence of a high order. At the close of the World War, France was on the "top of the world", and Germany was "down and out".

After a decade of floundering in humiliation and defeat, the Germans decided that hard work and struggle are the essential conditions of national strength, and this was the road they chose for a "come back". As the Germans accepted the "hard way" as the only way to become strong, the French turned "socialist", and adopted the theory of ease and leisure and "the good life" as the proper objective of a nation. By means of a general "sit down" strike a socialist was put at the head of the government, hours of labor were reduced to forty a week, wages were advanced and a new deal policy in general was adopted.

When the French, trained under the new order of "ease and leisure", met the Germans on the battlefield, they discovered that they had defeated themselves before a single gun was fired.

It takes something more than big armies and big guns and huge sums of money to win a war now. A nation that repudiates hard work and continuous struggle as the essential law of life and progress, puts itself out of the race and commits national suicide.

ARE THE LINKS ALL RIGHT?

Everyone must know that the great power and strength of the American nations are found in the ties of friendship and confidence that have bound together the United States, Dominion of Canadian and the Central and South American Republics. But how easily we overlook the old truth that a chain is only as strong as its weakest link. We know perfectly well that there are weak links in some of the 21 Latin-American nations.

The reader will recall that at one time this year there was a general discussion of a proposal for the United States to promote, finance and take an active part in arming all of the Latin-American Republics for "solidarity" and defense on this continent. One reason why the matter was dropped like a hot potato was because there was doubt as to which way some of those Republics might aim their guns, while we remained in close range. American-owned properties have been seized in violation of international law by Mexico and Bolivia.

The Gulf of Mexico, the Caribbean Sea and the East and West coasts have long offered profitable trade routes for nations of Europe and Asia. This has been occupying the attention of official branches of our own Government. In recent months while strengthening our own National Defenses we have been preparing to protect Latin America against possible aggressions.

Yards of resolutions have been passed to overcome distrust of Latin neighbors who have let Uncle Sam down ever since the Monroe Doctrine was first mentioned.

In 1930 Dwight Morrow returned to the United States after 3 years spent in pacifying Mexico. But since then there have been new administrations and leaders in that strange country and they have developed new ways to live—off the United States.

DEFINITIONS AND DESCRIPTIONS OF A BOY

A boy is a noise covered with dirt.
A boy is a piece of skin stretched over an appetite.
A boy is like a canoe—he should be paddled from the rear.
A boy is like a bicycle—he is only stable definition steady in purpose when in motion.
A boy is like an iceberg—most of him is hidden, waiting for some explorer to come along.
A boy is a person whom Mother sends his elder sister to search for, with this admonition: "Go see what Johnny is doing and whatever it is, tell him to stop it this minute."
A boy is a fellow whom Mother should call "Cyclone", because he comes at the most unexpected times, hits the most unexpected places and leaves everything a wreck behind him.
Due to the change to daylight-saving a member of a local church made a mistake Sunday and did not get there until just in time for the collection. What an awful mistake to make!

BOOKS TO OWN

"The great short novel," writes Edward Weeks, "is the perfect entertainment for an evening's reading." It is, indeed, that and more. Many of the world's greatest masterpieces in fiction have been written in the form of the short novel—somewhere between 20,000 and 60,000 words. This collection represents the editor's selection of the twelve most important and most valuable short novels written in English. Yes, twelve—within the covers of a single volume.

What a book to own this is! Of the twelve novels (seven by American authors, five by British) no less than nine are established major or minor classics: by such authors as John Galsworthy, Joseph Conrad, John Steinbeck, Herman Melville, DuBois Heyward, Virginia Woolf, Thornton Wilder, Henry James, and Laurence Sterne. Consider the variety of moods, human situations, and personalities to be found in these works which range from the stark agony of "Of Mice and Men" to the aloof elegance of Virginia Woolf's "Jacob's Room" or the contemplation of "The Bridge of San Luis Rey".

The inclusion of the Galsworthy story "The Apple Tree" is alone sufficient reason for acquiring this volume. Those who haven't read that beautiful, singing idyll of love and death, of passion and poetry in a man's soul in the springtime, should not wait another day to do so. Surely it is one of the great lyrics of our time. Conrad's "The End of the Tether" is equally great, though quite different from "The Apple Tree." Too few people have read this superlative study of human isolation.

Lovers of Herman Melville's works (of whom there are an increasing number) will welcome the chance to read his little-known "Billy Budd, Foretopman." Three works by relatively unknown writers—including "The Sea of Grass" by Richter—round out this anthology. These are works which the editor describes as "the unwarmed classics of our time."

It is hard to refrain from extravagance in praising a book which brings so much of greatness with so little that is unworthy of the reader's time. One may add that Edward Weeks' comments and introduction are illuminating indeed, and they form a miniature treatise on the nature of the short novel as an art-form.

Poetry

Velvet Hands
Time holds the universe in velvet hands;
His varied names are Future,
Past, To-day.
The greatest kings pay homage to his sway;
He is the harbinger of God's commands.
Clocks hold him not, nor softly falling sands;
He is a wanderer whom none can stay.
Creator—yet the master of decay,
His empire rises to fall like burning brands.
Still Time is father to the violet,
He breathes the fragrance of the dainty rose,
His are the seasons, dawn and flaming west,
At last he gently leads man to forget.
His ancient heritage of toil and woes,
And cradles him in silences of rest.

Alberta McMahon Sherwin

A Gaden Sequence:

A Frame For Eden

The prophets wrote and chose still love to sing
Of Heaven's gate; I praise a certain wall
That girdles paradise—not vast, yet tall,
An errant wind may scale it, entering
My cloister—Strong enough that roses fling
Interlaid tendrils boldly over all
Its length, where luscious summer, quiet fall
Are his with connotations of a spring.
So insulate that two may walk with laughter
Yet not to ruffle any feathered song!
Its face is clothed with pageantry in season—
Affame by day, dew-drenched at night, by reason
Of secret suns' and moons' devotion—long
Pursuing, winning, losing—following after.

Behind The Scenes In American Business

OVER THE HILL—Well, we finally made it. After 12 long years it is now possible to say that the people of the United States are earning more money than ever before in history. Income payments to individuals reached a record high during May, equal to an annual rate of \$86,000,000,000. This compares with total income payments last year just under \$76,000,000,000 and a peak figure in 1929 of just over \$82,000,000,000. Let's take a quick look at some of the places this earning power is coming from.

Railroads, for example. Every day nearly 136,000 freight cars are being loaded with commodities and merchandise of all kinds. Down at the shipyards the Navy's construction program involves more ships than have been turned out in the last 25 years. In the construction industries business is humming. Residential building alone is at the best pace since 1928, when 750,000 new dwelling units went up. The steel industry in the first half of 1941 produced a record-breaking total of 41,000,000 tons. That's within 20 per cent of steel output in all 1917, peak year of World War I. And so it goes throughout the war and woof of our present national defense economy.

NOT ALL WORK—America has gone to work with a vengeance, but they say that all work and no play makes Jack a dull boy. There's no need to worry on this score, though, according to the first nationwide study of card playing in this country conducted by the Association of American Playing Card Manufacturers. It seems that 83 per cent of U. S. families play cards. More homes have playing cards than radios. Contract bridge is still the most popular game, and it's on the increase. Second most popular game with women is auction bridge; with men it's poker. Pinochle ranks third with both sexes. The surprising social significance of bridge in America is indicated by frequency of play. Far for bridge, the survey discovered, is once a week in most well regulated families.

UPWARD BOUND—Despite record earning-power in the U. S., that old maximum about coming years meaning less butter is coming true once more as America edge nearer a wartime economy. According to the national bureau of labor statistics, the folks in New Jersey paid 31 per cent for pork during June when they paid a year ago. Eggs were up 37 per cent. Butter, which cost 32 cents a pound in June, 1940, was up to 41 cents. Although statisticians cannot place their fingers on a single reason for such increases, they're due in part to the hearty appetite of Uncle Sam's draftee army and also in certain cases—to purchases by Britain. So-called "luxury" items are going up, too, of course. For example, a 20 per cent increase in the retail cost of liquor can be expected, what with the projected \$1-per-gallon federal tax boost, higher operating expenses and rising cost of practically every raw material used in the product. So that's the other side of the story, and it does cast a sobering shadow over the optimistic tidings of industrial output and wage increases.

AIRPRIORITIES—The constant demand by the U. S. Army and Britain for more and more heavy transport planes is arousing fear among commercial aircraft authorities that new planes and equipment may not be made available to America's growing commercial lines. C. V. Whitney, board chairman of Pan American Airways, now urges the government to do everything possible to prevent a "breakdown" in air transport communication. Pointing out that there was a one-third increase in passengers carried by U. S. lines in June alone, Whitney says "our national and international airlines now provide us with the best communication system in the world—a system which could be used to transport thousands of soldiers quickly and efficiently any place where they may be needed." Whitney recommends that the commercial airlines be given some form of priority on equipment to preserve their efficiency, safety and personnel.

THINGS TO WATCH FOR—Air-cooled telephone booths, Bell Telephone Laboratories has acquired the patents. A wit suggests that toll stations of the future will thus take less toll of tempers during heated conversations. . . . An increase in bobbed-haired blondes. The government has sent out an S.O.S. for

(Continued on page Three)

As Others See It

Defense Blonism

Portsmouth Star

A false rumor has apparently circulated that there is a shortage of blond hair. Any number of blonds have written, telephoned, or called at the War Department, offering to become defense blonds and give up their crowning glory to be used in certain delicate precision instruments. Invariably they have been turned down or at least their hair has, and no more need apply.

The point is that no extensive hair-raising strands are wanted for weather predicting devices. It has been known for a long while that the discovery by a brunette wife of a blond hair on her husband's coat is a certain sign of stormy weather ahead, but more recently hairs have been used in science instruments to soak up moisture in the atmosphere and thereby register changes in humidity and help predict the weather.

But, say the manufacturers, it is easy to get all they want and it can be of any color. This totally debunks the notion that blonds are good for measuring disturbances, but leaves unaffected the popular idea that they are tops in causing them.—Washington Evening Star.

Tri-Country News From Yesterday For Today

(Patrick Henry in his speech before the Virginia House of Burgesses in 1775).

"They tell us, sir, that we are weak, unable to cope with so formidable an adversary. But when shall we be stronger? Will it be the next week or the next year? . . . Shall we gather strength by irresolution and inaction? Shall we acquire the means of effectual resistance by living supinely on the backs, and hugging the delusive phantom of hope, until our enemies shall have bound us hand and foot? Sir, we are not weak, if we make a proper use of those means which the God of nature hath placed in the holy cause of liberty, and in such a country as that which we possess, are invincible by any force which our enemy can send against us. Besides, sir, we shall not fight our battles alone. There is a just God who presides over the destinies of nations; and who will raise up friends to fight our battles for us. The battle, sir, is not the strong alone; it is the vigilant, the active, the brave. Besides, sir, we have no election. If we were base enough to desire it, it is now too late to retreat from the contest. There is no retreat but in submission and slavery! 'Tis in vain, sir, to extenuate the matter, Gentlemen may cry, peace, peace—but there is no peace. The war is actually begun! The next tale that sweeps from the north will bring to our ears the clash of resounding arms! Our brethren are already in the field! Why stand we here idle? What is it that gentles wish? What would they have? Is life so dear, or peace so sweet, as to be purchased at the price of chains and slavery? Forbid it, Almighty God! I know not what course others may take; but as for me, give me liberty or give me death!"

The Small Town

Veatch Redd in Minnesota Press

The small town is a place where there is not much to see, but the things you hear make up for that. . . . The small town is where everybody isn't three months behind with installment payments and where the wild life that stays up all night belongs to the cat family.

(Continued on Page Seven)

Haywood Methodist Church—Rev. Percy D. White, pastor; C. H. Mast, superintendent. Preaching first and third Sundays at 7:30 p. m.; second and fourth Sundays at 11 a. m.

On our farm are several large chinquapin trees. In the fall I gather the nuts and sack in 5-cent bags. I sell to grocery stores, on street corners, and at school. I can sell \$2 to \$3 worth in a day.—Bruce Barnes, Geneva County, Ala.

I make money by taking snapshots of my friends. I have them developed and sell them three for quarter. Our home is a happy one because each member does his share.—Jewel Larson, Columbia County, Fla.

—The Progressive Farmer.

The Duckological

One month ago we summed the duck situation like this: "A substantially increased 1941 duck crop is assured over North America's duck factory in the Canadian West; but bigger duck crop is now almost on the wing."

Terrific heat bombarded the entire duck front thru early weeks of July.

Drought battered Saskatchewan (centre of duck positions); mopped up shallow waters; took heavy toll of duck broods; drove survivors to mass behind DU (and other) dams—and on deeper lakes.

On these Kee-waters, ducks are holding out. Numbers are below 1940. On the western flank (Alberta and southwest—Saskatchewan) drought attacks drove into duck defences. Water reserves suffered heavily. Timely rains saved waters over east-central Alberta—where ducks massed in vast numbers. Heavy rains in North (Peace River, Lesser Slave Lake, Grouse Lake) smothered drought blizz—and guarantee more duck than for years.

On the eastern flank (Manitoba and southeast Saskatchewan) good rains countered drought attacks; assure heaviest duck numbers since early 1930's, and build up water reserves for 1942.

Losses have been heavy from drought, particularly in centre ¼ of duck front. Over other ¾, waters have held up well. Total drought losses will not exceed annual average of 20 per cent of potential crop (which is a heap too much).

Reducing these drought losses is the basis of restoring North America's ducks to "climax" numbers. Much other work must be done. But . . . the foundation of waterfowl restoration on this continent is building 100,000 Kee-waters across the duck range in the Canadian West.

Therefore, July 26 was a big day in History of waterfowl restoration . . . On July 26, DU took into action a Mechanized Division (truck, tractor, bulldozer, scraper, trailer) to build Kee-ponds. This outfit is the \$10,000 gift of a true sportsman and a good citizen, known to his host of friends in California as "The Major." His magnificent contribution to wildlife conservation—DU's Mechanized Division—will add thousands of Kee-waters to duck defences in coming years . . . and, thus, put millions more ducks on the wing.

From all true sportsmen—to "The Major" . . . A Salute! With blistering blizz of drought hordes of crows and magpies attacked from the air. Canadian authorities and sportsmen are fully engaged with human "killers," this year. Crows and magpies increase alarmingly, as control measures reduced. Driving 60 miles, I counted 353 crows across the highway. Du must multiply investment in 1942 Control Campaign. Elsewhere, multiplied swarms of these black killers will destroy more ducks than they leave for hunters.

Duck broods are rapidly taking wing. Flight will soon put most ducklings beyond drought and predators. Another duck enemy—botulism—lies in wait! With record heat, botulism has already hit—at a few points. It may attack at other points.

Allowing for all losses—there'll be more ducks. Even in drought-stricken areas, ducks pack remaining waters in amazing numbers. From Melville, southeast Saskatchewan, Louis McKim (Kee-man, Naturalist, author) writes: "I never saw so many young ducks in one place (as on lake at dam). I know ducks; but could only guess numbers and kinds. Never saw broods so uniformly large. Average about 8. Pintails most numerous; then Scaups; Mallards; Spoonbills; Cans; Teal; Baldpate; Gadwalls; Ruddy's unusually numerous; over 50 pairs. Over 1,000 young on the lake right now."

Tom Main says (writing from Albert, July 28): "Many pot-holes dried up, due to scorching

Behind the Scenes In American Business

(Continued from page two)
long blonde hairs needed for delicate weather-prediction devices of the Army and Navy. It seems that Hitler has cornered the supply which used to come from Scandinavian countries . . . A falling off in merchandise returns to department stores if the experiment of the Wanamaker stores proves successful. Beginning this week a service charge of 10 to 25 cents will be levied on each article returned for cash or credit . . . And here are some "hot" ones in line with the sweltering Washington weather from the U. S. Patent Office: an illuminated umbrella, a sipped necktie, a self-extinguishing cigarette, a typewriter erasing key, an air-cooled awning and a safety-grip lolly-pop. For the persevering inventors thereof, let's hope there's a fortune on the way.

Protect Against Typhoid Fever

Typhoid fever has become so much less common than it used to be that some people think they can safely neglect typhoid vaccination. One of the most intelligent and capable workers in our Progressive Farmer organization last year made that sad error, only to pick up the disease a little later and die in the prime of life. Every member of every family should be protected against typhoid by vaccination.—The Progressive Farmer.

heat. Large numbers of ducks have perished. The great duck country, from Calgary-Edmonton to Saskatchewan line, still well supplied with surface water. Few ducks perished in this important area."

QUESTIONS ANSWERS TO BUILDING AND PROBLEMS

Q. Is it practical to have cabinets built in under kitchen sinks? A. Cabinets beneath the sink are desirable for the storage of soap, cleaning powder, and utensils required for the preparation of foods at the sink. In planning such a cabinet arrangement, it is essential to keep in mind that the trap and the water-supply pipes to the sink should be easily accessible when repairs are necessary.

Q. I understand there are certain kinds of flooring which can be applied directly on a concrete slab. What are they?

A. Linoleum, rubber, hardwood-block flooring, or ceramic, asphalt, and cork tile are satisfactory for use over a concrete subfloor not on the ground. When the slab to which the flooring is to be applied is laid on the ground, there is always the possibility of slight moisture penetration. Unless the slab has been water-proofed, the use of flooring applied directly on the concrete slab should be restricted to either ceramic or asphalt tile. Ceramic or asphalt tile are the only kinds recommended for basement floors.

Q. What is meant by the term edge-grained wood shingles?

A. Edge-grained shingles are cut from the wood logs to expose the annual rings on the flat surface of the shingle as narrow straight bands running parallel to the edges of the shingle. Shingles cut in this manner have little tendency to expand and con-

Better Homes Better Living by the Housing Editor

In building small homes under the Federal Housing Administration insured-mortgage plan, the moderate-income family may find these general construction hints the avenue to cost reduction:

Stairs are less expensive when built between partitions. Gingerbread trimming on the exterior of the house is expensive. Real savings may be found in floors made of short lengths if they take a good finish.

Gutters along the eaves may be omitted; a bed of gravel or cinders should be laid to catch the drip.

Plaster walls may be finished with inexpensive water paint and papered at a later date.

Frequently no basement is needed, but where one is necessary it need not extend under the entire house.

If the home is to have a fireplace, the chimney should be located to serve also the flue of the heating plant.

Contract with changes in moisture content and are highly resistant to splitting and to curling of the edges.

Q. Where should I keep my Defense Savings Bonds?

A. In a safe place, because they have value which constantly increases. If you wish, the Treasury Department or any Federal Reserve Bank will hold them in safekeeping for you without charge, giving you a receipt.

Q. Does an album filled with Stamps automatically become a

Bond that will pay interest and mature in 10 years? A. No. The completed album must be exchanged for a Bond. Regardless of the amount of money you have invested in Stamps, they will not bear interest until they are in the form of a Bond or Bonds.

To buy Defense Bonds and Stamps, go to the nearest post office, bank, or savings and loan association; or write to the Treasurer of the United States, Washington, D. C., for a mail-order form.

Community Sing On Sunday Afternoon

The Virginia Beach Defense Service Committee is sponsoring a community sing to be held on the beach at 18th Street, at 5:00 P. M., Sunday afternoon, August 24th.

The Regimental Band of the 34th Coast Artillery will play for the occasion.

E. N. "Jim" Mac Williams, Chairman of the Virginia Beach Defense Service Committee, will act as Master of Ceremonies and will be assisted by members of the choir from the various churches in Virginia Beach. Some special features are being prepared also.

An important part of the program will be the arrangement whereby the young ladies of the community will have dates for the occasion with men from Fort

Story and Camp Pendleton. Beginning Sunday afternoon, men coming into the Service Club will be given numbers which will correspond with those to be drawn by the young ladies who will be present for the occasion.

This is planned to be one of the outstanding community affairs of the season which will bring the enlisted men, members of the community, and visitors together for an hour of group singing or massing.

Peas and beans will soon mature and should be carefully conserved. One farm girl recalls that in 1917 she saved a quantity of dried black-eyed peas by placing an open container of carbon disulfide (high life to you) in the top of a barrel of dried shelled peas. Local merchants paid \$14 for the peas in the spring of

CHAPTER I

TWO worlds were coming together as Baron Charles de Courland's sleek white yacht, almost as big as an ocean liner, cut a path through the Atlantic toward the African shore. De Courland, European tycoon and big game hunter, dressing in his master's cabin, represented civilization. The jungle, unbroken and reaching down almost to the water's edge, issued to him its primitive challenge.

The captain, in immaculate white uniform on the bridge, peered at the green band of vegetation between water and sky, directed the man at the wheel to change his course, and then picked up the intercommunicating telephone.

Linda emerged from the bathroom with a huge crash towel covering all of her save her shapely shoulders. She had honey-colored hair which seemed to shimmer, bright blue eyes, a perfect oval face, a clear soft skin. It wasn't hard to see why the baron had asked her on the voyage.

"Where?" she asked. "Right outside your window," Fay told her, thumbing. "Porthole, dear!" Linda corrected. She looked out, exclaimed: "You can't see the jungle for the trees. I must call Charles! He'd expect it. He's very proud of Africa!" Fay asked, sardonically: "Does he own that, too?" Linda lifted the telephone. She

Linda. And you did it. You loved Bill.

"He told me he was going to fly over to Spain," Linda said, bitterly. "He was going to look around. He told me to wait for him. And I did. Then, one day, I received a copper box—heavily labelled—the ashes of William Jeffrey, killed in action." She took a deep breath. "I'm through with ashes, Fay! I've earned peace and security. I'll make Charles a good wife to get it."

"When and if he asks you—but he won't!"

"Why not?" Linda's eyebrows lifted. "Why does any man ask a woman to marry him?" Fay countered. "I suppose he's afraid that if he doesn't someone else will beat him to it."

"There's your answer. There isn't anybody else. And there won't be. I'm afraid. Not while you wear that big earring. No Poaching. . . Private Property. . . Charles de Courland. What you need, my dear, is some man to stir up a little competition for your lily white hand. Then you'll get action."

"Perhaps," assented Linda, "you have something there."

Later, on deck, when the baron came up to her as she lay on the curved stern divan, she didn't turn. She let him stand behind her, close to her. She put her head back against his shoulder.

"How quickly it got dark," she said, softly. "There's no twilight here," he replied. "I think I like your darkest Africa, Charles," she told him. "It's beautiful at night. Warm—gentle."

"You'll like it in the day time, too. It's primitive. And you'll like that. Midday in the jungle there's not a sound. The world seems hardly to have begun. Come with me to see that. Linda. All your life you would remember it. I have three weeks away from pressure and work. I would miss you terribly if you did not come with me."

Linda smiled. "You've never had a chance to miss me, have you, Charles?" she asked. "Maybe that's a good idea." She sat up suddenly. "I'll not go. I'll be here when you come back. You see, I want to be missed."

Fay interrupted their tête-à-tête by joining them.

"Don't look now," she warned, "but we're being boarded by pirates."

SIX-BOTTLE CARTON

The handy six-bottle carton is for your convenience. It provides the pause that refreshes with the cold Coca-Cola in your home. All the family will welcome this pure refreshment. Buy it from your favorite dealer.

Norfolk Coca-Cola Bottling Works, Inc.

Linda emerged from the bathroom with a huge crash towel covering all of her save her shapely shoulders.

He pressed a button labelled "Owner."

"Captain Van Hensen, sir," he said. "We are in sight of the river entrance. We'll anchor off M'Pola in an hour."

The baron, who had slipped into a silk lounging robe, thanked him. He was a man of medium height, dark of hair, perhaps forty years old. He was marked not by his even teeth, his unlined skin, his hair which had not yet turned gray even over his temples, or his dark, intelligent eyes so much as by the ego, the self-assurance, the commanding poise which seemed to buoy him even when he was alone.

When he had thanked his employee he continued to hold the instrument to his ear. He in turn pressed a button. A smile of happy anticipation lifted the corners of his mouth.

In another stateroom, where furniture and garments were scattered over the rich, modernistic furniture. From the bathroom came the sound of a shower, almost drowning out the insistent summons of the buzzer. And, at the same time the outside door opened. Fay Thorne, blonde, tall and shapely, dressed in cool pyjamas and wearing sandals on bare feet, breezed in.

"Linda!" she called. "Linda! Where are you?"

From the bathroom came the voice of Linda Stewart.

"Coming off for dinner, dear. What is it?"

"Africa!" Fay exclaimed. "And I've you to thank for it. The baron wanted to relax, he asked you to come along—and I'm stuck with the job of chaperon!"

parried the baron's invitation to come on deck with:

"But I'm not dressed. . . No, dear. . . Fay's here."

Then she put the phone down and leaned her head against the port-hole, letting the breeze blow through her hair, her mood reflective. Fay ventured:

"You don't mean a word of it. Not a single, solitary word."

"I didn't say anything," Linda smiled.

"Your voice did. Your voice said you loved him."

"That's what I want it to say, Fay," Linda told her.

"You don't love him, Nibel!" Fay shook her head. "You may kid yourself—you may kid him. But you can't fool me."

"I'll be happy with him!" Linda was almost defiant. "And I'll make him happy, too!"

Fay picked up a cigarette, concentrated on it.

"What about Bill Jeffrey?" Linda got herself a drink of water.

"Bill was turmoil—and temper. Charles is peace and security. He's got an office and a home—not an airplane!"

"Yes—and a yacht—and a chauffeur."

"All right!" Linda admitted. "He means luxury, too."

"Maybe he's not just my way out. I don't see him the way you do. He scares me. Every time he snags his fingers the way he does to get service, I jump."

"He never snags his fingers at me. He asks me—even when he doesn't have to."

"Bill always told you what to do."

HEALTH NOTES

Health Insurance

"The degree of optimism that many middle-aged and older persons display toward the continued satisfactory performance of their bodies in many cases is quite justified. It is generally recognized that the constant wear and tear of years do not improve the operation of mechanical contrivances, despite regular inspections, replacement of worn parts, and daily attention. On the otherhand, the human body, representing the most amazing piece of mechanism on earth, is considered by a great number of persons to be more or less a perpetual motion affair, needing little attention. In fact, the theory seems to be that the body can be somewhat neglected, even abused, in various ways for a long time, and still be highly efficient. Nature, however, refuses to accept this notion. Indicating its displeasure in varying degrees from minor afflictions to premature death," states Dr. H. C. Riggin, State Health Commissioner.

"While the resiliency of the youthful body is great, as middle-aged advances the bounce-back increasingly becomes less spontaneous. In itself, this fact should be an indication that reasonable interest in bodily welfare, however valuable in youth can no longer be postponed without risk."

This does not mean that the subject should be over emphasized. Even a mild type of fanaticism in this connection is likely to backfire. It is just common sense though to appreciate that the application of intelligence in the maintenance of the best attainable health is an essential requirement.

"To eliminate habitual abuses, if existing, such as lack of sufficient sleep and outdoor exercise, the under or over consumption of food, the excessive use of any kind or kinds of stimulants, and undue worry, merely gives the bodily mechanism a chance to do its best under aging conditions."

"However, an equally important obligation remains, namely, the periodic physical examination. No one of middle-aged or beyond has the right to assume that because his body apparently is in good condition it actually is so. Often, time has a way of taking its toll, steadily and painlessly though it be."

"Many conditions, readily detectable by the medical examiner, go unnoticed until irreparable damage is done. To spot those conditions, even before one is conscious of symptoms, sometimes

Keep out of war. Promote peace rather than encourage war.

Increase the debt limit only a few billions at a time as absolutely needed.

Keep a tight rein on the Treasury.

Increase federal taxes. Pay as we go to the breaking point.

Reduce non-defense items 20 per cent, including all salaries over \$1500.

Get your home paid for. With a garden. Use the earnings of these few boom years to get liquid. Be free from debt when the crash comes.

Get down on non-essentials. But not on your church, Boy Scouts, YMCAs, or other character-building and patriotic organizations. Invest in them.

If you live in a huge city, buy a "place to light" in a smaller town or in the country. Big city taxes are going to eat you alive. Decentralize industry.

Take an active interest in government. Become a citizen. Keep taxes on homes down. Get the best public officials you can.

Enlist in the fight against corruption in government.

Make Congress stronger. Forbid all future third terms. Maintain the checks and balances of the American Constitution. Defend it against all enemies.

Tighten your belt. Get callouses on your hands. And iron in your blood.

Women Urged To Buy Bargains for Defense

Bargain hunting—with a patriotic motive—is recommended for today's American housewife by James Madison Wood, president of Stephens College, Columbia, Mo.

Pointing out that women spend most of the family funds, he said that "every dollar saved through wise buying practices means another dollar available for defense."

He suggested "Bargains for Defense" as a motto.

Women are the main purchasers of United States defense savings bonds, he stated, while most consumers are women.

He means the difference between years of continued good health and happiness, and years of physical impairment or worse.

"Again, there is no desire to suggest that lurking disease is likely to be the rule in the middle-aged and older, far from it. The point being emphasized is that on the law of averages the number of unsuspected and minimal conditions is sufficiently large to justify everyone in making sure that none exist. If perchance, something is discovered, time having been taken by the forelock, medical science is placed in a position to render prompt and effective service."

"In short, revising one's habits to meet the additional strains and stresses of increasing years, and to check up periodically on physical, including dental, health is not only the finest kind of health insurance but of life insurance also."

PURKAL TRENDS
ROGER M. KYES
Director, National Farm Youth Foundation

BORROWING MONEY

Lack of understanding on the part of the general public with regard to public borrowing, is creating a general misconception of economic consequences.

The two factors of primary consideration are the amount of money to be borrowed by the government, and where the money comes from. In normal times as this drain does not remove more than luxuries from our daily life, and does not impair the capital funds necessary to the economic life of a community, no great damage will occur.

The great danger to the future of the United States, from an economic point of view, is that under the strain of the emergency our government may overlook the long range problem of preserving the economic resources of this country.

It is possible to divert capital replacement funds temporarily but if this continues too long, machinery and equipment will not be kept in repair. As a result, the industry will lose its ability to produce wealth, thus putting the future income of the country into jeopardy.

Only one sound conclusion can be drawn, considering the vast sum the government must borrow for this emergency and that is, that it become the patriotic duty of every American to loan his government every bit of savings and every bit of additional money he can spare. If any of us hold the attitude of refusal to loan our savings then, by necessity, the government, through taxation, will borrow the capital from American business, whether it be the country store or the giant manufacturing enterprise.

Taxation is advocated by many on the theory that it will check extravagant consumption and avoid the inflationary character of the arguments are good but, unfortunately, the politicians usually avoid effective taxation. They are willing to tax large incomes but this fails to check inflation. Taxation of the masses is the only way to check rapid rise in prices. This is politically unpopular because most people fail to understand that taxation of rich and poor, as well as for the protection of everyone. The masses lose more net income as a result of inflation than could possibly be taken away from them by taxation twice as heavy as that now being paid.

Of equal importance to the amount and source of money for government use, is the question of how the money borrowed is to be spent; that is, whether it is put to productive or unproductive use. To be productive it must either be used for the purchase of assets of the country, if considered only from an economic point of view. Certainly the protection of our country means the protection of our assets. Defense for the protection of such capital assets should therefore be considered productive. The building of new plants and the buying of new machinery and equipment all come under the head of productive expenditure. Because such expenses will be so tremendous, it is necessary that non-essential expenditures be reduced to a minimum.

The important thing to remember in connection with the present national emergency is that all of us can do ourselves and our country a great favor economically by turning our savings into defense bonds.

Contributions to patriotic appeals such as the USO likewise come from savings in the household budget.

Dr. Wood suggested that housewives set aside a special "bank" in the kitchen, where pennies saved by buying bargains can be deposited. More than one person already has bought a defense savings bond with a bagful of small change he said, and coins of any denomination are "acceptable and welcome."

Spotting low prices—always the delight of a thrifty woman—has another relation to the defense program, the Stephens president added. It helps check profiteering by retailers, which in turn halts the upward spiraling of living costs, he pointed out.

Mrs. Richard Everett who has been spending the summer with her son-in-law and daughter, Mr. and Mrs. John Paul Jackson, in Dallas, Texas, returned Saturday to her home in Linkhorn Park.

Miss Keithley Dawson of Arlington, Virginia is visiting her grandmother, Mrs. R. S. Dawson, at her home in Long Haul on Linkhorn Bay.

Miss Mildred Taylor will leave today for Richmond where she will spend the week end with Mr. and Mrs. Hugh Rose.

Miss Lella Burnett has returned to her home in Danville after visiting Miss Ruth Townes in the Towers Apt. on 241-2 Street.

Miss Miriam McGraw of Richmond is visiting her brother-in-law and sister, Dr. & Mrs. R. I. Pusey, at their cottage on 108th Street.

Private William Kellam who has been spending a few days with his mother, Mrs. Abe Kellam at Princess Anne Court House, left Wednesday for Fort Meade, Virginia, where he is stationed.

La. and Mrs. Temple Ryland of Edgewood Arsenal, Md., are spending a week here visiting relatives.

Mrs. R. S. Dawson will leave Saturday for Arlington, Virginia, where she will visit her son and daughter-in-law, Mr. and Mrs. Ralph Dawson. She will be accompanied by her granddaughter, Miss Keithley Dawson.

Among those returning Sunday from Camp Strawderman, Woodstock, Va., are Misses Ellen Love and Betty May Smith, Peggy Grimes and Harriet and Helen Pender.

Mrs. Hugh Thompson who is spending the summer with her parents Mr. and Mrs. David Pender in Sea Pines is now visiting friends in Washington, D. C.

Mrs. B. P. Huntley of Winston Salem, N. C., is the guest of her son-in-law and daughter, Mr. and Mrs. Albert Turnbull, on Holly Road.

David Pender, 3rd and Floyd Dormire, Jr., who have been attending Camp Sequoyah in Weaverville, N. C., will return to their homes Saturday.

Mrs. Andrew Maloney of Washington, D. C., is visiting her parents, Mr. and Mrs. Walter in Bay Colony.

Mrs. John Archer Coke and her daughter, Mrs. Alex Marie, who have been spending some time at the Marshall's have returned to their home in Richmond.

The Rev. and Mrs. Thomas S. Clarkson and their daughter, Miss Ellen Hardy Clarkson, and their son, Heriot Clarkson of Tupelo, Miss., are visiting Mrs. Clarkson's sister-in-law and brother, Mr. and Mrs. John Cole on 53rd Street and Mr. and Mrs. Hardy Cole on 56th Street.

Mr. and Mrs. C. G. Browne have returned to their home in Lynchburg, after a week's visit with Mr. and Mrs. Walter Wistar Head, who are occupying the Timberlake Cottage on 113th St.

Lieut. Claude P. Brownley, 3rd, returned Sunday to Fort Bragg, N. C., after spending a few days with his parents, Mr. and Mrs. Claude P. Brownley, Jr., at their home on 55th St.

Miss Elizabeth Gant is spending a few days with Col. and Mrs. Harry Baldwin Gant.

Mr. and Mrs. Robert Cornick and family of Raleigh, N. C., are guests of Mr. Cornick's mother, Mrs. John Cornick, of 23rd St.

Miss Margaret Kelly of Salisbury, Md., has returned to her home after spending two weeks

with her aunt, Mrs. W. H. Ames, of Oceana.

Mrs. Harvey Capps entertained at a buffet supper, in honor of Mr. and Mrs. Robert Cornick, of Raleigh, at her home in Oceana on Thursday. Her guests numbered ten.

Misses Catherine Manby and Betty Capps will return this week end from Camp Strawderman, where they have been counselors for the past eight weeks.

Guyler - Dahms
Mrs. E. Dahms, of Pittsburgh, Pennsylvania, has announced the marriage of her daughter, Miss Frances Dahms, to Private Samuel H. Guyler, who is stationed at Camp Lee, Petersburg, Virginia.

The marriage took place on August 15 at First Presbyterian Church. Rev. J. B. Clower, Jr., was the officiating clergyman.

Comments And Resumes On War

(Continued From Page One)

Means Committee promptly turned this proposal down by a decisive majority. That really is something, when you remember that the President's prestige was never greater.

Practically every economist of note is in complete accord with the President's views, when it comes to lowering exemptions. One purpose of heavy taxation is to reduce consumer purchasing power as a means of combating the price inflation. The bulk of the increased purchasing power resulting from war spending is going into the pockets of the laboring groups. Yet it is these groups which will be most favored if our present tax policy is continued, even as the middle-income, white collar groups will take the worst financial beating.

There is going to be a big battle on this tax bill in the Senate, where the President's suggestions will probably carry more weight.

Fall Chapeaux

Hats which will adorn fall coiffures this season are contradictory—they are level-headed but riddy!

They are also considerably larger than of yore, divide allegiance between enveloping veils and big smocks that hide the hair and go in for coque and ostrich feathers.

In this year's collection of one of the foremost designers, the models almost without exception were made to sit level on the top of the head. However, the severity of this line was adroitly toned

Mrs. J. L. Quimner, of Charlotte, N. C., is a guest of her mother, Mrs. P. O. Horsley.

Mrs. Frank Sheehy and Mrs. Joe Huy, of Marion, Ohio, are visiting their sister, Mrs. Don Kunkler.

Mr. and Mrs. J. T. Pugsley and Mrs. G. M. Clay, of New York City, are the guests of Mr. and Mrs. DeKoven King.

Mrs. W. B. Gullidge and her daughter, Mrs. W. P. Belk, of Monroe, N. C., have returned to their home after spending a week with Mrs. F. R. Reader.

Mr. and Mrs. A. W. Han, former residents of Lynnhaven, have established residence in Norfolk. Miss Ruth Ellen Layman, of Christ Hospital in Cincinnati, Ohio; Mrs. William Layman of Forest, Ohio, and Mr. and Mrs. Homer Dixon and their son, Robert, were guests at the home of Mr. Don Kunkler during the past week.

Mr. John Whitehurst has returned to Lynnhaven after having spent several weeks with his son in Baltimore, Md.

Mr. and Mrs. Litter Shirley are spending a few days at Honea Path, S. C.

Mrs. Grace Harness returned home Wednesday accompanied by her son, Rev. Samuel Harness, and Mrs. Harness, of Rose Hill, N. C. Mr. Richard Reader is recovering from illness.

Miss Alma Oldaker is visiting her aunt in Franklin, Va.

Mrs. S. C. Rogers, who has been very ill, is improving.

Dr. and Mrs. D. P. Barrett, returned missionaries from Puerto Rico, have been the guests of Mr. and Mrs. M. P. Earrett. Dr. and Mrs. Barrett will make their future home in the states.

Sparkling... Inviting... is this new Two-Tone JELLIED SOUP

by Dorothy Greig

JELLIED soups look so cool that the mere sparkling sight of them on the table is refreshing. Their delicately edgy flavor delights, too.

In beginning a meal with jellied soup, plan to have some-

thing hot as the following dish is cause, of course, no meal should consist of all cold food. We need hot food, for good digestion's sake.

Besides the contrast of hot food following the jellied soup steps up even further the enjoyment of both.

Nowadays serving jellied soup is no problem. Condensed consommé jells in the can when placed in the refrigerator; so do condensed consommé Madrilaine and condensed consommé Printanier. Just whisk open the cans and tumble out the sparkling amber jelly.

Put it together this way:
For the Tomato Jelly:
2 cups tomato juice
1/2 lemon, sliced
2 tablespoons sugar
1 teaspoon salt
1 tablespoon gelatine (softened in 1/4 cup cold water)

Combine tomato juice, sliced lemon, sugar and salt. Bring to boiling point and simmer for 10

minutes. Then strain over the softened gelatine, stir until gelatine is dissolved. Put in refrigerator and chill until stiff.

To serve: Fill chilled consommé cup 1/2 to 3/4 full of tomato jelly, then fill remainder of cup with jellied consommé Madrilaine.

Gay Accents for Jellied Soups:
After condensed consommé has been jelled in the can in the refrigerator empty it into a bowl and gently mix through it—
2 tablespoons of finely chopped tomato and 1 teaspoon chopped

Or 1 tablespoon of finely chopped cucumber and 2 tablespoons tomato
Jellied condensed consommé Madrilaine is another soup that becomes something very special indeed when accented this way. After it has been jelled empty it into a bowl and mix through it—
3 tablespoons of finely chopped

Or 4 tablespoons of finely chopped avocado
Or 2 tablespoons of chopped

Serve these soups in chilled cups with a wedge of lemon or lime.

Items Of Interest In Princess Anne

Mr. and Mrs. E. B. Vail, of Fox Hall, left Sunday for Alexandria, Va., where they have been attending a convention.

Mrs. Mollie Whitehurst and her grandson left last week for their home in Jackson, Tenn., after spending several months visiting

in Princess Anne and Norfolk. Mrs. W. H. Land, of Princess Anne, who has been ill at the home of her sister, Mrs. J. E. Fantone, of Norfolk, has returned to her home.

Mr. and Mrs. J. J. Ballance, Jr., of Land's Station, left Monday for an extended trip through the western states. They expect to be away several months.

Carry on with the newspapers.

"Earn Those Blessings"

(President Charles Seymour of Yale, Addressing Agents of the Yale Alumni Fund.

We may remind ourselves that even in times of external security the success and even the existence of a democracy depends upon certain qualities characterizing the individual citizen—intelligence, courage, and above all, a sense of responsibility. By responsibility I mean the individual's recognition that he must earn those blessings which he would enjoy; that he must not expect to get something for nothing; that the privileges of the community in which he lives must depend upon his contribution to the community; beyond everything, that freedom is . . . to be achieved, perhaps painfully, through the judgment, the tolerance, the self-reliance, and the self-denial of the

individual. Such qualities should characterize the product of the universities, for without them democracy cannot long endure. We are pledged also to the infusion of learning with these moral qualities which by their power are sufficient to carry us from the stage of knowledge up to the higher wisdom.

Write to the Boys

Please remind subscribers to write often to their kin at the camps. Down at Fort Bragg the boys who don't get a letter when the mails come in have a little song that "the old folks at home" (and some of the young ones, too) ought to know about:

No letter in the mail today,
No message from my love,
Nobody knows how sad I am
Except the Lord above!

Relationship of Home Required

From the points of view of economy, satisfaction, or marketability, no individual dwelling or class of dwellings may be considered part from the land they occupy and the surrounding features which tend to make the land retain its value for residential purposes.

Planning means the process of adapting a specific area of land to the economic, social, and physical factors which determine its ultimate value for residential purposes. Such adaptation is achieved by the planning of the land, by establishing zoning and protective covenants, and otherwise creating and maintaining the quality of a neighborhood.

Planning has been characteristic for many years of subdivisions for high-priced homes. Such neighborhoods have been carefully laid out, subjected to architectural and landscaping control, and protected by covenants restricting property against uses inharmonious with the neighborhood.

Formerly Unplanned

Neighborhoods for modest dwellings have only rarely been developed in this manner, the FHA says. Frequently they have been produced without planning and wholly unrelated to the character of dwellings which might sometime be built.

As a result, it is pointed out, acres of land in and surrounding American cities have been abandoned, devoid of identity as neighborhoods.

Let's Use More Peaches

Late dispatches from London carry the news that peaches are selling for \$1.50 each. On that basis what a treasure and blessing we have in a few bearing trees! And there's justification for eating plenty of peaches. Cornell says fresh peaches are an excellent source of vitamin A, a fair source of vitamin B, and a good source of vitamin C. Peaches also contain several minerals. In fact, Cornell points out, peaches can be ranked among the "protective foods," in addition to having an enticing color and flavor. Why not serve them generously during the season and then store a plentiful supply of canned preserved, and spiced peaches for winter meals?

Dishes that can be made with this fruit are many: peach ice cream, peach shortcake, peach Melba, peaches in combination with other fresh fruits in salads.

borhoods, and monotonous and unappealing in appearance. Values stagnate and owners find little or nothing to encourage the maintenance of their properties or to hold their interest in the locality.

Often Become Speculative

Thus the small home, which should be the safest of investments, often becomes a speculative commodity lacking long-term security.

This condition is said to be no longer universal. Many neighborhoods for small homes are now being produced which are as satisfactory as those for expensive homes.

PRINCESS ANNE PRESS

**Iceland's Baths Please Marines**

They never call the janitor for hot water in Iceland. An endless supply is gushing from the hot sulphur springs according to the U. S. Marines on duty there.

Letters from the sea soldiers to the home folks state that they live in cylindrical huts built somewhat like igloos. They like the food and they are enjoying good health in the current spring-like weather.

There are no trees or any of the familiar landmarks of America in Iceland. The landscape is covered with tall mountains of volcanic origin.

Bit by bit the Marines are picking up words of the Icelandic language and in due course of time some of the native vernacular will be added to the already extensive vocabulary of the leather-necks.

Best of all, however, they enjoy the warm sulphur springs where they shave, bathe and, incidentally, wash their own clothes. The latter art is learned by the sea soldiers at their training camps and they turn out a "wash" good enough to win the envy of a housewife.

A free water supply of every temperature, from scalding hot to ice-cold, is obtainable due to the fact that the Marines perform their ablutions right where a cold stream joins a hot one.

Travel on Snow Cruiser

Camels, mules, ox-carts and airplanes have been used by the U. S. Marines as modes of transportation, but at least four of Uncle Sam's sea soldiers know how it feels to travel in a snow cruiser the first craft of this type ever made.

The Marines were with the Ad-

miral Byrd expedition to the Antarctic and were selected to make the trip because of their abilities as radio operators, mechanics, or airplane pilots. The strange craft in which they made their home at the faraway southern base was called the "Penguin."

Built like a huge trailer, approximately 50 feet long and 20 feet wide, it was powered by two Cummins diesel engines. The odd conveyance included cooking, living and sleeping quarters, machine shop, engine room and other compartments.

Huge rubber-tired wheels, weighing three tons each, enabled the snow cruiser to pass over wide spaces in broken ice fields without making detours, and the cruiser also was able to carry an airplane on its ample roof.

Living in the odd craft was fairly comfortable, the Marines say, except when it became colder than 40 below zero and the kerosene in the cruiser wouldn't burn. At such times they were forced to seek shelter where coal was available.

Minerals which promise to prove valuable were found by geologists with the expedition, and new shore lines and mountains were discovered. The Marines had a good opportunity to test extremes of temperature, most of them having served previously in the tropics.

My grandmother told me this story: "I wanted to earn some money and I asked my father for a piece of ground. I noticed that Mother threw away a lot of potato parings every day. So I collected and planted the 'peelin's.' I raised 30 bushels!"—William J. Taylor, Pike County, Ky.

Boots, my pet bulldog, smokes a pipe, plays dead, balances a ball on his nose and catches it, and brings in the newspapers. Sometimes I say, "Boots, you haven't aid your prayers lately." Then he drops into a prayerful pose and does not move until I say, "Amen."—Jack Sears, Potter County, Texas.

Use of Good Cockerels Boosts Egg Production

A farmer-poultryman can average production in his flock about 35 eggs per hen annually by purchasing only chicks sired by Record of Performance or other pedigreed cockerels, says H. L. Moore, poultry husbandman, Virginia Agricultural Extension Division. General use of such chicks in maintaining the laying flock, together with good feeding, care, and management, would provide several billion additional eggs a year for national defense food.

Cockerels, to qualify for U. S. Record of Performance rating under the National Poultry Improvement Plan, must be from hens laying over 200 eggs a year. (The N.P.I.P. is a cooperative effort to improve poultry flocks.)

Because the sire and dam are equally responsible for the level of production in the offspring, poultry specialists predict that R.O.P. cockerels, or males of equally good pedigree, used in the average poultry flock, will raise the national 101-egg average to about 135 eggs annually. This increase is midway between average farm flock production and production of pullet flocks from which hens are selected to produce R.O.P. cockerels.

One way to be certain that chicks purchased are sired by R.O.P. males is to get them from "Virginia Certified" or "verified" hatcheries, a list of which can be obtained from Mr. Oxlin, county agent, or the Virginia Agricultural Extension Division, Blacksburg, Va. Many "Virginia-U.S. approved" and other hatchery flocks are mated to R.O.P. males, too.

Mr. Moore recommends that Virginia farmers take advantage of good egg price prospects by brooding some fall-hatched pullets of improved breeding for laying purposes next spring.

As Others See It

(Continued from Page Two)
the social status of the new family next door when you see the family wash on the line.

The small town is where, the editor of the weekly paper gets results when he announces through his columns that he is out of potatoes.

I am not here to ridicule the small town. I live in one myself, have spent 38 years in the retail business in them, and like them. I have never envied any of you fellows who live in steel and concrete.

I have wondered what you would do for your bank presidents, the chairman of your board of directors, and your corporation executives if we did not send them to you from the small town.

Most of the factories in this country would have to close down if the small town and rural buyers went on a strike. They are the real quantity and quality buyers of the country.

The small town made America what it is today, the envy of every other nation on the face of the globe—and the small town retailer has played his part.

A Road To Alaska

Newport News Times-Herald
There has been much talk but no action as yet on the construction of an international highway, across Canada and on to Alaska. Had it been started when there was much discussion of it a year ago, it might be nearing completion.

Russia and Japan, both of the near neighbors of Alaska on the west, are now at war. Within a matter of weeks, developments may come in northeastern Asia that will make Alaskan defense even more important than it is now.

Suppose Japan seizes the opportunity, in the Axis tradition, to stab back a Russia being beaten to its knees by the German onslaught. Then the Russian aviation and naval bases when lie almost within sight of American territory in Alaska would be in Japanese hands. Suppose Germany completely beats Russia, and moves eastward to the Pacific; then we would have the Nazis directly across the narrow channel where Asia and North America say "Hello!" at the Diomed Islands. Suppose Russia beats Germany, and swollen with power, turns on.

Give the Bride a Cow!

In connection with the whole national nutrition program one of the very finest things that could be done would be to revive a fine old Southern custom of our fathers and grandfathers. I refer to the once prevailing custom in country communities for the bride's parents to present her with a milk cow. This was the new family assured a milk supply and the nucleus for a growing herd.—The Progressive Farmer.

NEWS OF INTEREST

INSTALLMENT CREDITS

The Federal Reserve System has been ordered by the President to "investigate, regulate and prohibit" installment buying and installment loans. Chairman Marriner S. Eccles is given power to regulate terms of consumer credit. Eccles indicates that the order will "dampen the demand" for automobiles, refrigerators, vacuum cleaners, washing machines, ironers and other goods. Household furniture ranks second in the amount of sales made on the installment plan.

If you will trace the results of the above program down to the local retail dealers and shops in your own home town you will likely realize the danger to many of them being driven out of business.

Perhaps the biggest in boom installment credit at the present time is for residential buildings, which are favored, and backed by the Government. This was one of the creations of the "brain trust" in the early days of the Roosevelt Administration, and even though the plan has more holes in it than installment buying from private industries, the President states that it must be continued. Thus, his present attack upon the installment sales system is in "reverse" with the Government program for home building.

The principal reason assigned for this ban on installment sales is to escape inflation. The President says his order will help National Defense, curb price advances and profiteering, promote the accumulation of savings, and create a backlog of demand for consumers durable goods. The President and everyone else seems to overlook the fact that installment credit is a practical system that has been built up slowly, and carefully, through the years, to meet the demands and needs of the American public for small loans. Most automobiles have brought on the installment plan.

Mr. Eccles now seeks to put a crimp in installment sales of automobiles, while another official, Leon Henderson proposes to cut down the production of motor cars 20 per cent to 50 per cent. Is that smart stuff?

The automobile manufacturers are all participating 100 per cent in National Defense and are not raising a finger of opposition to any of the Administration plans that are likely to retard progress in the motor industry.

FROZEN FUNDS

In April last year the United States Government froze 267 million dollars of funds in the United States that belonged to Norway and Denmark. That was the beginning of "freezing"—which was a plan to keep the funds of the invaded countries from being used by Germany and others.

Today these foreign funds amount to more than 7 1/2 billions dollars. Perhaps you may have forgotten some of these nations that were stormed and crushed by Hitler. These unfortunate nations that are being defended by the United States are Denmark, Luxembourg, Holland, Belgium, France, Germany, Japan, Italy, Greece, Yugoslavia, Rumania, Hungary, Austria, Poland, Czechoslovakia, Finland, Portugal, China, Switzerland, Sweden, Spain, Estonia, Latvia, Lithuania.

TO SAVE BUSINESS

Editor Joseph Martin of Massachusetts, Chairman of the Republican National Committee, and Congressman from his State, says that small businesses comprise 99 per cent of all business and handle 65 per cent of the nation's commerce. He thinks the small fellows are "getting the worst of it" in the awards of defense contracts, and he has declared a campaign to force the Government to adopt measures to save small business men from being plowed under.

"SUBSTERFUGE"

A lot of legislation before Congress is being promoted by a subterfuge under claims for National Defense. These issues include the St. Lawrence seaway, the Florida ship canal, excessive highway appropriations, and other questionable undertakings—questionable because they are straight-out proposals that have nothing to do with National Defense.

JOBS PLENTIFUL

According to the Works Progress Administration 4 million new jobs were created during the past year. Employment is almost normal throughout the country.

HIGHWAY TRANSPORTATION DEFENSE

As America swings into its defense production program it is realized that every available method of transportation will be taxed to its utmost, as already we have heard the cry that we need more freight cars. The Government has realized the vital need for heavy-capacity trucks and trailers. But even now we are finding that we are paying the penalty in many instances for the unnecessary throttling of the growth of the highway transportation industry by needlessly severe restrictions of load and length. This is pointed out by such leaders as Harvey Fruehauf, manufacturer of commercial trailers.

For years we have been hearing about a so-called "transportation problem". There has been no real transportation problem in this country up to now but we are just about to face one. We not only have to move more goods and more materials than ever before in our history, but will have to move them more rapidly and with greater regularity because today factory schedules and inventories are based on the systematic and orderly arrival of materials.

With this situation confronting us and with the heavy load still to come, let us pause and consider what we can do to meet the coming demand. We must maintain a flow of freight over the rails and over the highways. In the case of highway transportation it is readily possible to reduce congestion by increasing the capacity within reasonable bounds. As long as loads do not exceed safe limits, the bigger they are the more apt they are to provide hauling economy. Certainly, for example, there would be less congestion on a highway with one ten-ton vehicle than with ten one-ton units. It is for this reason that truck and trailer operations with their greater capacity and flexibility provide important savings in time and money.

The unfair and unwise restrictions which have been placed in the way of the development of motor transport will be brought sharply into view during the next few months. However, we cannot undo the past; let us survey the future and build more vehicles for adequate and efficient highway haulage because in them lies an important key to the strength of our country.

THE OIL QUESTION

There are still more than 200 tankers transporting oil from the Gulf and Caribbean to the Eastern seaboard, and so far the figures do not show either a shortage of oil or a shortage of transportation. Fifty tankers were transferred to Great Britain, and then Harold Ickes began his noise. The principal "surplus" is in production from the oil administration calling for slower speeds, gradual acceleration, deceleration, elimination of unnecessary use of motor vehicles, elimination of idling of motors, checking carburetors and ignition systems, jack-rabbit starting, gasoline curfew, etc. The Petroleum Coordinator is accused of "haranguing the public with threats of oil rationing" by the Washington Post.

All of the oil companies have bowed to Mr. Ickes' orders. Eleven big concerns have made a volunteer offer to build a new 1,820-mile system, the longest in the world, with a capacity to deliver 250,000 barrels of fuel oil daily from the oil fields to the Eastern seaboard. They will furnish 70 to 80 million dollars for the privately owned National Defense pipeline.

Some weeks ago this Letter contained an account of a major pipeline already scheduled for construction, to form a link from Baton Rouge, Louisiana, to Greensboro, North Carolina, with spur lines in Alabama, Georgia, and Tennessee.

Pipelines would meet any shortage that may threaten the future, and according to the new reports it will be possible to put them in operation within 9 to 10 months. Mr. Ickes is reported to have said this would not be soon enough to be a factor in solving the immediate problem caused by lack of transportation facilities in the East. Mr. Ickes must have noticed that his predictions are not generally accepted by public opinion.

On the other hand no one doubts for a minute but what the 11 big oil companies will meet the challenge, if given a chance to do.

ALL MEN KEPT IN THE ARMY

The Congress of the United States has extended the term of service of all men in the Army a year and a half. The new legislation declares that "the national interest is imperilled." All men in the Army will receive \$10 a month increase in pay after the first year.

There was a hard, close fight, in both branches of Congress over the question of extending the period of service, and the results show Congress to be in agreement with the Administration, therefore the service men and the Nation will approve the final decision.

Little Known Facts About Ice Cream

CALORIES IN POPULAR DESSERTS

MANY people are not aware that most popular desserts are much higher in calories than ice cream.

According to figures recently compiled by the National Dairy Council, an average serving of vanilla ice cream, measuring approximately one sixth of a quart, provides 200 calories. Compare this with 450 calories for a piece of lemon pie or 350 for a serving of angel food cake.

Another mistaken idea about ice cream is that it is "full of air." Air is a necessary ingredient in ice cream, as without it a solid frozen mass would result. Ice cream that did not have air beaten into it would be like bread that had not risen. The principle is similar to that followed in the kitchen when air is beaten into eggs, whipping cream, or batters.

The combination of lobster or other fish and ice cream is a meal

is still believed by many to be a cause of indigestion. Scientists have disproved this old belief, stating that if the fish is fresh no harm can result from the combination. Fish is often combined with milk in tasty sea food dishes. Ice cream, a milk product, can be served in the same meal with equal success.

Ice cream is a healthful food containing most of the nutritive elements of milk—protein, minerals, and vitamins. Cream, milk and milk concentrates, sugar, and sometimes eggs, form the basis of all ice cream. The typical proportion of ingredients is about 80% cream and milk products, 15% sugar, 4.5% flavor, 0.5% stabilizer (usually gelatin).

About 4 1/2 billion pounds of milk are used each year to supply the cream and other dairy products used in the twelve hundred million quarts of ice cream which Americans eat annually.

Average Home Now Smaller

In the last 15 years the average American home has lost a room.

According to data compiled by the Mortgage Bankers Association of America and supplied by its members in 83 principal cities, the average new house being built today has five rooms, whereas 15 years ago it had six.

This fact coincides with the Federal Housing Administration's report which shows that almost half of the new homes securing mortgages accepted for FHA insurance in 1940 contained five rooms, closets, halls, storage and rooms, closets, halls, storage, and similar spaces are excluded.

BETTER FISHING

MORE FISHERMEN

In spite of the hot weather more fishermen than ever before have been seen on the streams and ponds of eastern Virginia this summer.

State game wardens in eastern counties, especially those from the Back Bay section, have reported to the Commission of Game and Inland Fisheries a record-breaking number of bass fishermen during the past month. Excellent catches of bass, crappie, and perch have also been reported.

Wardens in the tidewater district inspected more than twice as many licenses during July than the same month of any previous year.

71st. C. Artillery Gets Compliment

The 71st Coast Artillery (A.A.) at Fort Story has been complimented by General Powell, commanding officer of the 44th Infantry Division, on the part it played in the maneuvers held recently at the A. P. Hill Military Reservation in Caroline county.

Lieut. Col. D. R. Arlidge, acting division chief of staff has written to Lieut. Col. E. W. Timberlake, commanding officer of the 71st, as follows:

"General Powell has asked me to express to you his appreciation for the fine part taken by your regiment in the maneuvers of July 31-August 1. It is my hope that the 44th Division will have associations again with the splendid regiment which you command."

Theatre Previews

At the Bayne

Followers of the adventures of Maise will be delighted with the new escapades of this character in the latest production, "Ring-side Maise," which opens at the Bayne today for a two-day showing.

If the Brooklyn chorus girl found herself in difficulties before, this time she reaches a new climax. Her antics include a jitterbug number which rivals the best efforts of an international champion in this line, a little matter of getting tossed off a moving train, and a romance with a woman-hating prize-fight manager.

George Murphy portrays the role of the hardboiled fight manager and Robert Sterling, an attractive newcomer, is cast as the young fighter whose chivalry saves Maise from a difficult situation. Other popular members of the supporting cast are Jack LaRue, Slapale Maxie Rosenbloom, Natalie Thompson, Margaret Moffatt and "Rags" Ragland.

On Sunday, Monday and Tuesday, August 24, 25 and 26, the Bayne will present Bette Davis and James Cagney in their first co-starring picture, "The Bride Came C. O. D." For the first time, Miss Davis depicts straight dramatic roles for comedy, and she proves herself to be most versatile and adaptable to the part.

"The Bride Came C. O. D." is an amusing tale of a spoiled young debutante with more dollars than sense, and an aviator with just the opposite combination. She is about to elope with a self-indulgent band leader, who hires Cagney to fly them to Las Vegas. Cagney, desperately in need of money, arranges to deliver the bride to her dotting father instead, for which he is to be paid \$10 per pound, C. O. D. En route, Bette balls out and lands in a catfish patch, near a deserted mining town, and from that point on, a series of hilarious comedy situations take place. Stuart Erwin, Eugene Palette and Jack Carson are featured in the supporting cast.

"One Night in Lisbon," a dramatic story of Continental romance, excitement and intrigue, will be presented on Wednesday and Thursday, August 27 and 28. Against a background of stirring European events of today, Madeline Carroll, portraying the role of a beautiful English girl who is a volunteer chauffeur for a Cabinet Minister, and Fred McMurray, ex-cowboy turned aviator, meet in an underground shelter during an air-raid in blacked-out London, starting a train of exciting events. Featured in the supporting cast are Patricia Morrison, John Leder, Billie Burke and Reginald Denny.

At the Roland

"Shining Victory," adapted from the novel written by A. J. Cronin, will be the featured attraction at the Roland today and tomorrow, August 22 and 23. Geraldine Fitzgerald, who was introduced to American audiences in "Wondering Heights" and "Dark Victory," and James Stephenson, who gained from prominence in "The Letter," are featured in the leading roles. Donald Crisp, Barbara O'Neill and Montagu Love also are included in the cast.

On Sunday and Monday, the Roland will present a double feature, including "Two in a Taxi," co-starring Anita Louise and Russell Hayden, and "The Great Train Robbery," featuring Bob Steele and Claire Carleton.

On Tuesday, Wednesday and Thursday, August 26, 27 and 28th, another double feature, "Repent at Leisure," featuring Kent Taylor and Wendy Barrie, and "King of Dodge City," starring Bill Elliott, will be presented.

Traveling Soil Conservation Exhibit

THE SOIL CONSERVATION exhibition train shown above which was operated by the Seaboard Railway in conjunction with the Regional office of U. S. Department of Agriculture has rendered an important service to agriculture in the Piedmont area of the Carolinas and Georgia. The farmers entering to see the exhibits and witness the instructive motion picture are from the district surrounding Raleigh, N. C. The purpose of this exhibit, in brief, was to show how water can be made to "walk down hill" instead of rushing madly and ruining valuable soils. Last year, it is estimated, over three million tons of soil—enough to fill a train of freight cars circling the earth 19 times at the equator—were washed and blown from the lands of the United States.

Farmers concentrate water, and taking care of the water at the end of a terrace is often a more important erosion control practice than building the terrace. At the left is shown before and after the bank at the end of this terrace was vegetated.

"In the Piedmont areas of the Carolinas and Georgia, the erosion problem is one of soils washing away and not blowing away," according to J. N. McBride, Seaboard General Agricultural Agent.

"It is of even greater importance now in these days of bulwarking the nation for national defense that everything be done to guard against needless waste," Mr. McBride stated.

Gen Rollin Tilton Commends 244th C. A.

Another honor was added to the 244th Coast Artillery's peacetime record this week with the announcement by Brig. Gen. Rollin L. Tilton, commander of the Chesapeake Bay Harbor Defenses, that the regiment has been selected as "Best National Guard Regiment" in the Third Coast Artillery District for the period April 1 to July 31.

In his letter of commendation to Col. Malcolm W. Force, 244th commander, General Tilton praised the officers and men of the "Old Ninth" for the "zeal and attention to duty which has earned this rating."

His letter continued: "This accomplishment is the result of hard work and cooperation on the part of both officers and enlisted men, and reflects great credit upon the esprit de corps which has been maintained within your organization as a result of your leadership. This excellent showing could only have been attained by every member of your unit doing his share as an enthusiastic and

loyal member of the 244th Coast Artillery."

The 244th was the first New York State National Guard regiment to leave for camp after its induction into Federal service on September 15, 1940. It was awarded the Coast Artillery Association Trophy last spring for posting the best firing record among the nation's National Guard Coast Artillery units.

learned with actions numerous Nursery Rhymes, "Winnie the Pooh," "Raggy Anne," and other songs. They love to march to music beating time with sticks, sand buckets, and shovels. Stories are read twice a week. Other times they draw their ideas of storms, boats, ocean waves, porpoises, or whatever comes into mind. They also make paper bag masks and work on clothes pin dolls, using multicolor paper napkins and wire.

A source of enjoyment is mid-morning refreshment of milk and crackers, served during rest period.

Before swimming they usually play under the umbrellas near the water, making boats, castles, and cookies out of sand. Special care is taken at the waterfront; half of the group going in the water at a time under the direct supervision of Mrs. Goodman, who is a Lifesaver, and her assistants.

The school meets Monday through Friday, 9-12:30 o'clock, at 30th Street on the beach. For information phone Mrs. O. B. Bell Virginia Beach-976 or Mrs. Robert Goodman Va. Beach-300.

Plenty of Water at the Faucets... with a MYERS Water System!

IN A water system, CAPACITY and RELIABILITY are equally important. The famous old MYERS trademark assures you both. You may open one faucet at a time, or draw water simultaneously from several different locations—in kitchen, bathroom or laundry—at outside hose taps—in barnyard and outbuildings. There will always be plenty of water at ALL faucets when you have a precision-built MYERS Water System of the type and size suited to your needs. Quality is never sacrificed to price in the manufacture of MYERS products. The absolute dependability of MYERS Water Systems is proved daily in thousands of farm and suburban homes. Ask for interesting free booklet and let us furnish an estimate on your requirements.

Comments And Resumes on War

Uppermost in many million American minds right now is this question: "What effect will the defense priorities have on the supply of goods for civilian use?" At this time, it is impossible to give an exact answer to that question. But, judging by information from Washington and the industrial centers, it looks like we're going to have enough of all the necessities and many of the luxuries of life to keep us going in comfortable style. There will be shortages in some lines, but there will be no grave disruption of the American economic system or the American standard of living, unless some unexpected catastrophe occurs. A lack of some important materials will make the use of substitutes necessary, but, according to the experts, these substitutes will be generally adequate in quality and reasonable in price. Here is how the outlook shapes up at this writing:

CLOTHING: No serious shortage in sight, though there is none too much leather on hand, in the light of military needs. Prices will probably go considerably higher for shoes and suits. In the case of lower price goods, quality may have to be lowered. Within a few months, silk stockings are expected to entirely disappear from the market, and there is not enough nylon and rayon to supply the demand. However, new types of cotton stockings are being developed, and are said to be excellent.

AUTOMOBILES: It has not yet been decided to what extent production will be cut. Best guess is that 1942 output will be at least 25 per cent under the record level established in 1941. It will be necessary for dealers to make larger profits per unit, so that values will be lower. The expected government excise tax will up the price of new cars substantially. There will be little chromium trimming, and there will be no aluminum for pistons, etc., after present stocks in carmakers' hands are exhausted.

OIL: The industry's capacity to produce is far beyond any demand that can yet be foreseen. But the transfer of tankers to Britain has created something of a transportation problem in this field. Main shortage is along the Atlantic seaboard, where some tank rationing may be put into effect. In the foreseeable future, there will be no lack of petroleum in other parts of the country.

HOUSEHOLD APPLIANCES:

PETTENGILL

"The Gentleman from Indiana"

UNITY

A new slogan fills the air. It is "unity." The pro-war groups, especially, clamor to "close ranks." Arranged in advance, unity advertisements blossomed in the papers the day following the election. Phalanx pledges, speeches, everything which voiced as deep and sincere convictions as this generation has ever held—the

MICKIE SAYS—

"TO MAKE MONEY, YA GOTTA SPEND MONEY, AN' WHERE KIN YOU SPEND IT ANY BETTER THAN BY ADVERTISING FOR MORE BUSINESS IN THIS NEWSPAPER?"

Heavy cuts in production will be made to conserve metals for military purposes. In the case of washers and refrigerators, the cut may go as high as 50 per cent. However, the cut will be made, as in the case of automobiles, on the basis of 1941 record sales. So, for some time to come at least, production will be close to normal levels. It is reported that the substitutes being being used for aluminum and nickel are satisfactory. Higher prices are to be expected.

FOOD: No shortage of any food is anticipated. If rationing of certain foods, such as in the case of meat, is limited, it will be very limited in extent.

HOUSING: In certain areas, notably those which contain major defense industries, there is a very grave shortage, and rents are soaring. This is one of the toughest problems the country has on its hands now.

ELECTRIC POWER: Shortages exist in a few areas, and utility experts say this is largely due to the government's "anti-utility" policy which has prevented much private expansion. The utilities, however, are now planning an ambitious development program, and are confident of their ability to meet the demand. In most of the country there is plenty of juice for both industrial and household needs.

What it all adds up to is that we will have less non-military production of a good many commodities—but the pinch will not be anywhere near so severe as scare rumors might lead us to anticipate. It is generally believed that the average price level will go ten or fifteen per cent higher, and most government experts do not seem to feel that any danger of real inflation has yet appeared. Great hopes are pinned on the ability to use oil as a weapon against inflation—they will deprive the consumer of a large part of the increased income which war spending is producing. In addition, Congress will undoubtedly pass some kind of price-control legislation.

Emphasis is being placed now on making goods give better service. Economists tell us to drive our cars slower to save motors, rubber and gas; to have our shoes resoled and our clothes repaired, instead of buying new. That is good advice.

An emperor of ancient times. (Continued on Page Five)

Red Cross Speeds Up War Relief Production Program

Princess Anne Chapter Has Large Quota To Be Completed by December.

The Production Corps of the Princess Anne Chapter, American Red Cross, is going into high gear as Fall approaches, in its effort to complete the largest quota of war relief garments which it has yet been called upon to produce, according to the Reverend Joseph B. Clower, Jr., Chairman of the Chapter. The Production Corps, which devotes itself to the making of garments for both war relief and the local emergency closet, has been active for the past two years. In both sewing and knitting it functions entirely separately from the newly-formed Port Story and Camp Pendleton Production group, which has taken over a portion of the Port Monroe quota, and the two should not be confused in this respect. The only production field in which the two will work together is that of surgical dressings. The Princess Anne Chapter, having been given no surgical dressing quota for this fall, will assist the Army group in its quota, just as last winter the Army women worked for Princess Anne. The Princess Anne sewing and knitting quota, for which materials have now been received from National Headquarters, calls for 50 layettes, 48 bedshirts, 17 hospital operating gowns, 48 girls' dresses, 12 women's dresses, 40 boys' shirts, 40 knitted suits for small boys, 36 adult sweaters and 48 children's sweaters. As these are to be ready by December, all Princess Anne women (Continued on Page Eight)

Wireless Inventor Honored Sunday

Services commemorating the work of Reginald A. Fessenden, wireless pioneer were held Sunday afternoon at 3:30 at Old Port Raleigh on Roanoke Island, N. C., when many prominent guests participated in a program dedicated to a park as a memorial to the inventor which will bear his name. E. Stuart Tucker, of Norfolk, chief electrician and head of Group 1 and 2 Naval Training School at the Naval Operating Base, a personal friend of the late inventor recounted stories of their association. Mr. Tucker's friendship with Fessenden began when as a boy of fourteen he sailed on the same ship with him from Bermuda to Philadelphia. For two years this man of genius made experiments on Roanoke Island and in 1901 transmitted a wireless message from Roanoke Island to Hatteras—a distance of fifty miles. By this achievement Fessenden became convinced that he could transmit messages around the world with his invention.

Later, Fessenden was the first to span the Atlantic with a two-way radio. In all, he was granted patents on about 500 inventions. Two of the better known are the fathometer (Sonic Depth Finder for submarines) and the turbo-electric drive for battleships.

A Canadian, Fessenden spent only two years in North Carolina, but since the success of his invention was developed there Mr. Victor Meekins a group and from that state, recognizing the great value of his work, have purchased the 40 acre tract where his notable work was done.

It is planned to erect a memorial at a cost of \$100,000 on the site of the 40 acres, which well known as Fessenden Memorial Park. It is expected also that a bridge to be constructed by the state across Croatan Sound from Roanoke Island to the mainland will be named after Fessenden. Secretary of the Navy Knox has announced that the inventor's name has been placed on the list of famous patriots to be commemorated by the U. S. Navy under the preparedness program. "Fessenden, Builder of Tomorrow" was written by Helen M. Fessenden, wife of the inventor, and is a story of great human achievement. Orders for the book, when mailed to the Fessenden Memorial Association at Manteo, N. C., will indicate the buyer wishes the price of the book to be applied to the memorial fund.

Princess Anne Schools To Open Thursday

F. W. Cox, Superintendent Announces Teaching Staff For The Term.

F. W. Cox, Superintendent of Princess Anne County Schools, has announced that everything is in readiness for the opening of all county schools on next Thursday.

During the summer, according to Mr. Cox, a group of repairmen have painted buildings and have made alterations and minor repairs to several of the buildings. The repair work will be brought to a close this week. Likewise, the fleet of twenty-two school buses has been thoroughly checked and placed in first class condition for the opening.

The attention of parents is again called to the requirement that children entering for the first time must have been vaccinated against smallpox. New students must also present birth certificates and the new state certification provides that no child may enter school this fall who has not reached his sixth birthday on or before September 1st.

Text books will be handled from the School Board office, located in the Court House building, but all orders will be placed with the individual teachers and assembled by the school principals. Prompt delivery of books will be made and parents are urged to secure the books on the opening days.

For a long time it was thought New Bayside School would be ready for occupancy at the opening, but delays in materials and labor shortages prevented this, and it will probably be October 1st before these facilities are available. Temporarily, the children of that area will be housed in the present Bayside building, and the use of the Haygood Hall has been extended the church officials. The hall is located a few hundred yards from the school.

The present plan calls for the children north of Virginia Beach Boulevard to attend the Bayside school, and for children residing on the Boulevard or south of the Boulevard to attend the Kempville school.

The opening will be preceded by a meeting of Principals with the Superintendent on Tuesday afternoon at 3 o'clock at the Court House, and a meeting of all white teachers at the Oceana High School on Wednesday, September 3, at 10 o'clock a. m.

The teaching staffs of the schools, with the exception of one position at the Oceana High School which was made vacant by the resignation of Earl Hillman, who goes to Norfolk, have been completed and are as follows:

DIRECTORY OF TEACHERS 1941-1942

Oceana High School
R. H. Owen, Principal, Ruth Gornth, Gladys Bracey, Marion Hurt, Margaret Saunders, Louise Cloud, Mary Alice Hite, Faye Caroon, Elaine Bentley, S. Blair Myers, Howard Thomas and Eleanor Phillips.

Oceana Elementary School
Thelma Connings, Kathleen Smith, Elizabeth Brinkley, Lillian Kellam, Ingene McCutcheon, Louise Duke, Edna Gibbs, Frances Boswell, Virginia Widgren, Mabel Cones and Ethel Peters.

Kempville High School
F. L. Fessenden, Principal, John (Continued on Page Five)

Baptist News

Rev. Frank Hughes, Jr., Supply Pastor at the First Baptist Church, has announced the schedule of services on Sunday as follows: 11:00 A. M. Worship Service; Topic, "We Are Expecting Great Things of You, Son."

3:00 P. M. Worship Service; Topic, "Some Ways of Service."

NOTICE

The regular monthly meeting of the Town Council of Virginia Beach has been postponed until Monday, September 9th, on account of Labor Day. This meeting will be the inaugural meeting at the new Town Hall on Baltic Avenue and 20th Street.

Time To Submit AAA Applications For '41 Program

Farmers' Receipt of Checks Hastened By Promptness

Continuing its policy of simplifying the program in every feasible way, the AAA points out that farmers who participated in the 1941 program need sign only one application in order to receive both conservation and parity payments for which they may be eligible. Formerly it was necessary to sign a separate application for each type of payment.

Performance checking of practices carried out on farms during the 1941 program year is well along toward completion, and soon after a farm is checked by a supervisor the application for that farm may be prepared in the county office for the signature of the operator, says S. K. Sassell, state executive assistant. The application is a record of conservation and soil-building practices carried out on the farm. It also shows whether the farm operator is eligible to receive parity payments.

Application for payment forms, No. ECR-520, have been sent to all county associations by the state office and it is hoped that applications for all farms checked for performance will soon be executed and submitted for payment, Mr. Sassell says. The earlier a farmer's application is submitted the sooner he will receive his payment.

School Principal Ready To Confer With Parents

Book Exchange To Be Operated At School.

R. H. Owen, Principal of the Oceana High School, has announced that he will be at the school on Monday and Tuesday, September 1 and 2, until noon each day, to confer with parents who wish to enter their children for the first time, and so that High school students transferring from other schools will have an opportunity to arrange their schedules before opening day, and that the school opening day confusion.

According to Mr. Owen, as previously stated, the school day on Thursday will be from 9 o'clock a. m. to 12 o'clock noon. On Friday, the regular school day period will begin.

For the past several years, the school has operated an exchange shelf through which pupils have had an opportunity to buy and sell used books. This plan will again be observed.

For the information of new students and parents of new students, Mr. Owen stated that Oceana High School has for many years been accredited by the State Board of Education, and is a member of the Southern Association of Secondary Schools and Colleges. Students who follow the College Preparatory Course may enter any college or university in the South without an examination. The school is a member of the Virginia Literary and Athletic League. The League classifies schools according to enrollment, and Oceana falls into Class B Division.

Football practice already has started. Uniforms have been issued to several students, and intensive training will begin early next week. The first game will be played on Friday, September 13, when Oceana will meet South Norfolk High School in South Norfolk.

Game & Fish Council Names Pugh V. P.

John A. Pugh, III, an enthusiastic member of the Norfolk Game and Fish Council, has been elected Vice President of the Advisory Council for Game and Fish Conservation at a meeting held in Richmond recently. Mr. Pugh is a member of the Board of Directors. The President of the Council is Benjamin T. W. G. of Urbana, and O. G. Jackson, of Hot Springs, is Secretary. Other members of the Board of Directors from the Tidewater area are Dr. C. T. Mercer, T. J. Hurd, and W. M. Pergerson.

New Town Hall And Jail Open This Week

Prominent Railroad Official Dies

Edwin Dewees Kyle, of Alton, Princess Anne County, prominent railway official for many years, died Sunday evening at a Norfolk hospital, at the age of 72. Mr. Kyle, a native of Fayetteville, N. C., began his career with the Cape Fear & Yadkin Valley Railroad in 1885, occupying various positions in the freight office at Fayetteville, including that of cashier. He steadily rose in capacity with that road until 1891, when he became general freight and passenger agent on the Charleston, Sumter & Northern Railroad. After having held sundry places on the Seaboard Air Line and Norfolk Southern railroads, he finally, in January, 1920, assumed the vice presidency in charge of traffic on the Norfolk Southern and kept this rank until the time of his retirement a few years ago. For the past year Mr. Kyle has resided in Princess Anne County.

The deceased is survived by two sons, William Emmett Kyle, of Alton; Edwin Dewees Kyle, Jr., of New York; one daughter, Mrs. Duncan Mac Rae, of Bel Air, Md.; two sisters, Miss Frances Kyle and Mrs. Lawrence Williamson, both of Fayetteville; and a number of nieces and nephews.

Funeral service for Mr. Kyle, were held at 2 o'clock Tuesday afternoon at St. Paul's Episcopal Church, with the Rev. Stiles Lines, rector of the Eastern Shore Chapter, officiating. There was a large attendance and many floral offerings. Burial was private in Eastern Shore Chapel Cemetery, Oceana. The pallbearers, vestrymen of St. Paul's Church where for many years Mr. Kyle served as a member of the rectory and as senior warden, were J. Frank George, H. Page Hoggar, Herbert N. Lee, Albert C. Serpell, E. E. Wright, R. R. Anders, T. T. Hubbard, Jr., J. F. Wright, Charles M. Andrews, Alex. H. Bell, M. E. Cruse, Calver R. Day, Thom B. Lane and Wylie R. Wood.

Coates Home Destroyed by Fire

Edmund W. Coates, known to thousands as the blind operator of a filling station located on the old Waterworks Road, suffered the loss of his home by fire early this week when the building was struck by lightning. Coates, his mother and an aunt were inside the building when it was struck, but all managed to escape.

The two-story frame dwelling was completely destroyed, along with its furnishings and several hundred dollars in currency.

Only a few months ago, Mr. Coates' wife and child were fatally injured in an automobile accident.

Tides and Sun

(Reported by U. S. Weather Bureau, Cape Henry)

Friday, Aug. 29—High water, 12:37 a. m.; 1:19 p. m.; low water, 7:50 a. m.; 7:55 p. m.; sun rises, 5:32 a. m. sun sets 6:38 p. m.

Saturday, Aug. 30—High water, 1:42 a. m.; 2:28 p. m.; low water, 8:02 a. m.; 9:02 p. m.; sun rises, 5:33 a. m.; sun sets 6:36 p. m.

Sunday, Aug. 31—High water, 2:54 a. m.; 3:38 p. m.; low water, 9:11 a. m.; 10:06 p. m.; sun rises 5:34 a. m.; sun sets 6:35 p. m.

Monday, Sept. 1—High water, 4:06 a. m.; 4:46 p. m.; low water, 10:15 a. m.; 11:06 p. m.; sun rises 5:35 a. m.; sun sets 6:33 p. m.

Tuesday, Sept. 2—High water, 5:09 a. m.; 5:39 p. m.; low water, 11:17 a. m.; 12:13 p. m.; sun rises, 5:35 a. m.; sun sets 6:32 p. m.

Wednesday, Sept. 3—High water, 6:02 a. m.; 6:23 p. m.; low water, 12:01 a. m.; sun rises 5:36 a. m.; sun sets 6:30 p. m.

Thursday, Sept. 4—High water, 6:50 a. m.; 7:14 p. m.; low water, 12:46 a. m.; 1:03 p. m.; sun rises, 5:37 a. m.; sun sets 6:29 p. m.

Note: Above tides are calculated for Virginia Beach. To correct for other points make the following additions to the hours given: Naval Operating Base, 5 minutes; Lynnhaven Inlet, 5 minutes; Cape Henry, 5 minutes.

Offices To Move Over Week-End and Council Meeting Will Be Held on Second Monday.

Jail To Be Completed in Two Weeks.

This week-end will bring to the town of Virginia Beach two improvements which have been needed for a long time—the opening of a new Town Hall, in which the official and administrative offices of the town will be housed, and the new two-story modern jail building, to be located directly behind the new town hall, which has been erected next to the Police and Fire Station.

The new Town Hall building will accommodate the entire official force of the town, as well as having a spacious Council chamber. Vaults have been constructed to store all official records, with adequate security against fire.

The new jail building is of two-story construction, of modern design, with all sanitary provisions for the separation of sex and race, and each cell block will include shower bath facilities.

Both of the buildings are of brick structure, and are fire-proof. The designs are similar to that of the Police and Fire Station.

With these new units, all of the municipal buildings are in one location, which will greatly facilitate operations and eliminate the many fire hazards that previously existed at the old Town Hall. These new buildings were constructed at a cost of \$18,000. The town owned the property upon which they were constructed, and the old Municipal building was sold to defray part of the expense.

Coates Home Destroyed by Fire

Edmund W. Coates, known to thousands as the blind operator of a filling station located on the old Waterworks Road, suffered the loss of his home by fire early this week when the building was struck by lightning. Coates, his mother and an aunt were inside the building when it was struck, but all managed to escape.

The two-story frame dwelling was completely destroyed, along with its furnishings and several hundred dollars in currency.

Only a few months ago, Mr. Coates' wife and child were fatally injured in an automobile accident.

Entered as second class matter August 7, 1925, at the post office of Virginia Beach, Va., under the act of March 3, 1879.

"THE VOICE of a majority, swaying the course of government does not insure good government except it be the voice of a well-informed and well-intentioned people."

DISCIPLINE

Billions of dollars are being spent on National Defense and 90 percent of the citizenry of the United States is being told that we must "tighten our belts," pay higher income and excise taxes, and do without many of the necessities and comforts of life, in order to support the defense program.

We are told that we must stay at home on Sunday. Housewives are told that they must deny themselves the convenience of a new washing machines in favor of the old-fashioned, back-breaking washtub. Women everywhere must do without the pride of every woman's heart, sheer silk stockings. Young marrieds are told that they must do without many of the furnishings for the new home that they have dreamed about. And most of us are willing to sacrifice, if necessary, for the defense of the country we love—but Private John Habinayk is not willing—he isn't willing even to observe the rules of sanitation.

The sentence of ten years' hard labor in the Federal Penitentiary at Atlanta, which was imposed upon the Army's troublemaker, whose insubordination and surly disregard for Army rules and regulations resulted in court-martial proceedings, has been reduced by the War Department to three years, to be served in the disciplinary barracks of Fort Lavenworth, Kansas. With time off for good behavior.

Certain members of Congress severely criticized the action of the military board in imposing the original sentence. This seems rather unusual to us, in view of the fact that we have been told repeatedly that "we already are in the war." If this were true, and the Army actually were on a war-time basis, Private Habinayk would have been subject to even more severe punishment than that which was imposed. The hue and cry that has been raised over this incident, and the attitude of certain members of Congress and "veteran officials" of the War Department who were "amazed" by the court martial sentence is reminiscent of the indulgent parent who argues, "Mustn't interfere with Sonny's screaming tantrums—he'll become inhibited."

We have heard much in the past few months concerning the value of "morale" in the Army. We agree that "morale" is important, but what value is "morale" without discipline?

Inducted on June 23 and assigned to the First Field Artillery Training Regiment at Fort Bragg, N. C., by July 4th Private Habinayk was in serious trouble with his superiors. From the beginning, he demonstrated a belligerent attitude and complete disregard for Army regulations. Just as "one rotten potato can spoil a barrel of good ones," so one surly belligerent soldier can destroy the morale of an entire regiment.

Private Habinayk's bellicose statement that he earned \$10 a day in civilian life and wasn't going to work for Uncle Sam for \$21 a month, is repellent to those of us who realize that, were it not for Uncle Sam, he would never have earned \$10 a day, or it's equivalent, in his occupation as a coal miner. In no other country in the world are wages so high, working conditions so pleasant, or living conditions so comfortable and cheap as in the United States.

Hundreds of thousands of young men, from all walks of life, have given up good jobs and careers "for the duration," have settled down to the job of making good soldiers. Just why Private Habinayk should feel that he is an exception because he gave up coal mining at \$10 a day (that is, when he wasn't out on strike) he has not explained.

Frankly, we feel that it is rather unfortunate that he could not be compelled to serve in the German industrial system for a few months, so that he could learn the meaning of labor without compensation. Or, perhaps, in the St. Peterburg, Russia, where a crowded, dark, dank, and "glory" for the state would be his compensation.

As for political interference in Army affairs, it is too bad that the Congress of the United States has been so stripped of power by the present Administration that it has become an ineffectual and somewhat desperate body, casting about for some method of exercising its authority. We sympathize with them, but we do not think that they of present world conditions, as a medium should use the United States Army, in view

through which to demonstrate that authority.

THE NEW TAX BILL

The new tax bill, which was passed by the House and is now in the Senate, has many merits. But it likewise has defects which should be remedied before final enactment.

The House is to be complimented on removing the clause which would have forced husbands and wives with separate incomes to lump their earnings in a single return, and so pay a far higher total tax than would otherwise have been levied. This provision was manifestly unjust and, in effect, amounted to placing a definite economic penalty upon the institution of marriage.

Prime weakness of the House Bill, in the view of most economists, lies in the failure to place an equitable tax upon those in the lower income brackets who will receive the bulk of the wages resulting from defense spending. President Roosevelt requested that exemptions be reduced, but his advice was rejected. So it is up to the Senate to correct this defect. The gigantic cost of defense can only be met if all income strata contribute their fair share. Furthermore, if we are to prevent runaway price inflation, a curb must be placed on consumer purchasing power, and the only way to do that is to directly tax those groups which are reaping the richest harvest from the war boom.

As the President also pointed out, the sections of the bill dealing with excess profits and corporation taxes, need revision. At present, certain classes of business are heavily penalized, while other classes, by comparison, are unduly favored. Many fear that the bill places almost ruinous tax burdens on some industries whose survival and progress is vital to the national welfare.

The Senate has a big job on its hands. The future security and prosperity of this country will depend to a large extent on how well that job is accomplished.

MULTIPLYING DEFENSE EFFORT

The Office of Production Management announcement that six corporations holding defense supply contracts with the War and Navy Departments have contracted for 31.3 percent of the total dollar volume of such contracts may perhaps raise in the minds of some folks that old and tattered specter of the 60 families who are mistakenly supposed to be "in the war." At first glance it might appear to be meat for the hungry critics of our industrial system.

But what are the facts? When we look for our gigantic defense effort first appeared, the government naturally turned to big corporations, because they were the ones who could handle big jobs most quickly. They had the plant facilities, the managerial skill, the trained labor for the work. They got the contracts because they had the required experience.

But even though they have the prime orders, they do not do any of the work. They handle government business just as they handle their own—what they can't do themselves, they let out to others. And, investigation reveals, they are letting out more as the urgency of the situation increases.

Few people realize the great amount of sub-contracting that is being done today. For that reason, a recent check made by the Army-Navy Munitions Boards today. For that reason, a recent check has considerable interest. According to it, 4,750 direct contractors are using 28,000 sub-contractors and sub-sub-contractors—an average of nearly six plants at work on some operation of each order.

A case in point is furnished by a leading manufacturer of airplane motors. From a 69 million dollar contract which it received, this company has sub-let 30 million dollars of work, or approximately 43 percent of the total. All told, it is using exactly 200 different sub-contractors on the job.

Another company with a 17 million dollar machine gun contract has sublet 11 million dollars of it, or 64 percent of its work.

A manufacturer of aviation and nautical instruments is already buying 350,000 man hours a month from sub-contractors and within a year expects to increase that figure.

Cases like these are typical of the way in which defense effort—and defense spending—are being spread out among companies large and small all over the country. Industry today is sub-contracting to the greatest extent possible for maximum efficiency. In that lies the secret of our rapidly expanding armaments production.

WE DEFEND THIS TRUTH

What are we arming to defend? What is it that we Americans hold so precious that we are willing to accept great material and physical sacrifices if need be to make sure that it is not destroyed?

Not just the good land we have here, or the wealth of useful goods and products that people of this country. Much as we value these, a better answer than that is needed. And Roy W. Moore, noted industrial leader, recently provided a sound definition of the heritage we inherit.

Mr. Moore described our American way in the following words: "It is the right of a man to think, his own thoughts through, and to express them in print or by word of mouth. It is the right of assembly and petition. It is the right of protection against tyranny of a king and edict as opposed to the due process of responsible law. It is the right to choose that device of relations with the Almighty spirit of Life which best will nurture the individual's spirit

BOOKS TO OWN

From the heart of France's travail comes a welcome message to all lovers of French freedom: the news that ninety-five per cent of the French people are united in the passionate ambition to liberate their country from the German yoke. This news reaches us in the thousands of letters which, written by French people—have been smuggled out of the country somehow, usually by travellers. The letters are by peasants, factory workers, professors, priests, soldiers—of every religion, social class and political party.

THEY SPEAK FOR A NATION is an edited selection from these letters. It forms a moving commentary on the mournful condition of a great, spirited people temporarily reduced to slavery. Many of these letters were sent to individuals in England or America. Many were addressed to the N. B. C., the B. B. C., General de Gaulle—or simply addressed "to America."

Uniformly they reveal an indomitable will on the part of the French never to submit in spirit, to the rule of that people who have overrun France thrice within the last three-score years and ten. As yet, this will has found no other medium of expression than such letters as these. Bewildering, mingled with a stoical acceptance of the inevitable, is the surface note. But determination toward ultimate action is the basic mood of men in both occupied and unoccupied France (is there any difference?) today, if we can accept the testimony of these letters.

As for Marshal Petain, it is stressed here that those Frenchmen who accept him as leader, in preference to the absent General de Gaulle, he is—rightly or wrongly—a symbol not of collaboration with the Nazis, but of subtle diplomatic resistance. "A hatred growing deeper by the day divides the two nations," says the writer of one letter. The people generally have a formula for describing the collaboration sought by the Nazis, says another. It is: "Give me your watch and I will give you the time."

These letters—often pitiful, often tragic—are consistently hopeful. They reveal the atrocities of which we have heard so much. Yet they show that even the French know they are lucky compared to the Poles! "Today nearly all the French frankly wish for the British victory," says one. It is true that this collection is an edited, selected one. There may be other sides to the matter. But if there are, their convincing evidence has not appeared in print to the knowledge of this reviewer. Until it does, THEY SPEAK FOR A NATION—so admirably presented by the editors, Eve Curie, Philippe Barres, and Raoul de Roussy de Sales—must be accepted as the voice of a tormented France, of which Vichy is no true representative.

Poetry

The Scales Are Rust

The pedestal is shattered now and bare
Where Justice stood; her broken
scales are rust;
And silence falls along an empty square
With scraps of blood-stained paper ground to dust.
The silence falls across the phantom beat

Of drums of death, the ghost of women's sobs,
And ugly phantasies of marching feet.

Of droning wings, the roar of surging mobs.
Her scales are rust. Within the market stall
Men barter off old standards, desecrates

The one she raised. Trading like Goth and Gaul

He proffers lives for land—uneven weights—

Beauty for blood, and brotherhood for power,
As gain he holds—this stained dishonored hour!

Lo! the Savage Clark—Wings

Keep looking down and you'll find the world the limit. Keep looking up and the sky is

No men is as bad as he thinks on the morning after.

Many people who pass for optimists are just too lazy to kick.

The later you stay up, the better the radio program gets.

Be progressive—read your country newspaper.

Behind The Scenes In American Business

TIME TIGHTENING—Empowering of Federal Reserve Board to set up regulations governing installment financing has two-fold purpose: To guard against inflation and post-war slump by curbing public tendency, in times of expanded payrolls, to "buy beyond its future income," and to slow down somewhat the consumer demand for many goods and articles using materials needed for defense production. Autos and major household appliances will be most vitally affected by degree of controls to be imposed—since about two-thirds of all autos, and about three-fourths of all refrigerators, stoves and washing machines, are sold on the installment basis. Regulations will be along two main lines—requiring larger down payments, or shorter terms for paying up, or both. Metropolitan department stores aren't too much disturbed by immediate prospect. Despite relatively high unit prices for big household appliances, these in 1940, for instance, represented only 2.1 per cent of total sales of nation's department stores.

WINNING IN AIR—The struggle to oust German-Italian airline control over strategic South America routes is showing the beginnings of an interesting victory for American-controlled airlines. Recent figures reported by C. V. Whitney, board chairman of Pan American Airways, show that since the outbreak of the European war, airlines operated or sponsored by Americans in South America have gained two route miles for every one lost by Axis operated lines. The net loss sustained by the Axis from September 3, 1939, to August 6, last, totals 8,173 miles, while U. S. operated or influenced airlines gained 15,056 miles, according to the Pan American report. Whitney described Axis airline operations in South America as a "time bomb" aimed against the Americas.

NORTH OF THE BORDER—Since we may be inclined to think only of our own tremendous upsurge in industrial activity produced by the present program of similar stimulation of business and production in our northern neighbor, the province of Quebec, may be of interest. According to official word from the Hon. Adélard Godbout, prime minister of the big French-Canadian province, the impact of the war has brought new all-time highs of production in many lines of essential raw materials. The shortage of skilled labor, which has been a serious handicap elsewhere, has been less keen in Quebec, where diversity has long characterized industrial activity, he reports. Programs of training set up by employers within their own establishments, and by the government's provision of new technical courses in schools, have been a big help, too. Even with all this activity, the province has been able to carry on as handsomely as ever with her huge "tourist" industry. Indeed, the tourist trade, the prime minister reports, has shown a steady increase since the start of the war, and this year will see an all-time high in American visitors. Mr. Godbout points out that this heightened tourist activity "has another very significant effect, in providing Canada with United States funds with which to pay for the great armament supplies which the great American public is providing for our common cause."

WEDDING BELLS—Behind the contract by which Aluminum Company of America the other day voluntarily turned over to TVA the direction of Alcoa's huge hydro-electric power system in the Tennessee valley is more than a desire that the utmost power development of the valley be assured for a national defense. There is also a record of some five years' amicable cooperation between the two big industrial concerns, prompted by I. W. Wilson, the company's vice-president in charge of operations, to state that "we have been betrothed for some years, and this constitutes the marriage contract." David E. Liffenthal, TVA chairman, characterizing the agreement as "one of the most important developments in the relations between government and business in our time," said that the integration alone would increase productive capacity of TVA by 22,000 kilowatts, enough to make 22,000,000 pounds of aluminum a year. Under the contract, Alcoa turned over without cash compensation the famed Fontana damsite, largest remaining undeveloped power site in the East. When the \$50,000,000 dam is completed, the company's existing dams downstream will receive

STICK TO YOUR JOB!

As Others See It

Norfolk's Wise Action Fortsouth Star

Those many inlanders of Virginia and other places who visit the beaches of Norfolk during the summer months will be grateful for action taken by a majority of Norfolk City's Council last night in adopting an ordinance requiring those who rent fishing boats to supply each passenger with a life preserver, and to limit the passenger load of the boat according to the size of the boat itself.

This is all in the interest of safety, and had it been a law early in the present year instead of becoming one in September when the season at the beaches is over, it would no doubt have resulted in the saving of several lives which were lost by the capsizing of fishing boats off Ocean View in storms, throwing occupants who could not swim, into the bay.

Two members of the Norfolk Council voted against adoption of the ordinance because they felt the use of jumper built fishing boats, which are extremely light and unsinkable, would prove to be the best possible life preservers that can be used. One of them even went so far as to remark facetiously, that the ordinance ought to go even further and require the operators of the boats to build "little houses on the boats to keep the fishermen dry in event of rains."

That is all right for those who have lived on the shores of Willoughby Spit and Ocean View for years and are accustomed to the water, know how to handle a boat in a storm, and know how to swim back to a boat that has capsized. But what about those thousands of people who visit the beaches from Richmond, Petersburg, Roanoke and many other places who go fishing at the local beaches, feeling they are protected by the operators of the fishing boats, only to find when a sudden squall swamps the boat, that they are helpless. Panic usually results, and those who can't swim are at the mercy of the waves and winds. Tragedy usually is the sequel.

It has happened every year. It would continue to happen if no precautions such as has now been provided in the new ordinance had not been taken. The three Norfolk councilmen who voted in majority for the life saving ordinance deserve the thanks of all.

The Editor Aims His Views

On The Idle Rich By Paul F. Watkins in the Ashland (Va.) Herald Progress

The Editor combined business with pleasure and took another installment on his vacation over the week-end . . . two days at the home of the Editor attending the sessions of the Virginia Press Association. The Editor is not one of those foot-loose and duty-free individuals who can take one or two weeks off at a time. He has to break his vacation into week-end bits and take it here and there and now then as the opportunity arises. We ask no sympathy. It isn't a bad system. We never stay away long enough to get bored and we've always got a part of our vacation coming to us even if we don't get it . . . which we usually don't.

(We especially enjoy the brief and unaccustomed luxury of a stay at one of the swankier resort hotels. Our idea of luxury is made up of such little things;

Two eggs for breakfast, choice of meats for lunch, hors d'oeuvres on a tray, clean napkins every meal, clean sheets every night, clean towels every day, ice water by the bed, a free copy of the morning paper at the door, soft rugs in the corridor, soft lights, soft music and the blessed certainty when the phone rings it won't be someone calling up to complain, "Mr. Watkins, I didn't get my paper this week."

New Doubts In Germany New York Times

The renewed and intensified bombing of German cities, especially Berlin, is plainly having a psychological as well as a material effect. The people did not expect it. The war was to be kept far away from them. Goering himself promised the Ruhr cities: "You will not be exposed to a single enemy bomb from enemy aircraft; and only the other night British raiders caused a fire a mile and half long in and around the Krupp armament works at Essen, while other aircraft produced large fires in Berlin. German officialdom has at last acknowledged that the men, women and children of German cities have been "brought into the front lines" by enemy aerial assaults.

There are other factors in Germany's uneasiness. The Germans grow and eat that they have a friend left in the world. Japan "cooperates," but only in the degree that cooperation seems to be to Japan's advantage. Whatever the Fascist Government of Italy may do, the Italian people dislike Germany with an intensity never before equaled. The French people, helpless as they are under the German heel, remain strongly pro-British. In Denmark, which was to be made a puppet state by German generosity, the occupying forces receive the cold shoulder. It is "a land of ice," the soldiers complain. The populace has even adopted a little red, white and blue emblem with the letters D. K. S. (Den Koide Skulder) to keep its attitude at zero temperature. In other conquered and ravaged lands increasing sabotage and constant guerrilla attacks tell the story. For the German people there is no end in sight.

The Foolish Japanese New York Herald Tribune

A dispatch from the United Press correspondent in Tokio reporting a move afoot to abolish baseball in Japan seems to be the last straw in the growing insanity of a once sane people. This "imported Western spirit" is to be replaced with boffing one another over the head with staves or wrestling in the ancient style of greasy and greasy people. Yet as recently as 1940 The Japan Yearbook reported that baseball is "the most popular and widely played game . . . and the American pastime is now recognized as the de facto national game of this country." So prominent have the Japanese become moreover at this modern cricket that their university teams toward the United States for years until the "incident" on Chinese terrain. They were tough babies to be sure, because for the most part they were amateur and drew an all-star team from the American big leagues went to Japan crowds of 85,000 and 100,000 came to see the two big games. And if

It takes all nations to live at
peace. But one can precipitate
war.—Paul V. McNutt.

If you have cold feet you have
a right to expect the world to keep
you in hot water.

We must be a hopeless optimist,
because nowadays things always
turn out far worse than we ex-
pected.

Make yourself comfortable—if
possible.

Carry on with the newspaper.

SOUTHERN
WILDLIFE

Safe In-need!

F. Y. Benbow, game protector
for Avery County, North Carolina,
writes: "One day last spring I
checked 43 licenses and one dead.
I called on a man who owned a
license to check his license. He said
that he owned the land and called
to his wife who was sitting on
the bank to show me the deed. She
pulled it out from under her
pion and began to show it to me.
I asked her why she had the deed
here on the creek bank and she
replied that she thought I would
be along and she did not want me
to take her husband to jail for
fishing."

Angler's Dictionary

REEL—A coffee mill invented
by Satan and destined to snarl
the fisherman at critical times, thereby
inducing profuse profanity.

FISHING LINE—An expensive
piece of string. It snarls, gets
snagged, and is guaranteed to
break at the right time, thereby
creating the alibi for the "who-
per" that always gets away.

"WHOPER"—A term used
to describe all fish which get
away. Associated words are
"wale," "lunker," and "sock-
dolager."

CREEL—The distinctive item of
a trout-fisherman's uniform. A
fragile wicker basket in which to
hide a worm can carry a fly
hook, lunch, etc. Occasionally
used to hold small trout.

WADERS—An effective means
of carrying water from the stream
to a convenient log. Guaranteed
to keep the feet hot in summer
and freezing in cold weather.
"Waders" hold more water than
"boots," and are preferred in put-
ting out camp-fires.

FLIES—A feather imitation of
nothing-ever-seen, with a very
fanciful name, and the favorite
food of house moths. Flies are
principally used to decorate fish-
ermen's hats and bushes along
the stream.

BOAT—A leaky tub, with a to-
mato can for bailing, and a pair
of mismatched oars. Antique boats
command a high rental.

PLUG—An instrument for re-
moving trash old shoes, brush and
sunken logs from streams, lakes
and ponds. Unusually effective at
snagging overhanging limbs, your
pants, river bottoms and fly nets.
Comes in thirty thousand differ-
ent forms, sizes and shapes. De-
signers fondly think of them as
lures for fish but they are much
more effective in hooking the
fishermen.

Squirrel Battles Snake

Mr. C. C. Barton of Temple,
Texas, was driving recently near
a creek on a farm he owns eight
miles north of Temple when he
noticed a large snake twisting and
rolling. Barton got out of his
car, picked up a club and start-
ed for the snake. Then he noticed
that an adult squirrel was bat-
tling the reptile twisting and turn-
ing with every move it made. The
little nut cracker had bitten the
snake clear through its head. There
was a half grown squirrel under
the snake. It was injured but
managed to follow its mother to
a tree when Barton approached.
It wasn't necessary for him to
kill the snake.

Frog Industry Jumps

You'd probably be surprised to
know just how big the Louisiana
frog industry is. During the past
year there was a production of
2,015,516 pounds, which represented
the same number of frogs with
an average weight of one pound
each. At the market price of
\$1.35 per dozen, there was a re-
turn of \$226,787.55 to those en-
gaged in this industry.

Hot and Cold

A famous general once said with
reference to war strategy: "Just
get there first with the most
men!" That might apply also to
many things we see every day
and then mentally kick our pants
while remarking: "Why didn't
I think of that!" Generally, they

Defense Bond Quiz

Q. Can my children buy Defense
Savings Stamps?

A. Yes. Hundreds of thousands
of American children are buy-
ing stamps regularly as their
share in the national savings
program.

Q. Why should children be en-
couraged to buy Savings Stamp?

A. Because by buying Stamps
they write their names on a
Roll of Honor of Americans who
are doing their part to show the
dictators that united America
will never flinch to preserve her
sacred liberty.

Q. After my child has collected
enough Stamps to exchange for
a Bond, can the Bond be re-
gistered in the child's name?

A. Yes. A minor may own a De-
fense Savings Bond. Many par-
ents are registering Bonds in their
children's names to prepare for
future educational needs.

NOTE—To buy Defense Bonds and
Stamps, go to the nearest post
office, bank, or savings and loan
association; or write to the Treas-
urer of the United States, Wash-
ington, D. C., for a mail-order
form.

Test before you invest for ad-
v. newspaper.

are so simple, too.

For instance, I wish I'd thought
of that pint thermos set outfit.
It consists of two neat thermos
bottles with big aluminum cups
and a leather case with handle
and zipper top. It enables the
sportsman to take hot coffee and
cold water with him on a fishing
trip—both in the same thermos
case. Why didn't I think of that?

E. L. Bean, Inc., 123 Main St.,
Freeport, Maine, puts it out.

Oven Drying Is Easy

Did you know that corn dried in
the oven is just as palatable as
canned corn and is absolutely
safe against botulism (food pois-
oning)? Drying vegetables and
fruits is particularly recommended
for those who do not have a pres-
sure cooker. First, give all prod-
ucts a thorough cleaning, then
scald in boiling water or live
steam for 5 to 10 minutes. A de-
hydrator made from wood and
metal can be used over the stove,
but a great deal of drying can
be done in the oven. The tem-
perature for drying should not
exceed 150 degrees which can be
maintained with a very limited
quantity of fuel. Keep the oven
door slightly open to allow the
steam to escape so that the prod-
ucts will actually dry. The
length of time varies from 2 to
3 hours for leafy vegetables, up
to 6 or 8 hours for peas or cut
string beans.

Mussolini reviewed an Italian
motorized division about to leave
for the Russian front. He should
have kissed 'em goodby.

The War Department contracted
for 5419 pairs of skis and
3733 pairs of snowshoes for troops
in Alaska. Mentioned only be-
cause they sound so good these
hot days.

The lesson of most successful
men is that when small they
perspired to be great.

 situational duty of the President to cooperate with Congress as it is for Congress to cooperate with the President.

Officials have been elected. On that we are united. Conscript-

tion was voted. The constitutional voice of the people has spoken on that question. Unity again. No resistance to the draft. The embargo was lifted. Congress spoke. Again we accept the result.

Billions have voted for national defense. Let it be spent. Unity

once more. And so on with reference to tax legislation, raising the bonded debt limit, and everything else upon which the majority have spoken. Unity. No obstruction. On all these matters the minority is and will be loyal to the majority.

But beyond this just what do these unity people require? In the decisions to be made in the future do they demand that there be no real opposition, nothing but "constructive criticism"? If so, they are breeding a dangerous doctrine. It is little less than a demand for one-man government. Let it be seen for what it is—in time.

They point to France which fell, they say, for want of "unity". This requires analysis. If France made a tragic mistake in failing to arm, it was the mistake of its government—not of the mi-

nority not in power. If France made another mistake by declaring war unarmed, it was again the mistake of its government. Blum in one case, Deladier in the other. The government was the majority in both cases. And in both cases the government was wrong.

So what would "unity" require as applied to France? It would require that everybody be wrong. No opposition to a wrong government when wrong.

Evidently what France needed very desperately was an intelligent opposition to their governments—when wrong.

In England there was similar demand for unity for Chamberlain. Rally round the flag, boys! A "united front". The eyes of Hitler are upon you! If this doctrine had prevailed there would have been no Churchill, and perhaps no England.

No, fellow Americans, you are not called upon to turn the fate of this great country over to a single man. His constitutional power in the field of foreign affairs is indeed broad, as it is delicate. But Congress is a responsible agent on foreign policy also. It alone has the power to declare war. It alone has the power to vote the sinews of war. It alone has the power to tax, to authorize borrowing, to raise the limit of our debt, to conscript men or industry, to refuse loans to debtors or nations, to determine the size of the fleet, the number of our armies, and in my judgement, alone has the authority to turn over the Navy, the bombers, or the bombights, belonging to this nation, to any foreign power.

So long as the Constitution stands, and we are a free people, these decisions are yours to make through Congress. Let no one challenge your patriotism in making them. Challenge him who denies you!

Keep
 'em
 Rolling

for National Defense!

Step by step, the American railroads have met the constantly increasing transportation needs of national defense—smoothly and efficiently.

But there's a bigger job ahead. And it is absolutely essential to get the greatest possible use out of railroad cars. So, to conserve cars for national defense, shippers and receivers of freight are urged to follow these common-sense practices, recommended by the National Defense Advisory Commission:

1. Give advance notice of requirements but do not order cars placed for loading until commodities are ready to load.
2. Unload cars promptly on arrival and notify railroad when empty car is available. (One day saved in the average "turn-around" time of each car by faster unloading, will add 100,000 cars to the available supply).
3. Load cars to load limit stenciled on each car or to full visible capacity, whichever governs. (Increasing the average carload by one ton, will add 38,000 cars to the available supply).
4. Remove all dunnage, blocking and rubbish from cars after unloading to permit immediate re-use and eliminate necessity of delay to cars for reconditioning.

Supported by this patriotic contribution of shippers and receivers, the American railroads will continue to keep the wheels rolling for national defense:

SAFARI

Starring DOUGLAS

FAIRBANKS, Jr. and

MADELINE

CARROLL

Novelized from the Paramount Picture by Edward Churchill

Copyright 1940 by Paramount Pictures Inc. Country of Origin U. S. A.

To no world rots an old man's birthday. Here—I'll go w' ye. May-hay we'll have a drink together at my expense to us."

At that, Logan finally gave in. He and Jock went to the baron's table. Jock greeted his client cordially as the baron asked them to sit down. He reached for a drink.

"This is Jim Logan, the mon of whom I was tellin' ye, baron," Jock said. "He'll take ye on safari."

"Jock's mistaken," Jim said, shaking his blond head. "You'll have to get somebody else."

"I always make such decisions myself."

"Dark glasses to keep him from reading signs," Fay replied.

"The best rifle you can buy, Mr. Logan," Linda cut in.

"Go on, lad," Jock urged. "It's the sporting thing. You can't refuse a lady."

"Since I can't lose, very well," Logan agreed. He took the dice box from Linda and rolled. Twelve came up.

"I warned you," he told her.

She said nothing. She shook the box, and the dice rolled out. She too, had a twelve. The tie made another role necessary. Jim rolled again.

"Look," Linda said to Logan. "I'll go on this safari to satisfy Charles. You and I will roll the dice... high man wins... to see if you forget about the war and go too."

Jock, in agony at the thought of losing business, pleaded:

"Wait, lad—bang goes three hundred pounds—"

But Jim went to Mike, put his hand on his shoulder and, after giving the baron a disparaging glance, told the Negro to join him and Jock at their table. As Jim and Mike sat down, Mondehara served the baron, pointing out that his glasses were clean, as the baron had ordered. He added a dice box for his guests' amusement. Dice made from the tusks of an elephant Logan had killed to save Jock McPhail's life.

Linda Stewart was first to notice the tall, clean cut young man who sat on the other side of the shabby, smoke-filled and packed cafe. She asked Mondehara about him.

"That is Monsieur Jim Logan, the hunter," the fat proprietor told her.

"Tell him I want to see him," ordered the baron, snapping his fingers.

Jim failed to show any enthusiasm over the summons. In fact, he made no secret of his resentment at being ordered around.

"Well, I'm here, if he wants me," he told Mondehara.

Jock tried to calm him with: "Noo, lad. For once be civil. It'll do ye no harm to walk over to his table. It's only common politeness."

Jim's lean form stiffened and his lips made a hard, thin line. The blue of his eyes turned to gray.

"So do I," he replied.

Fay asked Linda in a low voice if she thought Logan could read. She said she wondered if he could see the "No Poaching" signs. Linda told Logan:

"You're rather a surprise to me. I expected a bearded giant covered with guns and pellets and things. Instead, you show up in a white tie. And you're American, by your accent. You're a long way from home."

"I'm leaving for Europe Monday," Jim Logan answered. "There is going to be a war. I want to be in on it."

"I wouldn't be here if there was going to be one," contradicted the baron.

Linda fumbled with the dice.

"Look," she said to Logan. "I'll go on this safari to satisfy Charles. You and I will roll the dice—high man wins—to see if you forget about the war and go too."

"You really mean that?" the baron demanded, happily.

"Of course, darling," Linda replied.

"I never lose with those dice," Logan warned.

"We'll see," Linda told him. "If you're low man, you come along." She turned to Fay. "What would be a fair stake?" she asked.

of men and material had been so great that victory left his people weary, exhausted, and low in morale.

"Some think that may be Hitler's fate even if he finally subdues Russia. At a conservative estimate he has lost, in killed and wounded, 1,000,000 men, and they

Fishery Commission Weekly News Letter

Continued from Page Six
back to the Nansemond Hotel, provide that the taking of sponge crabs shall be prohibited during the months of July and August.

Officials from both commissions concurred in the opinion that this period did not cover the peak spawning season of the crabs and after Hog's proposal advocating that the closed season be set from May 15 to July 15 had been seconded, the Commissions adopted it.

Virginia Commission officials said immediate steps would be taken to have the proposal put in the form of a bill to be presented before the next session of State Legislature.

During the discussion, which at several points became somewhat heated, Maryland representatives repeatedly asserted that the death of crabs in their season was "alarming" and that "Some sort of conservation program" was an immediate necessity.

Referring to the habits of the crab, Maryland speakers explained that the crabs were hatched in Virginia waters in the early summer, went up to the Maryland area by winter, mated and came back to this area to spawn. The crab explained, meant that the number of crabs coming back to this section would be greatly reduced, thereby affecting the Virginia area.

Maryland Commissioners expressed the belief that although their area was experiencing a shortage at the present time, it would not be reflected in Virginia until dredging season this winter and trap fishing season next summer. They predicted the shortage would be felt to a great extent here at that time. "If the proposal adopted today becomes law," Maryland spokesmen said, "it definitely will benefit both Maryland and Virginia."

Among the speakers were Dr. R. A. Truitt, Director, Chesapeake Biological Laboratory, College Park; Capt. Amos S. Creighton, commander of the Maryland Commission's fleet; and State Senator R. O. Norris.

After the meeting L. Seiden Taylor, Supt. of Boats and Conservation, Virginia Commission of Fisheries, said he and Mapp and Warfield would leave for Beaufort, N. C., where they will meet Dr. H. F. Frytharch, Director of U. S. Biological Laboratory there, and Capt. John A. Nelson, North Carolina Fisheries Commissioner. Taylor said the purpose of the visit would be to examine the crab conservation program which was instituted in North Carolina some time ago. The State legislature appropriated \$10,000 to help finance an extensive oyster planting and conservation program there.

George Bentley, representative of Hampton Crab Packers' association, warned Edwin Warfield, Chairman of the Maryland Commission, that "If Senator M. E.

Tydings (D-Md.) didn't stop 'harping' on Virginia crabbers about alleged catching and cooking of sponge crabs that he had the assurances of the two Virginia senators that they would introduce a bill into the Senate designed to prevent use of the crab-boat" widely utilized by Maryland crabbers.

Apparently Bentley was referring to a telegram received recently by Mapp from Senator Tydings in which the Maryland Legislator was said to have stated that "word had been received that the egg-bearing sponge crab 'is being caught and cooked daily in Virginia'."

Previous to the statement of Bentley, a packed assembly of crabbers and packers' representatives had heard Warfield state that "the time had come for both commissions to put their heads together in an effort to cope with the serious shortage of crabs in the Chesapeake Bay area."

Expressing his pleasure at being able to meet with the Virginia Commission, Warfield declared bluntly that "the Maryland Commission is ready to lay its cards on the table" to secure solution of the problems relating to the crab industry. He pointed out that joint action by both Commissions was necessary for any adequate settlement of these problems.

The backing of the "men bread and butter" depend upon the crab industry must be had in any efforts which would be successful to solve the crab shortage which, he described as "extremely serious."

Motion pictures showing the life history of the crab and highlights of crab fishing were shown by Dr. R. V. Truitt. In his running commentary on the film, Dr. Truitt said that the crab catch had dropped in 1925 to the lowest level ever known in the Chesapeake Bay.

The film pointed out the biological aspects of the life of the crabs, which it was stated, is disappearing at an alarming rate by being "fished relentlessly and taken in the stupor of hibernation."

Mapp stated that he didn't believe it was possible to again get together so many persons con-

nected with the crab industry as were at the meeting.

CLAM CHOWDER
1 pt. clams, ground or chopped
1 cup of diced white potatoes
1 cup diced bacon fired to a crisp

All-liquor saved when opening clams

Boil all ingredients together (except bacon) until potatoes are done.

Add the bacon and gravy and let cook a few more minutes. Serves 4.

Steamed Clams (Small)
Allow for 7 clams to a person.

Wash clams well.

Place in a shallow pan, not touching, space to open up.

When well open, put at once in hot ramekins, or saucers.

Strain some liquor over clams, add pepper, and melted butter, very generously. Use a thin cloth to strain clam juice.

People are working longer and more strenuous hours. The world turmoil causes uneasiness and many restless nights. Now bedrooms should be as quiet and conducive to sleep as possible. Bedroom walls built of color-panels in soft pastel shades possess insulating qualities which will help give your bedroom the desired quiet.

Mrs. H. E. Koerber, of Philadelphia, was the guest last week of her sister, Mrs. Nettie P. White, of Oceana.

Mr. and Mrs. J. J. Ballance, Jr., of Land's Station, are taking an extended trip through the Western states. They will be away several weeks.

Mr. and Mrs. E. B. Vail, of Fox Hall, returned last week from a trip over the Sky Line Drive.

—Allen Pledger, of Philadelphia

Penna. visited his mother, Mrs. S. D. Pledger, of Land's Station, over the week-end.

The ladies of the Salem Methodist Church served a chicken supper on Wednesday afternoon and evening.

Insulation Battle Line

To "save and conserve" are vital defense measures. Saving can begin at home with complete insulation. Greater economy in household heating means even more to the national economy than to the individual. Fuel resources must be conserved. If transportation facilities for fuel are reduced, public carriers can haul more defense materials. Fire-tex technicians point out that complete insulation of a house can effect substantial reductions in the amount of fuel consumed.

Peaches for Defense

With the drive for more food for defense in top gear, and a plentiful crop of luscious Virginia peaches now in harvest, defense and nutrition committees are urging homemakers to can peaches.

For defense, a good home supply of canned peaches will save tin, allow canneries to supply expert needs, and release other foods needed by England and her allies.

For nutrition, peaches are especially fine. They contain four vitamins and four minerals. They are a good source of vitamin B, fair for vitamin A, and have some vitamin C and G (B2). They are good sources of phosphorus, potassium, iron, and calcium—all highly valuable in building bones and protecting teeth.

Helping to feed England and her allies will make a big demand for commercially-canned peaches.

It is predicted, with consequent higher prices this coming winter. So home canning should be both economical and patriotic.

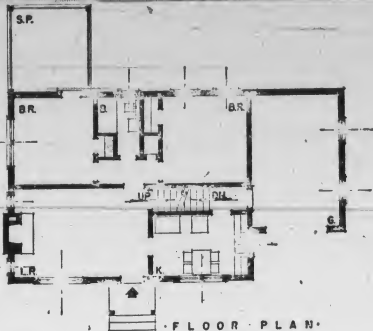

A bushel of good peaches will average 22 to 26 quarts canned, depending upon how closely the peaches are sliced and packed in the jars, and upon the size of the fruit. As a rule, larger peaches will fill more jars.

The best canning methods are simplest, say the home economists of the Virginia Agricultural Extension Division. The hot-water bath method and the oven method are equally good. Preparations are the same for both: select firm, ripe peaches; blanch by quick dip into hot water, then cold-dip and peel. Skins literally "pull off" when this properly done. To prevent discoloration, place in a salt solution (1 teaspoon of salt to 1 quart of water) until just before packing. Half or quarter

This small frame house represents the type now being built in great numbers throughout the country. It has two bedrooms with a rear sleeping porch, a bath, an unusually large living room, and a large kitchen. Location of the kitchen on the front of the house is a trend in small home construction. In this case, the large double window makes a pleasant spot for a breakfast table.

In Ohio this property is valued at \$4,800. It was financed with a Federal Housing Administration-insured mortgage of \$3,500. Average monthly payments on a 25-year mortgage of this amount total about \$20 exclusive of local taxes and hazard insurance. The cost may vary in other localities.

for packing. Halve or quarter peaches, unless you wish to can—not too tightly, if the family likes lots of syrup. Cover fruit with boiling syrup. Adjust rubbers and covers, and partially seal. For hot-water bath method: see that water is one inch over the top of jars and cook for 25 minutes (for quarts—20 for pints) after the water begins to boil.

Oven canning: see that jars are on several layers of heavy paper in a shallow pan, or on the shelves. See that they are not touching. Set temperature control at 275 F. and cook 1 to 1½ hours.

For full directions on canning peaches and other fruits also vegetables and meats, homemakers are invited to write to the

Virginia Agricultural Extension Division for a copy of Bulletin 128 "Canning For The Home."

If you want something, the best way to get it is to ask for it—and keep on asking.

With all his blundering, Uncle Sam has a way of blundering forward.

Fishery Commission Weekly News Letter**Virginia Fisheries Laboratory**

Friday, August 1st, marks the end of the six weeks regular summer school session in Aquatic Biology and Conservation at the Virginia Fisheries Laboratory in Yorktown and Williamsburg. Dr. Curtis L. Director of the Laboratory, has announced.

Students specializing in this field, Dr. Newcombe stated, will continue for three weeks longer, conducting special research problems for which they receive college credit at William and Mary.

Dr. Newcombe described the group, taking the work this summer, as "Highly enthusiastic and serious," adding that a good part of the success of the session was due to the Laboratory's proximity to the great variety of environmental conditions which Tidewater Virginia provides. Fresh-water, brackish-water and typically oceanic animals and plants abound in the waters of the region.

With the aid of the Commission's fishery boat "Agnes Hope", Dr. Newcombe reveals that it has been possible to take the students to the various centers of the commercial fisheries, where, he said, "The men in the industry cooperated in every way giving the students access to the oyster and crab houses so that the methods of these fisheries may be carried on first hand".

On July 26 the group went to Hampton and there visited the oyster house of J. S. Darling & Son., and the crab house of George T. Elliott. Securing the services of Capt. W. T. Quinn, of the "Sea Roamer", the students were able to go aboard and see a typical offshore trawler and the gear used in this industry.

In the afternoon, the students proceeded to the Poquoson area where the ribbed mussel occurs in the typical "tump" formation of the seaside.

The last study area was at Seaford where the largest laboratory experiments on mussel culture is

located. This rather large experiment, according to the laboratory head, serves as a field laboratory for instruction in the problems of shellfish culture.

This season is especially important, it was pointed out, because it marks the first time that organized instruction in marine biology has been offered in the State, which has an estimated shore-line of 6,000 miles and a fishing industry yielding annual production worth around five million dollars.

As a part of, the Laboratory's investigations on the Blue crab, nightly tows for larval crabs are being taken in different sections of the lower Bay. In connection with these studies, it was said, Revell Melson left Yorktown on board the "Agnes Hope" July 18, for the Ocean View-Cape Henry area. It is in this section and off Cape Charles that the largest quantities of blue crab larvae are reported to have been taken. On July 21, Coker, Assistant Biologist at the laboratory, joined the "Agnes Hope" at Cape Charles and proceeded to Oyster, where the field experiments in this area are.

Commissions Move to Conserve Crab Supply

Members of the Virginia and Maryland fisheries commissions, on July 13rd, adopted a proposal which, if it becomes law, promises to alleviate to a great extent the "serious short-age" of crabs in waters adjacent to the two states.

Convening in a joint session, which Virginia Commissioner J. Brooks Mapp termed "one of the most important meetings ever held by the Commissions, the two groups heard W. E. Hogg, Warwick County Trial Justice, propose that the closed season on "sponge" crabs in the "Ocean View Crab sanctuary" be moved up 45 days so that crabs in the reserve area would be prohibited during the peak spawning season.

Present regulations governing the area which runs from Nansemond Hotel to Thimble Shoals Lighthouse, Cape Charles Light-house, Cape Henry Lighthouse and (Continued on Page Five)

As Others See It

(Continued from Page Two)
the warrior class now ruling the ways and means of the millions of Japanese think they can toss baseball overboard like the snap of two fingers, let them read from The Japan Yearbook: "This is the most favorite game with all classes of people in this country." We hate to think what would happen in Brooklyn if the Government shut down Ebbe's Field.

Judge Groner Rules
(Clifton Forge Review)

A decision of the United States Court of Appeals of the District of Columbia recently declared that a drunken driver is a murderer when his reckless driving makes an innocent citizen the victim.

An appeal of a 27-year-old youth to overrule a prison term of fifteen years to life for killing two persons in a drunken joyride was denied by Chief Justice D. Lawrence Groner.

The boy's defense was that he was too drunk to know what he was doing that he suffered a loss of memory and that he recalled nothing of the tragedy until he awoke in a cell and wondered why he had been arrested. The defense called it insanity. The jury called it murder in the second degree. The jury's judgment was confirmed in strong words by the Chief Justice.

Drunken driving and its resulting deaths has long been considered one of society's greatest problems. Because the boy chose to get hopelessly drunk was no excuse that he should escape the punishment of the law. The Court of Appeals had the strength to rule as it did on this type of case, and its decision is sure to have far-reaching effects on similar cases that come up in other courts. True, there was no malice aforethought when the boy, in a stupor, committed his crime. But there was a great deal of malice, as the judge pointed out, in his complete and reckless disregard for others. There were no mitigating circumstances in the case.

Uncle Sam, Installment
Merchant
Danville Register

Unless the government makes its own corporate enterprises and other agencies doing such business conform to the restrictions soon to be imposed upon banks, merchants and others engaged in easy-term installment selling and loans, it will fail to accomplish its purpose of curtailing sale of hard goods and major appliances constructed of materials needed in defense production.

The federal government with 21 separate lending agencies and corporations, is the biggest installment firm in the nation, and does the largest installment business. And much of this business is done in the very materials which Mr. Leon Henderson would reserve for defense production.

If defense needs require curtailing consumer use of various materials, the people are willing to do without them, even should the lack of these necessities impose unexpected hardship. The people are willing to do their share, whatever that share may be, but they want their efforts and sacrifices to be in line with government practice, and vice-versa.

What is accomplished, a merchant argues with reason, by his

firm refusing to sell refrigerators, washing machines and other electrical appliances except to customers who can pay one-third down, when the government, thru the EHPA (Electric Home and Farm Administration) will extend loans to families for the purchase of the same appliances on low down-payment and long credit terms?

The materials that go into construction of homes are the materials needed for defense: wood, iron, steel, copper, brass, lead, tin and cement. Banks, building and loan associations and other private home-financing agencies are to be required to impose restrictions on loans, yet the government, thru the United States Housing Authority, Disaster Loan Corporation, the Farm Security Administration and other agencies are making direct loans to encourage the utilization of these materials for non-defense purposes. And through other agencies give grants or insure loans to the same end. It looks like a duplication of the oil sales to Japan, prior to the embargo, when we were supplying materials with which Japan might carry on her war with China while leasing and lending defense materials to Chiang Kai-shek.

When the rules for clamping down on installment buying are promulgated, the President should not fail to make those rules applicable to federal as well as private agencies and corporations.

Socialistic Teaching
Times-Register

Now with Dr. Sidney B. Hall as State Superintendent of Public Instruction, who has dominated the State Board of Education as well as the entire public school system of Virginia for years, out of the way, it is to be hoped that Governor Price will appoint a state school head who will listen to the growing demands of the taxpayers for an investigation of the text books used in our public schools, which seek to break down the American system of business and to implant in the minds of school children, a distrust of the very sources of revenue which the schools of Virginia have been principally supported.

The American Legion and other organizations have tried to point out time after time the damage the Rugg text books are doing in the public schools of Virginia, and have asked that they be discontinued, but could get nowhere because of Dr. Hall's dominating influence. Now the light of publicity has been turned on the Rugg books throughout the country and sixteen states have refused to continue their use.

Charges against Dr. Harold Rugg in his books that our children are forced to study are based on such premises as their attacks on American loyalties, and allegiances, the indoctrination of youth against traditional ideals

and institutions, lack of emphasis on true American life and too great emphasis on the unfavorable aspects, failure to give due acknowledgment to the deeds of our great American heroes, questioning private ownership, too favorable emphasis on what has been done in the Soviet Union, the creation of doubt in the minds of pupils and teachers as to the ability of our democracy to function successfully, the dissemination of alien propaganda, statements that the United States Supreme Court favors vested interests, and so on.

Until recently revised, the Rugg Social Science textbooks presented the Five Year Plan of the Soviet Union in a most favorable light, and the teacher's guide accompanying the textbook says: "We suggest that the new regime in Russia be discussed as a great experiment." Indeed, treat all the forms of government in the world today as experimental.

Throughout Dr. Rugg's publication one inevitably gets the impression that he is constantly and subtly driving toward a socialist state that can be grafted on American democracy.

This same trend is noticeable in the new course of study adopted for the public schools of the Old Dominion. For instance in the Course of Study for Virginia Elementary Schools, Grades 1-7, in the section of "How To Use the Course of Study," suggestions for teachers under "Aims of Education" pages 10 and 11 are found the following:

"The understanding that the Masses of Men Struggle Constantly to Gain Freedom from Domination by the Few."

Individuals and powerful minorities have always sought to control and to subjugate the masses.

The present social order is not fixed and permanent. Man continues to modify it in his search for justice and freedom.

"The Understanding That Government in a Democracy is Often Controlled by Forces Invisible to the Citizen."

The minority of wealth derived from business and industry has succeeded the landed aristocracy.

Some forces in modern business resist government regulations in behalf of the people.

The Understanding of the Operation of Modern Business and Industrial Enterprise."

Capitalism is based upon the principal of profit to the owner rather than the service to the masses of the people.

The methods of distribution of goods in a capitalistic society tend to direct social products into the hands of the few.

The capitalistic system is not planned and lacks direction; thus wastes and economic cycles result.

The dependence of the laborers upon capital tends to reduce him to a servile status."

NEWS OF INTEREST

HAVE WE A WAR TO WIN?

The President of the United States drew a parallel from the words of Abraham Lincoln and issued a warning to the Nation a few days ago. He said we are faced by a war that can be won only by "hard, tough fighting" that will "hurt somebody." When the President returned from his meeting with Winston Churchill he told the country that it was no nearer war than before the meeting with the British chiefs of state.

The spread of the war into Russia, and threats of war with Japan, present a situation that is filled with grave dangers. The Administration has been aware of these dangers for a long time.

It now appears that the heads of the Army realize that the Lower House of Congress knew there was a critical condition in our Army when it came within one vote of freeing draftees from service. Immediately after the President signed the bill passed by the two branches of Congress to keep the men another eighteen months, the War Department announced a new policy that promises all present and future selective service men and guardsmen an average of eighteen months of training, instead of the full thirty months permitted under the law signed by President Roosevelt; with 200,000 freed within the next few weeks. It is very obvious that the War Department has become concerned over the morale in Army camps, which is the actual reason why the program was changed.

So, the general public should heed the warnings and sit tight, and do plenty of thinking and planning for the future for our country, and our people.

BUDGET BUYING

Young people of this country have grown into the habit of making "budgets." This is due to the fact that it costs them three or four times as much to live as it did their parents twenty-five or thirty years ago. The new standards of living call for electric lights and gas instead of kerosene, wood, and coal. Electric refrigeration and packaged food are of recent origin. Folks go to the movies instead of taking a walk in the park. Young husbands and wives find employment, and combine their incomes in order to be able to purchase the things they want.

At the present time the United States Government urges citizens to buy their own homes and go into debt thousands of dollars, and pay off obligations by installments. And while our Government is stressing the virtues and importance of its own plan, an entirely contrary and counter movement is being stressed to modify easy-payments on household furniture, automobiles, refrigerators, and scores of other consumer items. The theory of the restrictions is to reduce dangers of inflation.

Other proposals designed to make deep cuts in automobile production would throw hundreds of thousands of wages workers out of employment, and every dealer and distributor, and community, throughout the country would be affected.

The way Congress feels about these matters is indicated by the decision of the Senate and House to mark time for the next few weeks and to lay aside consideration of laws that propose regulation of price fixing, restricted production, and the sale of all goods on the installment buying plan. Washington's disposition is to play ball with young men in the Army and young people, and the small wage earners, and assist them to carry out their budget programs.

THE PRESIDENT'S MYSTERY MAN

Harry Hopkins is "confidential and personal" representative of President Roosevelt. He was the man who fixed up arrangements for the Roosevelt-Churchill meeting at sea. So far he hasn't made a slip, and he may do a great deal better than Colonel House who lost favor with President Wilson before the latter finished his term of office. When Hopkins returned to Washington a few days ago he was wearing Winston S. Churchill's hat.

SHY LOWELL MELLETT

There is an old story in Washington about Lowell Mellett being told to answer the telephone—"the White House wants you right away!" Mellett refused to go to the phone, and said: "Tell the boys to go back to their drinking and stop playing jokes." But, President Franklin D. Roosevelt wanted to ask Mellett to oversee all Government publicity. Mr. Mellett holds the office of Director of the Office of Government Reports, and while he remains at that post there will be no censorship of the press in the United States.

Theatre Prevues

At The Bayne
Vivacious Ginger Rogers is starred in the whimsical, romantic comedy, "Tom, Dick and Harry", the featured presentation at the Bayne for today and tomorrow, August 29 and 30. George Murphy, Alan Marshall and Burgess Meredith are seen in the title roles, turning in a triple threat performance that further reveals their propensities for sprightly comedy.

On Sunday, Monday and Tuesday, August 31, September 1st and 2nd, Jack Benny returns to the screen in "Charley's Aunt", slapstick comedy production featuring Kay Francis, James Ellison, Anne Baxter, and Edmund Guinn. This promises to be amusing entertainment, with Benny, appropriately dressed, posing as his elderly aunt from Brazil. On Wednesday and Thursday, September 3 and 4, "Navy Blue and Gold", a spectacular Navy picture, will be featured at the Bayne. James Stewart, Robert Young and Lionel Barrymore head the "Big Name" cast in a story of life at Annapolis which traces the respective careers of three youths who come to the naval academy from different walks of life. Florence Rice, Billie Burke, and Tom Brown are among the supporting cast.

At The Roland
When a picture boasts a cast starring Bing Crosby, Dorothy Dorothy Lamour, and Bob Hope, a supporting cast which includes Charles Coburn, Judith Barrett, and Hope's radio sidekick, Jerry Colonna, five sons hits Dorothy's sarong. It's safe bet that "The Road to Singapore" is going to be a hit, so get down to the Roland early today or tomorrow, August 29 and 30.

On Sunday, Monday, August 31 and September 1, a double feature will be presented—"The Richest Man in Town", with Frank Craven and Eileen O'Hearn, and "Raiders of the Desert", featuring Richard Arlen and Andy Devine.

On Tuesday, Wednesday and Thursday, September 2, 3 and 4, Bill Elliott returns in "Son of Davy Crockett", and, as an added attraction, Otto Kruger and Gloria Dickson will be presented in "The Big Boss."

HEALTH NOTES

The School Child's Health
"The million and a half soldiers now in camps throughout the United States are one of the eloquent proofs of today's preparedness activities. While training in military tactics and in the use of combat weapons is paramount in the routine life at these great concentration centers, the physical conditioning of this enormous civilian army also is a vital part of the program. To a lesser but no less essential degree, the school child's physical well-being is equally important. Whether entering school for the first time or as an older pupil, maxi-

BEAUTY AND THE BEAST

You can see that Miss Strother, 19, otherwise known as Miss Florida, 1941, has an unusual pet in the form of "Wimpy," a baby seal. They are pictured, above, walking on the Atlantic City Boardwalk and, just like Mary and her Little Lamb, wherever Miss goes "Wimpy" follows—on his leash. Miss Florida is one of the contestants in the Atlantic City Beauty Pageant to be held September 1st to 7th.

imum benefits from the school training cannot be realized, unless the best health of which the child is capable, exists," states Dr. I. C. Riggan, State Health Commissioner.

"School-health definitely is a public health concern. However, while health officials can exercise a direct influence upon safe water and milk supplies, adequate sewage disposal facilities, and similar mass problems, except for the law requiring execution of a successful smallpox vaccination, health safeguards and personal health practices so far as the school child is concerned, largely are a parental concern.

"Wise parents of school-age children, therefore, will give this subject consideration. Habitual lack of sufficient sleep, unwise or inadequate eating habits, instruction in an dthe faithful application of hygiene practices, and the removal of any tendency to

Red Cross Speeds

(Continued from Page One)
men are urged to undertake some part of the work.

The Volunteer personnel of the Princess Anne Production Corps remains unchanged: Mrs. Emmett Kyle, Production chairman; Mrs. George Boush, sewing chairman; Mrs. Hunter Phelan, knitting chairman; Mrs. Walter Mitchell, chairman of surgical dressings; Mrs. Edwin Hathaway and Miss Alice Rice, in charge of packing and shipping; Mrs. Selden Grandy and Mrs. James Bell, Jr., in charge of the emergency closet. Sub-chairman for sewing are as follows: Mrs. N. A. Nicholson, Greeds and Back Bay; Mrs. Floyd Kellam, Princess Anne Court-house; Mrs. Herman Whitehurst, Mrs. A. T. and Mrs. R. B. Carter and Mrs. T. C. Hunter, London Bridge; Mrs. Harry Baily, Mrs. Blanche Woodhouse and Mrs. S. D. Scott, Oceana; Mrs. John Mills, Lynnhaven; Mrs. Edward Turner, Bayside. Working through Mrs. Turner are groups represented as follows: Mrs. B. D. White, Old Donation Church; Mrs. A. L. Baxter, Kempsville; Mrs. Frank Allard, Chesapeake Beach; Mrs. W. W. Oliver, Little Neck. Any volunteer interested in sewing should phone her nearest representative.

Sub-chairman for knitting have not been needed prior to the receipt of the present large quota; but these will be named shortly. Meantime, anyone throughout the county who is interested in knitting may communicate directly with Mrs. Phelan by phone (Virginia Beach 886) or by mail (Bay Colony, Virginia Beach. More experienced knitters who would be willing to serve as sub-chairmen are particularly asked to volunteer their services to Mrs. Phelan, for delivering wool, collecting finished garments, interesting new knitters, and, when necessary, helping them with minor knitting problems.

Volunteers for surgical dressings may call Mrs. Mitchell. Since it started on its war relief program, the Princess Anne Production Corps has sent to the Red Cross shipping dock at Jersey City the following items: 161 sweaters, of which 73 were for adults and 88 for children; 53 complete layettes and 33 extra

layette blankets; 16 crocheted shawls; 33 women's dresses and 36 children's dresses; 34 bed-shirts; 17 hospital operating gowns; 17,110 surgical dressings. Of a recent quota of 20 knitted mufflers, 10 have been completed and 10 are in process of making. A finished layette consists of 2 blankets, 2 dresses, 2 wrappers, 2 bands, 2 shirts, a wool sacque and cap, stockings or booties, safety pins and 1 dozen diapers. Each thus represents a large amount of sewing, but letters received at National Headquarters from England where most of the finished garments have been delivered, express special delight at these carefully planned and executed bundles of clothing for the babies whose mothers have been "bombed out".

In several new Red Cross defense activities being started in the local chapter, but not connected with Production, there will be close cooperation with the new Port Story and Fendleton group. The Motor Corps is one of these new activities important to defense, which has already received publicity in last week's Virginia Beach News. In its previous, permanent committee, the Princess Anne Chapter personnel remains unchanged, with Mr. Clower as General Chairman.
